Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No	No

1901/2006 apply to this trial?	
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 July 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	27 February 2008
Global end of trial reached?	Yes
Global end of trial date	02 November 2010
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Dose Escalation Part:

To evaluate the safety and tolerability of 28 days of daily dosing of two dose cohorts of nebulized Arikace™, liposomal amikacin for inhalation.

Extension Part:

To evaluate the longer-term safety, tolerability and efficacy of 560 mg once daily (QD) dose of Arikace™ administered for 6 cycles over 18 months. Each cycle comprised 28 days on treatment followed by 56 days off treatment.

Protection of trial subjects:

This study was performed in compliance with Good Clinical Practice (GCP), including the archiving of essential documents, the International Council for Harmonisation (ICH) Guidelines, and is consistent with the ethical principles of the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 February 2007
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 18
Country: Number of subjects enrolled	Slovakia: 12
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Hungary: 23
Country: Number of subjects enrolled	Macedonia, the former Yugoslav Republic of: 25
Country: Number of subjects enrolled	Serbia: 18
Country: Number of subjects enrolled	Ukraine: 24
Worldwide total number of subjects	124
EEA total number of subjects	57

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	27
Adolescents (12-17 years)	46
Adults (18-64 years)	51
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Subjects were recruited at 15 study centres for the Dose Escalation Part of the study, and at 11 study centres for the Extension Part.

Pre-assignment

Screening details:

The 2 cohorts involved in the Dose Escalation Part of the study were randomised to receive Arikace™ or a placebo at a 2:1 ratio. All subjects who progressed into the Extension Part of the study received Arikace™.

Period 1

Period 1 title	TR02-105 (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Dose Escalation Part - Cohort 1 - 280 mg Arikace™

Arm description:

Subjects in this cohort received 280 mg of Arikace™.

Arm type	Experimental
Investigational medicinal product name	Arikace™
Investigational medicinal product code	
Other name	Liposomal amikacin for inhalation
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

Subjects received a once daily dose of Arikace™ 280 mg for 28 days in Cohort 1. Subjects received a once daily dose of Arikace™ 560 mg for 28 days in Cohort 2. Arikace™ was administered via a PARI eFlow nebulizer over approximately 20 minutes.

Arm title	Dose Escalation Part - Cohort 1 - Placebo
------------------	---

Arm description:

Subjects in this arm of Cohort 1 received matching placebo.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

Subjects received a once daily dose of the placebo for 28 days in Cohort 1. Subjects received a once daily dose of the placebo for 28 days in Cohort 2. The placebo was administered via a PARI eFlow nebulizer over approximately 20 minutes.

Arm title	Dose Escalation Part - Cohort 2 - 560 mg Arikace™
------------------	---

Arm description:

Subjects in this cohort received 560 mg of Arikace™.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Arikace™
Investigational medicinal product code	
Other name	Liposomal amikacin for inhalation
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

Subjects received a once daily dose of Arikace™ 280 mg for 28 days in Cohort 1. Subjects received a once daily dose of Arikace™ 560 mg for 28 days in Cohort 2. Arikace™ was administered via a PARI eFlow nebulizer over approximately 20 minutes.

Arm title	Dose Escalation Part - Cohort 2 - Placebo
------------------	---

Arm description:

Subjects in this arm of Cohort 2 received matching placebo.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

Subjects received a once daily dose of the placebo for 28 days in Cohort 1. Subjects received a once daily dose of the placebo for 28 days in Cohort 2. The placebo was administered via a PARI eFlow nebulizer over approximately 20 minutes.

Arm title	Extension Part
------------------	----------------

Arm description:

Subjects in the Extension Part received 560 mg of Arikace™.

Arm type	Experimental
Investigational medicinal product name	Arikace™
Investigational medicinal product code	
Other name	Liposomal amikacin inhalation
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

All subjects received a dose of 560 mg of Arikace™ once daily for 28 days. Arikace™ was administered via a PARI eFlow nebulizer over approximately 10 minutes.

Number of subjects in period 1^[1]	Dose Escalation Part - Cohort 1 - 280 mg Arikace™	Dose Escalation Part - Cohort 1 - Placebo	Dose Escalation Part - Cohort 2 - 560 mg Arikace™
Started	21	11	23
Completed	20	10	21
Not completed	1	1	2
Consent withdrawn by subject	1	-	-
Adverse event, non-fatal	-	1	-
Pregnancy	-	-	-
Completed study but not 24 of 28 days	-	-	-
Case Report Form (CRF) not completed	-	-	2
Lack of efficacy	-	-	-

Number of subjects in period 1[1]	Dose Escalation Part - Cohort 2 - Placebo	Extension Part
Started	11	49
Completed	10	41
Not completed	1	8
Consent withdrawn by subject	-	3
Adverse event, non-fatal	1	1
Pregnancy	-	1
Completed study but not 24 of 28 days	-	2
Case Report Form (CRF) not completed	-	-
Lack of efficacy	-	1

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Eligible subjects in the Dose Escalation Part of the study moved onto the Extension Part of the study.

End point title	Dose Escalation Part: CFQ-R Respiratory Scale (Absolute Change From Baseline) ^[16]
-----------------	---

End point description:

Quality of Life was measured by the absolute change from baseline in the Cystic Fibrosis Questionnaire-Revised (CFQ-R) respiratory scale. Disease specific instrument designed to measure impact on overall health, daily life, perceived well-being and symptoms in subjects with a diagnosis of cystic fibrosis. Scores range from 0 to 100, with higher scores indicating better health. Scores for each Health Related Quality of Life (HRQoL) domain; after recoding, each item is summed to generate a domain score and

standardized.

The analysis population is the modified intent-to-treat (mITT) population, defined as all randomised subjects who received at least one dose of study drug.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
18 April 2007	Summary of key changes: <ul style="list-style-type: none">- Fax number was corrected- Updated the number of subjects planned for enrollment- Added clarification to the inclusion and exclusion criteria- Updated pharmacokinetic (PK) collection schedule- Updated vital sign and oxygen saturation measurement timing details- Updated blood, urine and sputum collection timings- Updated serious adverse event relatedness criteria
08 May 2007	Summary of key changes: <ul style="list-style-type: none">- Updated the PK collection schedule- Updated the Schedule of In-Clinic Evaluations
27 September 2007	Summary of key changes: <ul style="list-style-type: none">- Updated the exclusion criteria- Added clarification to the Post-Dose Pulmonary Function Testing schedule- Removed Post-Dose Sputum collection 4 hours post-dose- Added Data and Safety Monitoring Board (DSMB) meeting
16 June 2008	Summary of key changes: <ul style="list-style-type: none">- Added information regarding the total number of treatment cycles- Added a Secondary Objective- Added treatment supplier details
05 August 2008	Summary of key changes: <ul style="list-style-type: none">- The treatment follow-up period was extended- Study duration was increased
27 October 2008	Summary of key changes: <ul style="list-style-type: none">- New text added regarding secondary endpoints- Added new text regarding the Extension Part- Main criteria for inclusion and exclusion was updated- Drug administration table added

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
