

Clinical trial results: Sorafenib Long Term Extension Program (STEP) Summary

EudraCT number	2007-002604-17
Trial protocol	FR DE ES IT PL GB BE BG
Global end of trial date	24 September 2021

Results information

Result version number	v1
This version publication date	30 March 2022
First version publication date	30 March 2022

Trial information

Trial identification

Sponsor protocol code	BAY43-9006/12311
-----------------------	------------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00625378
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Bayer AG
Sponsor organisation address	Kaiser-Wilhelm-Allee, Leverkusen, Germany, D-51368
Public contact	Therapeutic Area Head, Bayer AG, clinical-trials-contact@bayer.com
Scientific contact	Therapeutic Area Head, Bayer AG, clinical-trials-contact@bayer.com

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 September 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	24 September 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary purpose of the program was to enable patients, currently receiving sorafenib (Nexavar) in a Bayer/Onyx sponsored clinical trial, to continue sorafenib treatment after their respective study had met its primary endpoint and/or had reached the end as defined in the original protocol. An additional objective was the assessment of the safety of Nexavar or Nexavar combination treatment.

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with ethical principles that have their origin in the Declaration of Helsinki and the International Council for Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent was read by and explained to all the subjects/ /legal representatives. Participating subjects/ /legal representatives signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	21 December 2007
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	26 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 1
Country: Number of subjects enrolled	Belgium: 2
Country: Number of subjects enrolled	Bulgaria: 2
Country: Number of subjects enrolled	Brazil: 1
Country: Number of subjects enrolled	Canada: 11
Country: Number of subjects enrolled	China: 10
Country: Number of subjects enrolled	Colombia: 1
Country: Number of subjects enrolled	Germany: 10
Country: Number of subjects enrolled	Spain: 10
Country: Number of subjects enrolled	France: 1
Country: Number of subjects enrolled	United Kingdom: 18
Country: Number of subjects enrolled	Hong Kong: 2
Country: Number of subjects enrolled	Italy: 31

Country: Number of subjects enrolled	Korea, Republic of: 8
Country: Number of subjects enrolled	New Zealand: 1
Country: Number of subjects enrolled	Poland: 70
Country: Number of subjects enrolled	Taiwan: 17
Country: Number of subjects enrolled	Ukraine: 1
Country: Number of subjects enrolled	United States: 7
Worldwide total number of subjects	204
EEA total number of subjects	126

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	109
From 65 to 84 years	93
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

The study was conducted at multiple centers in 19 countries between 21-Dec-2007 (first subject first visit) and 24-Sep-2021 (last subject last visit).

Pre-assignment

Screening details:

Overall, 206 subjects were transferred from the feeder studies and have signed informed consent for STEP. Of these 206 subjects, 2 subjects were never treated and 204 subjects received the study treatment.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Sorafenib monotherapy

Arm description:

Subjects received single-agent sorafenib at the same dose and schedule as in their original Clinical Trial.

Arm type	Experimental
Investigational medicinal product name	Sorafenib
Investigational medicinal product code	
Other name	Nexavar
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

At the same dose and schedule as in the subjects' original Clinical Trial

Arm title	Sorafenib+Erlotinib
------------------	---------------------

Arm description:

Subjects received sorafenib and erlotinib combination at the same dose and schedule as in their original Clinical Trial.

Arm type	Experimental
Investigational medicinal product name	Sorafenib
Investigational medicinal product code	
Other name	Nexavar
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

At the same dose and schedule as in the subjects' original Clinical Trial

Investigational medicinal product name	Erlotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

At the same dose and schedule as in the subjects' original Clinical Trial

Number of subjects in period 1	Sorafenib monotherapy	Sorafenib+Erlotinib
Started	203	1
Completed	0	0
Not completed	203	1
Disease progression, recurrence or relapse	88	-
Non-compliant with study medication	3	-
Adverse event	22	-
Sponsor decision	1	-
Missing	2	-
Multiple toxicities	1	-
New cancer	1	-
PTA program	2	-
Consent withdrawn by subject	16	-
Investigator's decision	1	-
Sponsor's decision to stop the trial	1	-
End of treatment not available	2	-
Death	38	-
Switch to commercial drug	6	1
Medical decision	1	-
Lost to follow-up	17	-
Recurrent rise in amylase and lipase	1	-

Baseline characteristics

Reporting groups

Reporting group title	Sorafenib monotherapy
Reporting group description:	
Subjects received single-agent sorafenib at the same dose and schedule as in their original Clinical Trial.	
Reporting group title	Sorafenib+Erlotinib
Reporting group description:	
Subjects received sorafenib and erlotinib combination at the same dose and schedule as in their original Clinical Trial.	

