

## Clinical trial results:

**A phase II, observer-blind, randomized study to evaluate the immunogenicity, safety and reactogenicity of GlaxoSmithKline (GSK) Biologicals' combined DSSITGDPa-HBV-IPV/Hib vaccine containing diphtheria toxoid from the Statens Serum Institute (SSI) of Denmark and tetanus toxoid from GSK Biologicals' Kft [GD], compared to the currently licensed GSK Biologicals' DTPa-HBV-IPV/Hib vaccine (Infanrix hexa) when administered to healthy infants at 2, 3 and 4 months of age.**

### Summary

EudraCT number	2006-000554-46
Trial protocol	FI
Global end of trial date	31 May 2007

### Results information

Result version number	v2 (current)
This version publication date	31 July 2016
First version publication date	03 June 2015
Version creation reason	• Correction of full data set Data (typos) were corrected.

### Trial information

#### Trial identification

Sponsor protocol code	106786
-----------------------	--------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00376779
WHO universal trial number (UTN)	-

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 August 2007
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 May 2007
Global end of trial reached?	Yes
Global end of trial date	31 May 2007
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To demonstrate that the immunogenicity of the DSSITGDPa-HBV-IPV/Hib vaccine (preservative-free formulation) in terms of antibody response to all vaccine antigens is non-inferior to that of the DTPa-HBV-IPV/Hib vaccine, one month after a three-dose primary vaccination course.

Protection of trial subjects:

Vaccines were administered by qualified and trained personnel. Vaccines were administered only to eligible subjects that had no contraindications to any components of the vaccines.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	12 October 2006
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Finland: 455
Worldwide total number of subjects	455
EEA total number of subjects	455

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	455
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

During the screening the following steps occurred: check for inclusion/exclusion criteria, contraindications/precautions, medical history of the subjects and signing informed consent forms.

### Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Preservative-Free Formulation Group

Arm description:

Subjects received the preservative-free (PF) formulation of DSSITGDPa-HBV-IPV/Hib.

Arm type	Experimental
Investigational medicinal product name	DSSITGDPa-HBV-IPV/Hib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine was administered intramuscularly into the anterolateral quadrant of the right thigh according to a 3-dose vaccination schedule at 2, 3 and 4 months of age.

<b>Arm title</b>	Preservative-Containing Formulation Group
------------------	---

Arm description:

Subjects received the preservative-containing (PC) formulation of DSSITGDPa-HBV-IPV/Hib.

Arm type	Experimental
Investigational medicinal product name	DSSITGDPa-HBV-IPV/Hib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine was administered intramuscularly into the anterolateral quadrant of the right thigh according to a 3-dose vaccination schedule at 2, 3 and 4 months of age.

<b>Arm title</b>	Infanrix-hexa Group
------------------	---------------------

Arm description:

Subjects received the licensed formulation of DTPa-HBV-IPV/Hib.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Infanrix hexa
Investigational medicinal product code	
Other name	DTPa-HBV-IPV/Hib
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

The vaccine was administered intramuscularly into the anterolateral quadrant of the right thigh according to a 3-dose vaccination schedule at 2, 3 and 4 months of age.

Number of subjects in period 1	Preservative-Free Formulation Group	Preservative-Containing Formulation Group	Infanrix-hexa Group
Started	153	150	152
Completed	151	148	152
Not completed	2	2	0
Consent withdrawn by subject	-	1	-
Adverse event, non-fatal	1	1	-
Migrated/moved from study area	1	-	-

## Baseline characteristics

### Reporting groups

Reporting group title	Preservative-Free Formulation Group
Reporting group description:	
Subjects received the preservative-free (PF) formulation of DSSITGDPa-HBV-IPV/Hib.	
Reporting group title	Preservative-Containing Formulation Group
Reporting group description:	
Subjects received the preservative-containing (PC) formulation of DSSITGDPa-HBV-IPV/Hib.	
Reporting group title	Infanrix-hexa Group
Reporting group description:	
Subjects received the licensed formulation of DTPa-HBV-IPV/Hib.	

