Notes:

**Paediatric regulatory details**

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 July 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	01 July 2021
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to compare disease-free survival (DFS) in patients with Human Epidermal Growth Factor Receptor 2 (HER2) overexpressing and/or amplified breast cancer randomized to trastuzumab for one year (Trastuzumab arm) versus lapatinib for one year (Lapatinib arm; this arm was discontinued prior to the primary analysis due to futility) versus weekly trastuzumab (12 or 18 weeks, according to assigned design) followed by a six-week washout period followed by lapatinib (28 or 34 weeks, according to assigned design; Trastuzumab followed by Lapatinib arm) versus trastuzumab in combination with lapatinib for one year (Lapatinib plus Trastuzumab arm).

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 May 2007
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 64
Country: Number of subjects enrolled	Australia: 181
Country: Number of subjects enrolled	Austria: 5
Country: Number of subjects enrolled	Belgium: 231
Country: Number of subjects enrolled	Brazil: 98
Country: Number of subjects enrolled	Bulgaria: 26
Country: Number of subjects enrolled	Canada: 42
Country: Number of subjects enrolled	Chile: 108
Country: Number of subjects enrolled	China: 441
Country: Number of subjects enrolled	Czechia: 116
Country: Number of subjects enrolled	Denmark: 187
Country: Number of subjects enrolled	Estonia: 4
Country: Number of subjects enrolled	France: 410
Country: Number of subjects enrolled	Germany: 1375
Country: Number of subjects enrolled	Greece: 56
Country: Number of subjects enrolled	Hong Kong: 56

Country: Number of subjects enrolled	Hungary: 134
Country: Number of subjects enrolled	India: 201
Country: Number of subjects enrolled	Ireland: 52
Country: Number of subjects enrolled	Israel: 47
Country: Number of subjects enrolled	Italy: 371
Country: Number of subjects enrolled	Japan: 142
Country: Number of subjects enrolled	Korea, Republic of: 353
Country: Number of subjects enrolled	Mexico: 31
Country: Number of subjects enrolled	Netherlands: 87
Country: Number of subjects enrolled	New Zealand: 41
Country: Number of subjects enrolled	Norway: 40
Country: Number of subjects enrolled	Pakistan: 204
Country: Number of subjects enrolled	Peru: 143
Country: Number of subjects enrolled	Philippines: 150
Country: Number of subjects enrolled	Poland: 176
Country: Number of subjects enrolled	Romania: 105
Country: Number of subjects enrolled	Russian Federation: 324
Country: Number of subjects enrolled	Singapore: 25
Country: Number of subjects enrolled	Slovakia: 53
Country: Number of subjects enrolled	Slovenia: 20
Country: Number of subjects enrolled	South Africa: 168
Country: Number of subjects enrolled	Spain: 267
Country: Number of subjects enrolled	Switzerland: 56
Country: Number of subjects enrolled	Taiwan: 374
Country: Number of subjects enrolled	Thailand: 172
Country: Number of subjects enrolled	Ukraine: 85
Country: Number of subjects enrolled	United Kingdom: 243
Country: Number of subjects enrolled	United States: 917
Worldwide total number of subjects	8381
EEA total number of subjects	3715

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	7526
From 65 to 84 years	855
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

This study was conducted in 969 centers in 44 countries worldwide.

### Pre-assignment

Screening details:

Based on the IDMC results from 18 August 2011, any patient enrolled onto Lapatinib arm were considered for a new treatment strategy based on discussion with their physician.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Lapatinib plus Trastuzumab

Arm description:

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: oral lapatinib (OL) 1000 milligrams (mg) daily with trastuzumab (tras) (8 milligrams per kilogram [mg/kg] intravenous [IV] loading dose [LD], followed by 6 mg/kg IV every 3 weeks [E3W]) for 52 weeks (wks). \* Design 2: OL 750 mg daily plus wkly tras (4 mg/kg LD, followed by 2 mg/kg IV) concomitantly (conc.) with wkly paclitaxel (pac) 80 mg per squared meter (mg/m<sup>2</sup>) IV or docetaxel (doc) 75 mg/m<sup>2</sup> IV E3W for 12 wks. After completion of pac or doc, par. received OL at an increased dose of 1000 mg daily in combination with tras (6 mg/kg without a LD) E3W for 40 wks. \* Design 2B: OL 750 mg plus wkly tras (4 mg/kg IV LD, followed by 2 mg/kg IV wkly) conc. with doc 75 mg/m<sup>2</sup> E3W and carboplatin (carb) AUC6 IV for 18 wks. After completion of doc and carb, par. received tras E3W (6 mg/kg without a LD) plus OL 1000 mg daily for 34 wks.

Arm type	Experimental
Investigational medicinal product name	Lapatinib plus Trastuzumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet, Injection
Routes of administration	Oral use, Intravenous use

Dosage and administration details:

Design 1: Oral lapatinib 1000 mg daily concurrent with trastuzumab 8 mg/kg IV loading dose followed by 6mg/kg IV every 3 weeks (52 weeks total).

Design 2: Trastuzumab (4mg/kg loading dose followed by 2mg/kg IV weekly) concurrent with oral lapatinib 750 mg daily and either paclitaxel 80mg/m<sup>2</sup> IV weekly for 12 weeks OR docetaxel 75mg/m<sup>2</sup> every 21 days for 4 cycles (12 weeks). After completion of chemotherapy, the dose of lapatinib will be increased to 1000mg daily concurrently with trastuzumab every 3 weeks (6mg/kg without loading dose) for an additional 40 weeks (52 weeks total).

Design 2B: Docetaxel 75mg/m<sup>2</sup> and carboplatin AUC 6 every 3 weeks for 6 cycles (18 weeks) administered concurrently with oral lapatinib 750mg plus weekly trastuzumab (4mg/kg IV loading dose followed by 2mg/kg IV). After the completion of chemotherapy, trastuzumab will be administered every 3 weeks (6mg/kg without loading dose) concurrent with lapatinib 1000mg daily for an additional 40 weeks (52 weeks total).

<b>Arm title</b>	Trastuzumab followed by Lapatinib
------------------	-----------------------------------

Arm description:

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: weekly tras for 12 weeks (4 mg/kg IV loading dose, followed by 2 mg/kg IV weekly), followed by a 6-week washout period, followed by oral lap 1500 mg daily for 34 weeks. \* Design 2: weekly tras (4 mg/kg IV loading dose, followed by 2 mg/kg IV) concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks for 12 weeks, followed by a 6-week washout period, followed by oral lap 1500 mg daily for 34 weeks. \* Design

2B: weekly tras (4 mg/kg IV loading dose, followed by 2 mg/kg IV weekly) concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV for 18 weeks, followed by a 6-week washout period, followed by oral lap 1500 mg daily for 28 weeks.

Arm type	Experimental
Investigational medicinal product name	Trastuzumab followed by Lapatinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet, Injection
Routes of administration	Oral use, Intravenous use

**Dosage and administration details:**

Design 1: Trastuzumab (4mg/kg IV loading dose followed by 2mg/kg IV weekly) for 12 weeks followed by a 6 week treatment-free interval followed by oral lapatinib 1500mg daily for 34 weeks (52 weeks total).

Design 2: Trastuzumab (4mg/kg IV loading dose followed by 2mg/kg IV weekly) for 12 weeks administered concomitantly and either paclitaxel 80mg/m<sup>2</sup> IV weekly for 12 weeks OR docetaxel 75mg/m<sup>2</sup> every 21 days for 4 cycles; followed by a 6 week treatment-free interval followed by oral lapatinib 1500mg daily for 34 weeks (52 weeks total).

Design 2B: Docetaxel 75mg/m<sup>2</sup> and carboplatin AUC 6 every 3 weeks for 6 cycles (18 weeks) administered concomitantly with trastuzumab (4mg/kg IV loading dose followed by 2mg/kg IV weekly) followed by a 6 week treatment-free interval followed by oral lapatinib 1500 mg daily for 28 weeks (52 weeks total).

<b>Arm title</b>	Lapatinib
------------------	-----------

**Arm description:**

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: oral lap 1500 mg daily for 52 weeks. \* Design 2: oral lap 750 mg daily concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks, for 12 weeks. After completion of paclitaxel or docetaxel, participants received oral lap at an increased dose of 1500 mg daily for 40 weeks. \* Design 2B: oral lap 750 mg daily concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV, for 18 weeks. After completion of docetaxel and carboplatin, oral lap was given at an increased dose of 1500 mg for 34 weeks.

Arm type	Experimental
Investigational medicinal product name	Lapatinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet, Injection
Routes of administration	Oral use, Intravenous use

**Dosage and administration details:**

Design 1: Lapatinib 1500mg oral daily for a total of 52 weeks.

Design 2: Either paclitaxel 80mg/m<sup>2</sup> IV weekly for 12 weeks OR docetaxel 75mg/m<sup>2</sup> IV every 3 weeks for 4 cycles administered concomitantly with oral lapatinib at 750mg daily. After completion of chemotherapy, oral lapatinib administered at 1500mg daily for an additional 40 weeks (52 weeks total).