Reporting group values	Sorafenib monotherapy	Sorafenib+Erlotinib	Total
Number of subjects	203	1	204
Age Categorical			
Units: Subjects			

Age Continuous			
"99999" denotes that value was not calculated due to the only 1 subject in the group.			
Units: years			
arithmetic mean	63.5	20.0	
standard deviation	± 9.6	± 99999	-
Gender Categorical			
Units: Subjects			
Female	63	0	63
Male	140	1	141
Race			
Units: Subjects			
Asian	39	1	40
Hispanic	2	0	2
Japanese/American	1	0	1
White	161	0	161
ECOG performance status			
Eastern cooperative oncology group (ECOG) performance status: 0 = Fully active, able to carry on all pre-disease performance without restriction; 1 = Restricted in physically strenuous activity but ambulatory and able to carry out work of a light or sedentary nature, e.g. light house work, office work; 2 = Ambulatory and capable of all self-care but unable to carry out any work activities, up and about more than 50% of waking hours			
Units: Subjects			
ECOG 0	25	1	26
ECOG 1	16	0	16
ECOG 2	1	0	1
Missing	161	0	161

End points

End points reporting groups

Reporting group title	Sorafenib monotherapy
Reporting group description: Subjects received single-agent sorafenib at the same dose and schedule as in their original Clinical Trial.	
Reporting group title	Sorafenib+Erlotinib
Reporting group description: Subjects received sorafenib and erlotinib combination at the same dose and schedule as in their original Clinical Trial.	
Subject analysis set title	Safety analysis set (SAF)
Subject analysis set type	Safety analysis
Subject analysis set description: SAF included all subjects who received at least one dose of study medication.	

Primary: Sorafenib treatment duration within STEP

End point title	Sorafenib treatment duration within STEP ^[1]
End point description: Treatment duration was calculated in days as the date of the last dose of any study treatment minus date of the first dose of any study treatment.	
End point type	Primary
End point timeframe: From the date of the first sorafenib dose until the date of the last sorafenib dose, with a mean duration of 25 months	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Due to the nature of this trial, only descriptive statistics were performed. Neither confirmatory nor exploratory inferential statistical analyses were pre-specified.

End point values	Sorafenib monotherapy	Sorafenib+Erlo tinib		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	203 ^[2]	1 ^[3]		
Units: Days				
median (inter-quartile range (Q1-Q3))	477.00 (195.00 to 1009.00)	1220.00 (1220.00 to 1220.00)

Statistical analyses

No statistical analyses for this end point

Primary: Number of subjects with new treatment-emergent adverse events (TEAEs)

End point title	Number of subjects with new treatment-emergent adverse events (TEAEs) ^[4]
-----------------	--

End point description:

An adverse event (AE) was any untoward medical occurrence in a subject or clinical investigation subject administered with a pharmaceutical product. The adverse event did not necessarily have to have a causal relationship with this treatment. A serious adverse event (SAE) was any untoward medical occurrence that at any dose: resulted in death; was life-threatening; required in-patient hospitalization or prolongation of existing hospitalization; resulted in persistent or significant disability or incapacity;

was a congenital anomaly or birth defect; was an important medical event. A new treatment-emergent adverse event (TEAE) was any AE that had a start date on or after ICF date in STEP and up to 30 days after the last sorafenib dose. A drug-related new TEAE was any new TEAE that had a causal relationship with the study treatment as assessed by the investigator. disc. = discontinuation

End point type	Primary
----------------	---------

End point timeframe:

From signing the ICF in STEP until 30 days after the last sorafenib dose, with a mean duration of 26 months

Notes:

[4] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Due to the nature of this trial, only descriptive statistics were performed. Neither confirmatory nor exploratory inferential statistical analyses were pre-specified.

