General information about the trial

Main objective of the trial:

Phase 1

To determine the maximum tolerated dose (MTD) and recommended phase II dose level (RDL) of Bortezomib administered once weekly, and of Lenalidomide administered for 3 weeks when combined with Dexamethasone in a 28-days schedule.

Phase 2

To investigate the efficacy of a maximum of 8 cycles of Bortezomib plus Lenalidomide with Dexamethasone at the RDL, as determined by the (s)CR+VGPR rate
