

## Clinical trial results:

### A Multicenter, Open-Label Study of the Human Anti-TNF Monoclonal Antibody Adalimumab to Evaluate the Long Term Safety and Tolerability of Repeated Administration of Adalimumab in Subjects With Ulcerative Colitis

#### Summary

EudraCT number	2007-004157-28
Trial protocol	BE ES DE HU AT SK CZ FR IT NL PT SE
Global end of trial date	23 December 2016

#### Results information

Result version number	v1 (current)
This version publication date	07 December 2017
First version publication date	07 December 2017

#### Trial information

##### Trial identification

Sponsor protocol code	M10-223
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00573794
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	AbbVie Deutschland GmbH & Co. KG
Sponsor organisation address	AbbVie House, Vanwall Business Park, Vanwall Road, Maidenhead, Berkshire, United Kingdom, SL6-4UB
Public contact	Global Medical Services, AbbVie, 001 800-633-9110,
Scientific contact	Andreas Lazar, MD, AbbVie, andreas.lazar@abbvie.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 December 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	23 December 2016
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the long-term safety and maintenance of response of adalimumab in subjects with ulcerative colitis who participated in and successfully completed Study M06-826 (EudraCT number 2006-002781-20) or Study M06-827 (EudraCT number 2006-002782-40).

Protection of trial subjects:

Subject read and understood the information provided about the study and gave written permission.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	28 November 2007
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 2
Country: Number of subjects enrolled	Poland: 28
Country: Number of subjects enrolled	Slovakia: 58
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	Sweden: 3
Country: Number of subjects enrolled	Austria: 17
Country: Number of subjects enrolled	Belgium: 27
Country: Number of subjects enrolled	Czech Republic: 82
Country: Number of subjects enrolled	France: 14
Country: Number of subjects enrolled	Germany: 41
Country: Number of subjects enrolled	Hungary: 38
Country: Number of subjects enrolled	Italy: 9
Country: Number of subjects enrolled	Australia: 13
Country: Number of subjects enrolled	Canada: 78
Country: Number of subjects enrolled	New Zealand: 1
Country: Number of subjects enrolled	Switzerland: 9
Country: Number of subjects enrolled	United States: 166
Country: Number of subjects enrolled	Israel: 3
Worldwide total number of subjects	592
EEA total number of subjects	322

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	567
From 65 to 84 years	25
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

A total of 592 subjects were randomized and received at least 1 dose of study drug (safety population); 7 subjects enrolled at 3 noncompliant sites were excluded from the analyses (Intent-to-treat 1 [ITT-1] population; N=585).

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	Adalimumab 40 mg EOW/EW
-----------	-------------------------

Arm description:

Open-label adalimumab 40 mg every other week (EOW) or every week (EW). Participants who entered from an open-label cohort continued their previous dosing regimen of adalimumab EOW or EW; participants who entered from a double-blind cohort received adalimumab EOW.

Arm type	Experimental
Investigational medicinal product name	adalimumab
Investigational medicinal product code	
Other name	ABT-D2E7, HUMIRA
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

adalimumab prefilled syringes administered as subcutaneous injection EW or EOW

Number of subjects in period 1 <sup>[1]</sup>	Adalimumab 40 mg EOW/EW
Started	585
Completed	255
Not completed	330
Protocol violation	6
Not Specified	46
Adverse event	81
Withdrew consent	90
Lost to follow-up	13
Lack of efficacy	94

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: ITT-1 population: All subjects who received  $\geq 1$  dose of study drug excluding 7 subjects at noncompliant sites.

## Baseline characteristics

### Reporting groups

Reporting group title	Adalimumab 40 mg EOW/EW
-----------------------	-------------------------

Reporting group description:

Open-label adalimumab 40 mg every other week (EOW) or every week (EW). Participants who entered from an open-label cohort continued their previous dosing regimen of adalimumab EOW or EW; participants who entered from a double-blind cohort received adalimumab EOW.

