

## Clinical trial results:

### Comparing two schedules of rituximab maintenance in rituximab-responding patients with untreated, chemotherapy resistant or relapsed follicular lymphoma: A randomized phase III trial

#### Summary

EudraCT number	2004-002859-13
Trial protocol	IT SK
Global end of trial date	19 December 2017

#### Results information

Result version number	v1 (current)
This version publication date	15 December 2022
First version publication date	15 December 2022

#### Trial information

##### Trial identification

Sponsor protocol code	SAKK 35/03
-----------------------	------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00227695
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Swiss Group for Clinical Cancer Research (SAKK)
Sponsor organisation address	Effingerstrasse 33, Bern, Switzerland, 3008
Public contact	Head Regulatory Affairs, Swiss Group for Clinical Cancer, +41 31389 91 91, sakkcc@sakk.ch
Scientific contact	Head Regulatory Affairs, Swiss Group for Clinical Cancer, +41 31389 91 91, sakkcc@sakk.ch

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 September 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 December 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of this trial was to investigate if maintenance with rituximab for 5 years or until relapse/progression, unacceptable toxicity or death is superior to 4 times maintenance with rituximab.

Protection of trial subjects:

Protection of trial subjects was ensured by Safety Monitoring, i.e. assessment of adverse events, serious adverse events, adverse drug reactions, and the continuous assessment of laboratory values and vital signs.

Background therapy:

None

Evidence for comparator:

Not applicable; no comparator was used. The study evaluated the impact of different rituximab maintenance schedules.

Actual start date of recruitment	05 August 2004
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Slovakia: 2
Country: Number of subjects enrolled	Italy: 53
Country: Number of subjects enrolled	Brazil: 7
Country: Number of subjects enrolled	North Macedonia: 10
Country: Number of subjects enrolled	Serbia: 4
Country: Number of subjects enrolled	South Africa: 16
Country: Number of subjects enrolled	Switzerland: 73
Worldwide total number of subjects	165
EEA total number of subjects	55

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	119
From 65 to 84 years	46
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Between August 2004 and September 2007, 270 patients were included into the trial at 19 centers in Switzerland, 2 centers in South Africa, 1 center each in Brazil, Italy, Macedonia, Serbia and Slovakia.

### Pre-assignment

Screening details:

Eligibility criteria of a patient were checked by the investigator. Once a patient fulfils all inclusion criteria and not any of the exclusion criteria, he/she was enrolled. Of the 270 registered patients, 165 patients were randomized.

### Pre-assignment period milestones

Number of subjects started	270 <sup>[1]</sup>
Number of subjects completed	165

### Pre-assignment subject non-completion reasons

Reason: Number of subjects	Consent withdrawn by subject: 1
Reason: Number of subjects	PD / Relapse: 17
Reason: Number of subjects	Toxicity: 2
Reason: Number of subjects	SD: 75
Reason: Number of subjects	Other: 10

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: It was planned to enroll 270 patients into the induction phase and then randomize a total of about 135 patients, in order to observe the required number of 99 events.

### Period 1

Period 1 title	Baseline period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

n/a

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Arm A

Arm description:

Rituximab 375 mg/m<sup>2</sup> | every 2 months x 4

Arm type	Experimental
Investigational medicinal product name	Rituximab
Investigational medicinal product code	
Other name	MabThera®
Pharmaceutical forms	Infusion
Routes of administration	Infusion

Dosage and administration details:

Inductionphase: Rituximab 375 mg/m<sup>2</sup> weekly x 4 || Maintenance phase: Rituximab 375 mg/m<sup>2</sup> every 2 months x 4

<b>Arm title</b>	Arm B
------------------	-------

Arm description:
