Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 March 2009
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	31 October 2008
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of this study was to assess the efficacy and safety of Vivaglobin in PUPs with PID common variable immunodeficiency (CVID) or X-linked agammaglobulinemia (XLA), who were free of serious bacterial infections (SBIs) at initiation of therapy.

The primary efficacy objective of this open-label study was to assess whether subcutaneous immunoglobulin (SCIG) treatment with a loading dose of Vivaglobin of 100 mg/kg bw for 5 consecutive days resulted in an immunoglobulin G (IgG) increase to ≥ 5 g/L as measured on Day 12 after initiation of SCIG therapy.

Protection of trial subjects:

This study was carried out in accordance with the International Conference on Harmonisation (ICH) Good Clinical Practice guidelines, and standard operating procedures for clinical research and development at CSL Behring (CSLB). The study protocol and all amendments were approved by the Independent Ethics Committee(s) (IECs) / Institutional Review Board(s) (IRBs) of the participating centers. Before undergoing screening procedures for possible enrollment into the study, subjects were informed, in an understandable form, about the nature, scope, and possible consequences of the study. The investigator was responsible for obtaining a subject's written informed consent to participate in the study.

The investigator may cease study treatment and withdraw the subject, or the subject may withdraw himself from participation in the study at any time. If a subject is withdrawn from the study or further participation is declined, the subject will continue to have access to medical care and will be treated according to routine medical practice, but will no longer receive the investigational medicinal product (IMP).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 March 2007
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 2
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Italy: 4
Country: Number of subjects enrolled	Canada: 6
Worldwide total number of subjects	18
EEA total number of subjects	12

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	6
Adolescents (12-17 years)	2
Adults (18-64 years)	8
From 65 to 84 years	2
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

6 sites in Canada, Germany, Italy, and Spain included a total of 18 patients screened and enrolled for this study.

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Vivaglobin
-----------	------------

Arm description:

Vivaglobin: 16% (160 mg/mL) liquid formulation of human IgG for subcutaneous (SC) use. Loading dose: 100 mg/kg for 5 consecutive days; maintenance dose: 100 mg/kg 1 to 2 times a week for 24 weeks.

Arm type	Experimental
Investigational medicinal product name	Human normal immunoglobulin G (IgG) for subcutaneous (SC) use
Investigational medicinal product code	CE1200
Other name	Vivaglobin®
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Dosage form: Glycine-buffered pasteurized liquid containing 16% IgG for SC infusion

Number of subjects in period 1	Vivaglobin
Started	18
Completed	17
Not completed	1
Consent withdrawn by subject	1

Rash			
subjects affected / exposed	1 / 18 (5.56%)		
occurrences (all)	1		
Rosacea			
subjects affected / exposed	1 / 18 (5.56%)		
occurrences (all)	1		

Skin swelling subjects affected / exposed occurrences (all)	1 / 18 (5.56%) 1		
Renal and urinary disorders Renal failure acute subjects affected / exposed occurrences (all) Renal pain subjects affected / exposed occurrences (all)	1 / 18 (5.56%) 1 1 / 18 (5.56%) 1		
Musculoskeletal and connective tissue disorders Arthralgia subjects affected / exposed occurrences (all) Pain in extremity subjects affected / exposed occurrences (all)	2 / 18 (11.11%) 2 1 / 18 (5.56%) 2		
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all) Upper respiratory tract infection subjects affected / exposed occurrences (all) Candidiasis subjects affected / exposed occurrences (all) Ear infection subjects affected / exposed occurrences (all) Gastroenteritis subjects affected / exposed occurrences (all) Otitis media subjects affected / exposed occurrences (all)	2 / 18 (11.11%) 5 3 / 18 (16.67%) 4 1 / 18 (5.56%) 1 1 / 18 (5.56%) 2 1 / 18 (5.56%) 3 1 / 18 (5.56%) 1		

Respiratory tract infection subjects affected / exposed occurrences (all)	1 / 18 (5.56%) 2		
Sinusitis subjects affected / exposed occurrences (all)	1 / 18 (5.56%) 1		
Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	1 / 18 (5.56%) 1		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
23 January 2008	This amendment specified the sample size in more detail, defined further secondary efficacy endpoints, specified the per protocol efficacy data set in more detail, and updated the number of study sites and location. Further editorial changes to reflect recent change in sponsor name and staff, reporting of SAEs and shipment of samples were incorporated.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
