General information about the trial

Main objective of the trial:

- To facilitate the management of patients on maintenance immunosuppression therapy who are completing everolimus trials,
- To provide everolimus maintenance therapy through this access program and
- To collect and review safety data for up to 120 months or until the project has been discontinued whichever comes first.
- To collect and review safety data for up to 120 months or when Certican is commercially available in the given indication and reimbursed by appropriate payors or the project has been discontinued, whichever comes first.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Primary: Percentage of patients in each Tanner stage, by indication and visit

End point title	Percentage of patients in each Tanner stage, by indication and visit ^[8]
-----------------	---

End point description:

Tanner scale defined as a scale used to measure visible changes during puberty commonly referred to as "Tanner stages". Female participants will be evaluated for breast development and pubic hair distribution and male participants are evaluated for development of external genitalia and pubic hair distribution, based on a 5-stage ordinal scale ranging from TS 1 (prepubertal/preadolescent characteristics) to TS 5 (mature or adult characteristics).

Tanner stage was summarized using frequency distributions at each visit for pediatric patients only.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events are collected from First Patient First Visit (FPFV) until Last Patient Last Visit (LPLV). All adverse events reported in this record are from date of First Patient First Treatment until Last Patient Last Visit

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.