Reporting group values	Adalimumab 40 mg EOW/EW	Total	
Number of subjects	585	585	
Age categorical			
Units: Subjects			
Age continuous			
ITT-1 population: All subjects who received $\geq 1$ dose of study drug excluding 7 subjects at noncompliant sites.			
Units: years			
arithmetic mean	41.6		
standard deviation	$\pm 12.85$	-	
Gender categorical			
ITT-1 population: All subjects who received $\geq 1$ dose of study drug excluding 7 subjects at noncompliant sites.			
Units: Subjects			
Female	214	214	
Male	371	371	

## End points

### End points reporting groups

Reporting group title	Adalimumab 40 mg EOW/EW
Reporting group description: Open-label adalimumab 40 mg every other week (EOW) or every week (EW). Participants who entered from an open-label cohort continued their previous dosing regimen of adalimumab EOW or EW; participants who entered from a double-blind cohort received adalimumab EOW.	

### Primary: Partial Mayo Score: Change From Baseline Over Time

End point title	Partial Mayo Score: Change From Baseline Over Time <sup>[1]</sup>
End point description: The Partial Mayo score (Mayo score without endoscopy) ranges from 0 (normal or inactive disease) to 9 (severe disease) and is calculated as the sum of 3 subscores (stool frequency, rectal bleeding and physician's global assessment [PGA]), each of which ranges from 0 (normal) to 3 (severe disease). A negative change in Partial Mayo score indicates improvement. N=number of subjects with evaluable data at given time point.	
End point type	Primary
End point timeframe: Baseline (Week 0), Weeks 48, 96, 144, 192, 240, 292, 340, 388	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Descriptive data are summarized for this end point per protocol.

End point values	Adalimumab 40 mg EOW/EW			
Subject group type	Reporting group			
Number of subjects analysed	584 <sup>[2]</sup>			
Units: units on a scale				
arithmetic mean (standard deviation)				
Baseline (N=584)	2.5 (± 2.02)			
Change from Baseline to Week 48 (N=512)	-0.2 (± 2.04)			
Change from Baseline to Week 96 (N=432)	-0.4 (± 1.78)			
Change from Baseline to Week 144 (N=371)	-0.5 (± 2.06)			
Change from Baseline to Week 192 (N=292)	-0.6 (± 1.84)			
Change from Baseline to Week 240 (N=179)	-0.8 (± 1.79)			
Change from Baseline to Week 292 (N=73)	-0.7 (± 2.05)			
Change from Baseline to Week 340 (N=23)	-1.0 (± 1.97)			
Change from Baseline to Week 388 (N=3)	-2.0 (± 1.00)			

Notes:

[2] - Participants in ITT-1 population with both Baseline and visit values.

### Statistical analyses

No statistical analyses for this end point

### Primary: Mayo Score: Change From Baseline Over Time

End point title	Mayo Score: Change From Baseline Over Time <sup>[3]</sup>
End point description: The Mayo score ranges from 0 (normal or inactive disease) to 12 (severe disease) and is calculated as the sum of 3 subscores (stool frequency, rectal bleeding, endoscopy, and physician's global assessment [PGA]), each of which ranges from 0 (normal) to 3 (severe disease). A negative change in Mayo score indicates improvement. N=number of subjects with evaluable data at given time point.	
End point type	Primary
End point timeframe: Baseline (Week 0), Weeks 48, 96, 144, 192, 240, 292, 340, 388	
Notes: [3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Descriptive data are summarized for this end point per protocol.	

End point values	Adalimumab 40 mg EOW/EW			
Subject group type	Reporting group			
Number of subjects analysed	583 <sup>[4]</sup>			
Units: units on a scale				
arithmetic mean (standard deviation)				
Baseline (N=583)	3.5 (± 2.72)			
Change from Baseline to Week 48 (N=493)	-0.3 (± 2.64)			
Change from Baseline to Week 96 (N=422)	-0.5 (± 2.49)			
Change from Baseline to Week 144 (N=360)	-0.8 (± 2.73)			
Change from Baseline to Week 192 (N=277)	-0.8 (± 2.52)			
Change from Baseline to Week 240 (N=168)	-1.0 (± 2.40)			
Change from Baseline to Week 292 (N=72)	-0.9 (± 2.84)			
Change from Baseline to Week 340 (N=23)	-1.3 (± 2.87)			
Change from Baseline to Week 388 (N=3)	-2.0 (± 1.73)			

Notes:

[4] - Participants in ITT-1 population with both Baseline and visit values.