Design 2B: Docetaxel 75mg/m<sup>2</sup> and carboplatin AUC 6 every 3 weeks for 6 cycles (18 weeks) administered concomitantly with oral lapatinib at 750mg daily. After completion of chemotherapy, the dose of lapatinib will be increased to 1500mg oral daily for an additional 40 weeks (52 weeks total).

<b>Arm title</b>	Trastuzumab
------------------	-------------

**Arm description:**

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: tras 8 mg/kg IV LD, followed by 6 mg/kg IV every 3 weeks for 52 weeks. \* Design 2: weekly tras (4 mg/kg IV LD, followed by 2 mg/kg IV weekly) concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks, for 12 weeks. After completion of paclitaxel or docetaxel, participants received tras (6 mg/kg without a LD every 3 weeks for 40 weeks. \* Design 2B: weekly tras (4 mg/kg IV LD, followed by 2 mg/kg IV weekly) concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV, for 18 weeks. After completion of docetaxel and carboplatin, participants received tras every 3 weeks (6 mg/kg without a LD) for 34 weeks.

Arm type	Active comparator

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: weekly tras for 12 weeks (4 mg/kg IV loading dose, followed by 2 mg/kg IV weekly), followed by a 6-week washout period, followed by oral lap 1500 mg daily for 34 weeks. \* Design 2: weekly tras (4 mg/kg IV loading dose, followed by 2 mg/kg IV) concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks for 12 weeks, followed by a 6-week washout period, followed by oral lap 1500 mg daily for 34 weeks. \* Design 2B: weekly tras (4 mg/kg IV loading dose, followed by 2 mg/kg IV weekly) concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV for 18 weeks, followed by a 6-week washout period, followed by oral lap 1500 mg daily for 28 weeks.

Reporting group title	Lapatinib
-----------------------	-----------

#### Reporting group description:

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: oral lap 1500 mg daily for 52 weeks. \* Design 2: oral lap 750 mg daily concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks, for 12 weeks. After completion of paclitaxel or docetaxel, participants received oral lap at an increased dose of 1500 mg daily for 40 weeks. \* Design 2B: oral lap 750 mg daily concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV, for 18 weeks. After completion of docetaxel and carboplatin, oral lap was given at an increased dose of 1500 mg for 34 weeks.

Reporting group title	Trastuzumab
-----------------------	-------------

#### Reporting group description:

Participants received treatment per one of three designs and adjuvant radiotherapy / adjuvant anti-estrogen therapy when clinically indicated. \* Design 1: tras 8 mg/kg IV LD, followed by 6 mg/kg IV every 3 weeks for 52 weeks. \* Design 2: weekly tras (4 mg/kg IV LD, followed by 2 mg/kg IV weekly) concomitantly with weekly paclitaxel 80 mg/m<sup>2</sup> IV or docetaxel 75 mg/m<sup>2</sup> IV every 3 weeks, for 12 weeks. After completion of paclitaxel or docetaxel, participants received tras (6 mg/kg without a LD) every 3 weeks for 40 weeks. \* Design 2B: weekly tras (4 mg/kg IV LD, followed by 2 mg/kg IV weekly) concomitantly with docetaxel 75 mg/m<sup>2</sup> every 3 weeks and carboplatin AUC6 IV, for 18 weeks. After completion of docetaxel and carboplatin, participants received tras every 3 weeks (6 mg/kg without a LD) for 34 weeks.

### Primary: Disease-Free Survival (DFS) at the Primary Analysis

End point title	Disease-Free Survival (DFS) at the Primary Analysis
-----------------	---

#### End point description:

Disease-Free Survival (DFS) was defined as the interval between randomization and the date of first occurrence of disease recurrence (local, regional or distant), a contralateral invasive breast cancer, a second primary cancer or death without recurrence. Only deaths occurring in participants whose clinical follow-up was ongoing at the time of death and who had no recurrence, contralateral breast cancer (CBC) or second primary malignancy (SPM) reported prior to death were considered as death without recurrence. DFS was estimated using the Kaplan Meier method. The percentile data values presented here indicate the percentage (95, 90, 85, 80 and 75 percent) of participants who had disease free survival for the indicated years.

End point type	Primary
End point timeframe:	
From randomization until the date of the first occurrence of disease recurrence, a contralateral invasive breast cancer, a second primary cancer, or death from any cause (median follow-up of 4.5 years)	

End point values	Lapatinib plus Trastuzumab	Trastuzumab followed by Lapatinib	Lapatinib	Trastuzumab

### Secondary: Cumulative incidence of brain metastases

End point title	Cumulative incidence of brain metastases
-----------------	--

End point description:

The cumulative incidence of brain metastases as the first site of breast cancer recurrence among treatment arms was assessed using a hierarchy of primary type and location of first DFS event in cases where more than one event was identified simultaneously. Because diagnostic procedures for different types of recurrence could not be performed on exactly the same day, any diagnoses noted within a two month (60 day) period of the first reported event was considered as identified simultaneously for purposes of defining the type of the first event and the date of event was be regarded as the earliest of the relevant events.

End point type	Secondary
----------------	-----------

End point timeframe:

From randomization until the date of the first occurrence of a disease recurrence, assessed up to approximately 10 years

## Adverse events

---

### Adverse events information

---

Timeframe for reporting adverse events:

Adverse events were collected from First Patient First Treatment (FPFT) up to 30 days after study drug discontinuation, for a maximum duration of 56 weeks.

---

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 April 2008	Amendment No. 01: Implementation of additional monitoring of liver enzymes and associated criteria for study drug discontinuation, modification of the study inclusion/ exclusion criteria, provide clarification to the length of follow up, and permitted chemotherapy regimens. To provide clarification regarding the dosing of study therapy and the management of AEs.
14 August 2008	Amendment No. 02: Implementation of a lower starting dose of lapatinib (750 mg) during chemotherapy only in the Lap+Tras arm of Design 2 to diminish the chance of diarrhea occurrence. To allow patients randomized in the Tras-Lap arm of both designs to receive lapatinib after the occurrence of a secondary cardiac endpoint during trastuzumab administration only if LVEF after the washout period (6 weeks) and prior to lapatinib administration is $\geq 50\%$ . To clarify the extent and nature of future translational research studies and provide revised timelines for circulating tumor cell collection.
12 February 2009	Amendment No. 03: Inclusion of statement indicating the possible accrual imbalance between Design 1 and Design 2 and possible future need to close screening to a design.
19 March 2009	Amendment No. 04: To allow the inclusion of docetaxel in Design 2, implement an additional interim analysis for analyses at 400, 700 and 1000 DFS events with final analysis after 1388 DFS events, and allow the use of Breast MRI scans instead of mammograms.
20 November 2009	Amendment No. 05: Inclusion of Design 2B and associated updates to enrollment (maximum sample size of 8400 patients) and revised timelines for circulating tumor cell collection.
27 January 2010	Amendment No. 06: Reduction of lapatinib dose when used concurrently with chemotherapy in the Lap arm and the Lap+Tras arm of Designs 2 and 2B to diminish the chance of diarrhea occurrence.
29 March 2010	Amendment No. 07: To clarify statistical plans for interim and final analyses, include the collection of a FFPE tumor block for future research, to update additional medicines added to the prohibited medications list for patients taking lapatinib.
02 August 2010	Amendment No. 08: To add a new statistical section entitled "Registration Strategy for ALTTO – June 2010", and thus support the modification of the analysis plan by the sponsor at the time (GSK). Inclusion of a statement clarifying that after completion of study treatment, patients enrolled in this study may receive anti-cancer therapy in other trials only if the trial has been approved by the Steering Committee. Clarification regarding the reporting of post-study treatment long-term AEs, Grade 4 neutropenia/leukopenia as an SAE, diarrhea management in lapatinib-containing arms, and the dose adjustments of trastuzumab and chemotherapy due to substantial weight changes and overweight/obese patients. Inclusion of the collection of a FNA sample will be allowed for certain patients.
28 October 2010	Amendment No. 09: Add NCI/CTEP recommendation for the calculation of the carboplatin dose and to add the maximum dose of carboplatin based on the target area under the curve (AUC) 6 is 900 mg.

17 October 2011	Amendment No. 10: To implement the recommendations by the ALTTO Steering Committee due to the IDMC meeting (August 18, 2011). Guidance for patient withdrawal from the study while allowing for collection of OS information, patients who were considered lost to follow-up, regarding prohibited medications and future trial medications. Clarification of diarrhea management, assessments beyond study treatment completion to determine secondary cardiac event, lobular carcinoma in situ and ductal carcinoma in situ reporting.
18 March 2016	Amendment No. 11: To update the assessment schedule, specify that after the patient completed the 10-year follow-up post randomization, only drug-related SAEs were to be reported, add the definition of EOS for clarity purposes, add details regarding explorative subgroup analyses of DFS for specific risk factors, allow broader use of the previously collected pharmacogenetic samples and the previously generated genetic data, and to implement changes in secondary endpoints.
05 July 2016	Amendment No. 12: To delete or replace references to GSK or its staff with that of Novartis and its authorized agents to align with the change of sponsorship, and to make administrative changes to align with study-specific processes and procedures. As the burden on patients was reduced by decreasing the number of procedures that required a physical visit to the site, the optional collection of samples at the time of relapse was also deleted.

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results. Please use <https://www.novctrd.com> for complete trial results.
