

Clinical trial results:

Pharmacokinetic study in HIV infected patient receiving 1 tenofovir disoproxil fumarate (TDF): Investigation of systemic and intracellular interaction between TDF and abacavir, lamivudine or lopinavir/ritonavir

Summary

EudraCT number	2004-000948-25
Trial protocol	ES
Global end of trial date	07 September 2005

Results information

Result version number	v1 (current)
This version publication date	04 April 2018
First version publication date	04 April 2018

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 September 2005
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 September 2005
Global end of trial reached?	Yes
Global end of trial date	07 September 2005
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate if the co-administration of tenofovir disoxipropil fumarate (TDF) modifies intracellular levels of abacavir (ABC) and lamivudine

Protection of trial subjects:

not specific

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	12 January 2005
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 27
Worldwide total number of subjects	27
EEA total number of subjects	27

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	27
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study enrolled subjects who had been receiving a triple HAART regimen for more than 42.2 months (± 8.2) including TDF 300 mg once daily, taken with food, 3TC 300 mg once daily or ABC 300 mg twice daily and a NNRTI (NVP 400 mg once daily) or a PI (LPV/r, 400/100 mg twice daily).

Pre-assignment

Screening details:

Twenty seven patients were included in the cross-sectional part of the study. Fourteen of them also participated in the longitudinal study.

Period 1

Period 1 title	cross-sectional part
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Group 1: TDF + 3TC + LPV/r

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Tenofovir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

300 mg once daily

Investigational medicinal product name	lamivudine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

300 mg once daily

Investigational medicinal product name	lopinavir/ritonavir (LPV/r)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

400/100 mg twice daily

Arm title	Group 2: TDF + 3TC + NVP
Arm description: -	
Arm type	Experimental

Investigational medicinal product name	Tenofovir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg once daily	
Investigational medicinal product name	lamivudine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg once daily	
Investigational medicinal product name	nevirapine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
400 mg once daily	
Arm title	Group 3: TDF + ABC + LPV/r
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Tenofovir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg once daily	
Investigational medicinal product name	Abacavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg twice daily	
Investigational medicinal product name	lopinavir/ritonavir (LPV/r)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
400/100 mg twice daily	
Arm title	Group 4: TDF + ABC + NVP
Arm description: -	
Arm type	Experimental

Investigational medicinal product name	Tenofovir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg once daily	
Investigational medicinal product name	Abacavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg twice daily	
Investigational medicinal product name	nevirapine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
400 mg once daily	

Number of subjects in period 1	Group 1: TDF + 3TC + LPV/r	Group 2: TDF + 3TC + NVP	Group 3: TDF + ABC + LPV/r
Started	7	8	7
Completed	7	8	7

Number of subjects in period 1	Group 4: TDF + ABC + NVP
Started	5
Completed	5

Period 2

Period 2 title	longitudinal study
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Group 1: 3TC + LPV/r
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	lamibudine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg/24 h	
Investigational medicinal product name	lopinavir/ritonavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
133.3/33.3 mg, 3 tablets/12 h	
Arm title	Group 3: ABC + LPV/r
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	abacavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
300 mg/12 h	
Investigational medicinal product name	lopinavir/ritonavir
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
133.3/33.3 mg, 3 tablets/12 h	

Number of subjects in period 2 ^[1]	Group 1: 3TC + LPV/r	Group 3: ABC + LPV/r
Started	7	7
Completed	7	7

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: The study design was a cross sectional study followed by a longitudinal prospective study (after 4 weeks of TDF interruption).

TDF was withdrawn for 4 weeks to assess pharmacokinetic interactions between TDF and ABC or 3TC only in patients under LPV/r (group 1 and 3) in order to avoid viral rebound during the dual therapy. So,

patients starting the second period (longitudinal study) were less than those who were completed the preceding period.
