

Clinical trial results:

An open-label, multicenter, follow-up study to evaluate the safety and efficacy of levetiracetam (LEV) (oral tablets of 166, 250 or 500 mg b.i.d.), at individualized doses up to a maximum of 4000 mg/day (or 80 mg/kg/day for children and adolescents less than 50 kg), in children (4 years old), adolescents and adults suffering from primary generalized seizures

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	14 March 2008
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	10 July 2007
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of N167 was to evaluate the safety and efficacy of LEV at individualized doses with a maximum dose of 4000 mg/day (or 80 mg/kg/day for children and adolescents less than 50 kg), in reducing seizures in children, adolescents, and adults suffering from Primary generalized (type II) seizures.

Protection of trial subjects:

Not applicable

Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	01 November 2001
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	4 Years
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Adults (18-64 years)	204
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This study started to enroll subjects in November 2001. 217 subjects were enrolled from studies N01057 and N166, which are defined as the ITT Population, and 20 subjects were enrolled from studies N129 and N164.

Pre-assignment

Screening details:

Participant Flow shows all enrolled subjects.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Levetiracetam (subjects from N01057 and N166)

Arm description:

Subjects received treatment up to 1764 days during the Evaluation Period. Up to 4000 mg/day (or 80 mg/kg/day for children and adolescents less than 50 kg). Oral tablets of 166, 250, or 500 mg Levetiracetam twice daily (b.i.d.).

Arm type	Experimental
Investigational medicinal product name	Levetiracetam
Investigational medicinal product code	ucb L059
Other name	Keppra
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

All subjects received open-label Levetiracetam during this study. Investigational product consisted of film-coated tablets of 166, 250, or 500 mg Levetiracetam to be taken orally with or without food.

Arm title	Levetiracetam (subjects from N129 and N164)
------------------	---

Arm description:

Subjects received treatment up to 1764 days during the Evaluation Period. Up to 4000 mg/day (or 80 mg/kg/day for children and adolescents less than 50 kg). Oral tablets of 166, 250, or 500 mg Levetiracetam twice daily (b.i.d.).

Arm type	Experimental
Investigational medicinal product name	Levetiracetam
Investigational medicinal product code	ucb L059
Other name	Keppra
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

All subjects received open-label Levetiracetam during this study. Investigational product consisted of film-coated tablets of 166, 250, or 500 mg Levetiracetam to be taken orally with or without food.

occurrences (all)	0	5	
Bronchitis			
subjects affected / exposed	0 / 217 (0.00%)	2 / 20 (10.00%)	
occurrences (all)	0	2	
Viral upper respiratory tract infection			
subjects affected / exposed	0 / 217 (0.00%)	2 / 20 (10.00%)	
occurrences (all)	0	2	
Gastroenteritis			
subjects affected / exposed	0 / 217 (0.00%)	2 / 20 (10.00%)	
occurrences (all)	0	3	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
08 September 2003	<p>The core protocol amendment was issued on 08 Sep 2003 and concerned the following:</p> <ul style="list-style-type: none">• The number of participating sites and countries was extended due to a delay in recruitment in the prior N166 and N01057 studies.• Adverse events reported in postmarketing experience were added to protocol Section 2.2.4, Adverse Events in Clinical Studies (Section 16.1.1).• Some administrative changes were made to the protocol that did not alter the conduct of the study (eg, emergency contacts were updated and various edits made to sentences for clarification only).

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