Reporting group values	Preservative-Free Formulation Group	Preservative-Containing Formulation Group	Infanrix-hexa Group
Number of subjects	153	150	152
Age categorical Units: Subjects			
In utero Preterm newborn infants (gestational age < 37 wks) Newborns (0-27 days) Infants and toddlers (28 days-23 months) Children (2-11 years) Adolescents (12-17 years) Adults (18-64 years) From 65-84 years 85 years and over			
Age continuous Units: weeks			
arithmetic mean	9.9	10	10.1
standard deviation	± 1.51	± 1.45	± 1.35
Gender categorical Units: Subjects			
Female	68	75	64
Male	85	75	88

## End points

### End points reporting groups

Reporting group title	Preservative-Free Formulation Group
Reporting group description: Subjects received the preservative-free (PF) formulation of DSSITGDPa-HBV-IPV/Hib.	
Reporting group title	Preservative-Containing Formulation Group
Reporting group description: Subjects received the preservative-containing (PC) formulation of DSSITGDPa-HBV-IPV/Hib.	
Reporting group title	Infanrix-hexa Group
Reporting group description: Subjects received the licensed formulation of DTPa-HBV-IPV/Hib.	

### Primary: Number of subjects with anti-diphtheria (Anti-D) [by Vero-cell neutralization assay] antibody concentrations equal to or above ( $\geq$ ) 0.016 international units per milliliter (IU/mL)

End point title	Number of subjects with anti-diphtheria (Anti-D) [by Vero-cell neutralization assay] antibody concentrations equal to or above ( $\geq$ ) 0.016 international units per milliliter (IU/mL)
End point description:	
End point type	Primary
End point timeframe: One month after the third dose of vaccine (POST)	

End point values	Preservative-Free Formulation Group	Preservative-Containing Formulation Group	Infanrix-hexa Group	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	138	134	145	
Units: Subjects				
Anti-diphtheria, POST	135	133	145	

### Statistical analyses

Statistical analysis title	Immune response to anti-D antibodies (Vero-assay)
Statistical analysis description: To demonstrate that the immunogenicity of the GSK Biologicals' DSSITGDPa-HBV-IPV/Hib vaccine (preservative-free formulation) in terms of antibody response to anti-diphtheria antigens is non-inferior to that of the <i>Infanrix hexa</i> <sup>TM</sup> vaccine, one month after a three-dose primary vaccination course.	
Comparison groups	Preservative-Free Formulation Group v <i>Infanrix-hexa</i> Group

Number of subjects included in analysis	283
Analysis specification	Pre-specified
Analysis type	non-inferiority <sup>[1]</sup>
Parameter estimate	Difference in seroprotection rate
Point estimate	2.17
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.44
upper limit	6.2

Notes:

[1] - For diphtheria (Vero-cell neutralization assay): the upper limit of the standardized asymptotic 95% confidence interval (CI) on the group difference [Infanrix-hexa Group minus Preservative-Free Formulation Group] in the percentage of seroprotected subjects is  $\leq 10\%$ .

### **Primary: Number of subjects with anti-tetanus toxoids (Anti-TT) antibody concentrations $\geq 0.1$ IU/mL**

End point title	Number of subjects with anti-tetanus toxoids (Anti-TT) antibody concentrations $\geq 0.1$ IU/mL

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 November 2006	<p>Amendment 2</p> <p>GSK Biologicals is currently validating new providers of the diphtheria toxoid (Statens Serum Institute [SSI], Denmark) and of the tetanus toxoid (GSK Biologicals Korlatolt Felelossegu Tarsasag [Kft] in Gödöllő [GD], Hungary) for inclusion in DTPa based vaccines. The purpose of this study is to demonstrate that the immunogenicity of the hexavalent DSSITGDPa-HBV-IPV/Hib vaccine containing diphtheria toxoid provided by the Statens Serum Institute of Denmark (DSSI) and tetanus toxoid provided by GSK Biologicals Kft in Gödöllő (TGD) is non-inferior to the immunogenicity of the currently licensed formulation of the vaccine. The vaccine will be administered as a primary vaccination course to healthy infants at 2, 3 and 4 months of age and its safety and reactogenicity will also be assessed. Two formulations of the DSSITGDPa-HBV-IPV/Hib vaccine will be evaluated: one in which the vaccine will be manufactured according to the new preservative-free process and the other in which the vaccine will be manufactured with preservative as the currently licensed formulation.</p>

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