End point values	Sorafenib monotherapy	Sorafenib+Erlofinib

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From signing the ICF in STEP until 30 days after the last sorafenib dose, with a mean duration of 26 months

Adverse event reporting additional description:

Adverse event reporting for the numbers of deaths (all causes) considers all deaths that occurred at any time during the study until the end of the follow up (with a mean duration of 26 months); deaths resulting from adverse events considers both adverse events with CTCAE grade 5 and/or adverse events with outcome 'Fatal'.

Assessment type	Non-systematic
-----------------	----------------

Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	24.1
--------------------	------

Reporting groups

Reporting group title	Sorafenib+Erlotinib
-----------------------	---------------------

Reporting group description:

Subjects received sorafenib and erlotinib combination at the same dose and schedule as in their original Clinical Trial.

Reporting group title	Sorafenib monotherapy
-----------------------	-----------------------

Reporting group description:

Subjects received single-agent sorafenib at the same dose and schedule as in their original Clinical Trial.

Serious adverse events	Sorafenib+Erlotinib	Sorafenib monotherapy	
Total subjects affected by serious adverse events			
subjects affected / exposed	1 / 1 (100.00%)	114 / 203 (56.16%)	
number of deaths (all causes)	0	62	
number of deaths resulting from adverse events	0	39	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Bone cancer metastatic			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Breast cancer			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Chronic myeloid leukaemia			

subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Clear cell renal cell carcinoma			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Haemangioma			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hepatocellular carcinoma			
subjects affected / exposed	0 / 1 (0.00%)	4 / 203 (1.97%)	
occurrences causally related to treatment / all	0 / 0	0 / 4	
deaths causally related to treatment / all	0 / 0	0 / 0	
Liver carcinoma ruptured			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Malignant neoplasm of ampulla of Vater			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metastases to bone			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Neoplasm recurrence			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Neuroendocrine tumour of the lung metastatic			

subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Prostate cancer			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Renal neoplasm			
subjects affected / exposed	0 / 1 (0.00%)	1 / 203 (0.49%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Squamous cell carcinoma of skin			
subjects affected / exposed	0 / 1 (0.00%)	2 / 203 (0.99%)

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 March 2011	Global amendment 02 forming integrated protocol Version 3.0 introduced the following changes: An inclusion criterion was added to allow subjects who received combination treatment with sorafenib (Nexavar) and TACE (transarterial chemoembolization) in their originating study to be eligible for this extension study. The exclusion criterion regarding concurrent anti-cancer chemotherapy was, therefore, modified to clarify that the exclusion did not apply to subjects being treated with sorafenib in combination with TACE.
30 March 2012	Global amendment 03 forming integrated protocol Version 4.0 introduced the following changes: 1. Inclusion of an Evaluation of Overall Survival. 2. Inclusion of safety as a stated objective with the main objective of this program remained unchanged.
25 March 2014	Global amendment 04 forming integrated protocol Version 5.0 introduced the following changes: 1. Removal of all references to erlotinib. 2. Removal of references to placebo in association with sorafenib administration. 3. Addition of TACE to the permissible anticancer chemotherapies and addition of guidance on Sorafenib dose modification in combination with TACE. 4. Clarification of which CTC version was used for the grading of liver function abnormalities.
15 May 2018	Global amendment 07 forming integrated protocol Version 6.0 introduced the following changes: 1. Overall survival (OS) evaluation removed from the study objectives. 2. Safety visits were modified. 3. Laboratory evaluations were modified. 4. Follow-up period was changed.
26 May 2020	Global amendment 08 forming integrated protocol Version 7.0 introduced the following changes: 1. Added Post-Trial Access Program. 2. Removal of the instructions for dose modifications for the combination of sorafenib with capecitabine and TACE. 3. Added clarification for continuation on study drug. 4. Added clarification for ending the study. 5. Added clarification on last patient last visit date. 6. The timepoint of the performance of the analyses was corrected, last patient last visit was changed to "after the end of the study".

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

No primary endpoints were defined specifically for study STEP as the primary purpose of this study was to enable patients to continue sorafenib treatment. The 26-month long-term follow-up duration was the mean follow-up duration for the subjects.

Notes:
