

Clinical trial results:

A PHASE II, MULTI-CENTER STUDY OF MELPHALAN 100 mg/m² (MEL 100) as transplant, REVLIMID and PREDNISONE (RP) as consolidation and REVLIMID ALONE as maintenance IN ELDERLY NEWLY DIAGNOSED MULTIPLE MYELOMA PATIENTS.

Summary

EudraCT number	2005-004730-41
Trial protocol	IT
Global end of trial date	14 August 2023

Results information

Result version number	v1 (current)
This version publication date	22 May 2024
First version publication date	22 May 2024

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 March 2024
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	14 August 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary objectives

Determine whether the sequence MEL100-Revlimid and Prednisone (RP) and Revlimid is safe and provides clinical benefits in patients with newly diagnosed myeloma

Secondary study objectives

Determine the effect of the sequence MEL100-Revlimid and Prednisone (RP) and Revlimid on progression-free survival and overall survival. Verify the duration of molecular remissions and their association with progression free survival.

Determine whether tumor response and survival might significantly change in particular subgroups of patients defined on prognostic factors (2-microglobulin, C-reactive protein, cytogenetics, gene expression profile).

Protection of trial subjects:

The protocol for this study has been designed in accordance with the general ethical principles outlined in the Declaration of Helsinki. The review of this protocol by the IRB/EC and the performance of all aspects of the study, including the methods used for obtaining informed consent, must also be in accordance with principles enunciated in the declaration, as well as ICH Guidelines, Title 21 of the Code of Federal Regulations (CFR), Part 50 Protection of Human Subjects and Part 56 Institutional Review Boards.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	03 October 2005
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 102
Worldwide total number of subjects	102
EEA total number of subjects	102

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	32
From 65 to 84 years	70
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Potential study subjects will sign an informed consent prior to undergoing any study related procedure. This study consists of 3 phases for each study subject: Pre-treatment, Treatment, long-term follow-up

Pre-assignment

Screening details:

After providing written informed consent, patients will undergo screening for protocol eligibility as outlined in the Schedule of Study Assessments.

Period 1

Period 1 title	pad-mel100-RP_R (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	pad-mel100_RP_R
-----------	-----------------

Arm description:

Cyclophosphamide (CY) for 2 courses and stem cell collection, MEL100 for 2 courses. In order to assess the toxicity of treatment, patients will attend the study center visits at least every 2 weeks.

After MEL100 patients will receive RP for 4 months as consolidation therapy. In order to assess the toxicity of treatment, patients will attend the study center visits at least every 2-4 weeks.

After the 4th course of consolidation therapy (RP) patients will receive REVLIMID alone as maintenance until progression. The duration of the maintenance treatment should be approximately 1.5 years. All patients are to attend study center visits on an every 4 week basis, until development of confirmed Progressive Disease (PD) – short term follow up

Arm type	pad-mel100_RP_R
Investigational medicinal product name	MEL100
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for injection/infusion
Routes of administration	Intravenous use

Dosage and administration details:

CY: Cyclophosphamide will be given iv at 3 gr/m² followed by G-CSF administration at the dose of 10 ug/kg, stem-cell collection will be performed 10 days later when the number of WBC > 2 x 10⁹/L . Each cycle will be repeated every 60 days for a total of 2 courses.

MEL100: After 30 days from last CY, Melphalan will be delivered iv at the dose of 100 mg/m² followed by stem cell infusion. Each cycle will be repeated every 60 days for a total of 2 courses.

Investigational medicinal product name	Lenalidomide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Other use

Dosage and administration details:

Lenalidomide will be given orally at the dose of 25 mg once daily on days 1-21 every 28 days cycle for a total of 4 courses.

Investigational medicinal product name	DELTACORTENE
Investigational medicinal product code	
Other name	Prednisone
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Prednisone will be administered orally at the dose of 50 mg every other day for a total of 4 months

Investigational medicinal product name	Lenalidomide
Investigational medicinal product code	
Other name	Revlimid
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

REVLIMID alone will be used as maintenance at the dose of 10 mg once daily on days 1-21 every 28 days until development of confirmed progressive disease.

Number of subjects in period 1	pad-mel100_RP_R
Started	102
Completed	33
Not completed	69
Adverse event, serious fatal	9
Consent withdrawn by subject	3
Adverse event, non-fatal	23
Other	2
Lost to follow-up	4
Lack of efficacy	28

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 February 2006	Reduction of sites participants Clarification for acceptable toxicity assessment changing the requirements for pregnancy protection evaluation of minimum platelet level evaluation of the administration of Revlimid during maintenance therapy inclusion of a paragraph on revlimid toxicity delete of quality of life questionnaire inclusion of prophylaxis with ASA delete co-trimoxazole and allopurinol as concomitant therapies adverse events report changes new version of ICF
15 May 2011	ICF updated for urgent information supplied by AIFA regarding lenalidomide
06 February 2018	Protocol: some administrative information was changed and some criteria on disease response were corrected Information sheet/informed consent: the risks associated with lenalidomide treatment have been updated and the information on the processing of personal data has been updated SAE_SUSAR form: the new form for reporting serious adverse events and/or SUSARs has been submitted. Drugs Prednisone, Melfalan, Lenalidomide: updated the 'Summary of Product Characteristics' for these drugs submission of document for pts regarding the Pregnancy Prevention Programme (PPG) Sponsor data: change of address of the promoter's registered office
15 January 2019	a new site has been added for the import and release of the drug Lenalidomide.
17 June 2019	updated Lenalidomide IB and ICF
20 March 2020	COVID-19 health emergency: urgent procedures in order in order to limit the risk of coronavirus infection by subjects enrolled in the trial.
17 June 2020	Updated Lenalidomide IB and ICF

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
