

## Clinical trial results:

### A Multi-Center, Randomized, Double-Blind, Placebo-Controlled Parallel-Group Study of the Safety of Levocetirizine Dihydrochloride Oral Liquid Formulation in Children Aged 6 Months to 11 Months With Symptoms of Allergic Rhinitis or Chronic Urticaria

#### Summary

EudraCT number	2007-003458-28
Trial protocol	Outside EU/EEA
Global end of trial date	17 September 2008

#### Results information

Result version number	v1 (current)
This version publication date	30 June 2016
First version publication date	18 June 2015

#### Trial information

##### Trial identification

Sponsor protocol code	A00423
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00628108
WHO universal trial number (UTN)	-

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	20 October 2008
Is this the analysis of the primary completion data?	No

---

Global end of trial reached?	Yes
Global end of trial date	17 September 2008
Was the trial ended prematurely?	No

---

Notes:

---

**General information about the trial**

---

Main objective of the trial:

The primary objective was to evaluate the safety of levocetirizine dihydrochloride (LCTZ) in pediatric subjects aged from 6 to 11 months.

Protection of trial subjects:

Adequate information was provided to the subject's caregiver in both oral and written form and consent was obtained in writing prior to performance of any study specific procedure. The content and process of obtaining informed consent was in accordance with all applicable regulatory and IEC/IRB requirements.

Background therapy:

N/A

Evidence for comparator:

N/A

Actual start date of recruitment	20 March 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

---

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	United States: 69
Worldwide total number of subjects	69
EEA total number of subjects	0

---

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	69
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0

---

85 years and over	0
-------------------	---

## Subject disposition

### Recruitment

Recruitment details:

The A00423 study began enrollment in March 2008. The study concluded in September 2008 with 69 subjects enrolled.

### Pre-assignment

Screening details:

One subject was randomized to levocetirizine but received placebo; hence the number of subjects in both treatment groups in the Safety Population differs by 1 from the number of the subjects randomized (STARTED) to the respective treatment group.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Carer, Subject

Blinding implementation details:

N/A

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Placebo
------------------	---------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Oral drops
Routes of administration	Oral use

Dosage and administration details:

Placebo oral liquid once a day for two weeks.

<b>Arm title</b>	Levocetirizine
------------------	----------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Levocetirizine dihydrochloride
Investigational medicinal product code	LCTZ
Other name	Xyzal
Pharmaceutical forms	Oral drops
Routes of administration	Oral use

Dosage and administration details:

Levocetirizine dihydrochloride 1.25 mg (5 drops containing 5 mg/mL) dosed once a day for 2 weeks.

<b>Number of subjects in period 1</b>	Placebo	Levocetirizine
Started	23	46
Completed	22	43
Not completed	1	3
Consent withdrawn by subject	1	-
Adverse event, non-fatal	-	2
SAE, non-fatal + AE, non-serious non-fatal	-	1

## Baseline characteristics

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse Events were collected from Visit 1 (Day -2 to -28) over randomization and On-treatment Period up to the Follow-up Visit (Day 21±2).

Adverse event reporting additional description:

Adverse Events refer to the Safety Population including all subjects who were dispensed study medication at least once.

Assessment type	Non-systematic

Skin infection subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1	0 / 24 (0.00%) 0	
Metabolism and nutrition disorders Increased appetite subjects affected / exposed occurrences (all)	1 / 45 (2.22%) 1	0 / 24 (0.00%) 0	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 February 2008	A summary of the changes are as follows: <ul style="list-style-type: none"><li>- Efficacy and serum drug concentration were included to assess compliance/drug exposure.</li><li>- Risk factor information for SIDS and references were updated.</li><li>- Information was included on the Population PK modeling that was used to predict the appropriate dosing regimens for children less than 6 years of age.</li></ul>
28 March 2008	The primary purpose of this amendment was to revise the exclusion criteria to require the specified wash-out periods for subjects who were receiving exclusionary medication via breast milk during the course of the study.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

N/A