### Secondary: Inflammatory Bowel Disease Questionnaire (IBDQ): Change From

## Baseline Over Time

End point title	Inflammatory Bowel Disease Questionnaire (IBDQ): Change From Baseline Over Time
-----------------	---

### End point description:

The IBDQ is a 32-item questionnaire that assesses how the subject felt during the 2 weeks before the measurement time point. Questions are related to symptoms the subject might have had as a result of UC, how the subject felt in general, how the subject's mood was, and social and work problems the subject might have that resulted from UC. An increase in IBDQ score indicates less impact of UC on the subject's life. The responses to each question range from 1 (significant impairment) to 7 (no impairment), with the total score ranging from 32 (very poor) to 224 (perfect health-related quality of life). N=number of subjects with evaluable data at given time point.

End point type	Secondary
----------------	-----------

### End point timeframe:

Baseline (Week 0), Weeks 48, 96, 144, 192, 240, 292, 340, 388

## Secondary: Work Productivity and Activity Impairment: General Health Version 2.0 (WPAI:GH) Work Time Missed Because of Ulcerative Colitis: Change From Baseline Over Time

End point title	Work Productivity and Activity Impairment: General Health Version 2.0 (WPAI:GH) Work Time Missed Because of Ulcerative Colitis: Change From Baseline Over Time
-----------------	--

End point description:

The WPAI:GH questionnaire was used to assess work and activity impairment due to symptoms of ulcerative colitis in the last 7 days. The self-administered questionnaire measures the effect of the subject's health problems on work and daily activities in the previous week, specifically, the number of hours missed from work due to health problems, how much the subject's health problems affected work productivity, and how much the subject's health problems affected regular activities. Low scores indicate little or no impact of health problems on work and activities, and a negative change in the WPAI score indicates improvement. N=number of subjects with evaluable data at given time point.

## Secondary: WPAI:GH Impairment While Working: Change From Baseline Over Time

End point title	WPAI:GH Impairment While Working: Change From Baseline Over Time
-----------------	--

End point description:

The WPAI:GH questionnaire was used to assess work and activity impairment due to symptoms of ulcerative colitis in the last 7 days. The self-administered questionnaire measures the effect of the subject's health problems on work and daily activities in the previous week, specifically, the number of hours missed from work due to health problems, how much the subject's health problems affected work productivity, and how much the subject's health problems affected regular activities. Low scores indicate little or no impact of health problems on work and activities, and a negative change in the WPAI score indicates improvement. N=number of subjects with evaluable data at given time point.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) and serious adverse events (TESAEs) were collected from first dose of study drug until 70 days after the last dose of study drug (up to 398 weeks).

Adverse event reporting additional description:

TEAEs and TESAEs are defined as any adverse event or serious adverse event with onset or worsening from the time that the first dose of adalimumab is administered until 5 half-lives (70 days) have elapsed following discontinuation of adalimumab administration. TEAEs were collected whether elicited or spontaneously reported by the participant.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
23 November 2011	The main purpose of this amendment was to add regular tuberculosis (TB) testing and to add language regarding physical examination to align with physicians' usual clinical practice methods.
14 March 2012	The main purpose of this amendment was to allow the option of dose de-escalation by reducing dose frequency; add blood sample collections for adalimumab concentration and anti-adalimumab antibody (AAA) assays to be used for long-term PK data; add local laboratory use if QuantiFERON-TB Gold test or equivalent is used; and extended the duration of the study to 292 weeks
17 December 2013	The main purpose of this amendment was to extend the duration of the study to 388 weeks; include additional anti-tumor necrosis factor (anti-TNF) information; and clarify chest x-ray, pregnancy information, toxicity management, and protocol deviations.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Efficacy data after Week 292 should be interpreted with caution because less than 10% of subjects were under observation beyond Week 292.
---

Notes:
