

Clinical trial results:

Efficacy and safety of Salmeterol/Fluticasone MDI HEXAL versus Seretide™ Evohaler™ in adolescent and adult patients with moderate-to-severe persistent asthma: A 12-week, multicenter, randomized, double-blind, double-dummy, parallel group study

Summary

EudraCT number	2007-005235-29
Trial protocol	HU CZ PL
Global end of trial date	27 April 2009

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 August 2009
Is this the analysis of the primary completion data?	Yes
Primary completion date	27 April 2009
Global end of trial reached?	Yes
Global end of trial date	27 April 2009
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of this study was to evaluate the long-term efficacy and safety of Salmeterol/Fluticasone MDI HEXAL compared to Seretide Evohaler in adolescent and adult patients suffering from moderate-to-severe persistent asthma.

Protection of trial subjects:

Safety assessments included adverse events (AEs), physical examination, ECG, vital signs and clinical laboratory data. This study was conducted in accordance with International Conference on Harmonisation of Good Clinical Practice, the principles of the Declaration of Helsinki, as well as other applicable local ethical and legal requirements.

Background therapy:

-

Evidence for comparator: -

Actual start date of recruitment	13 October 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Czech Republic: 29
Country: Number of subjects enrolled	Hungary: 49
Country: Number of subjects enrolled	Poland: 175
Country: Number of subjects enrolled	Romania: 40
Country: Number of subjects enrolled	Ukraine: 279
Worldwide total number of subjects	572
EEA total number of subjects	293

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	94
Adults (18-64 years)	477
From 65 to 84 years	1
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Double-blind, double-dummy, multicenter, multinational, randomized parallel group study in adolescent and adult patients suffering from moderate-to-severe asthma

Pre-assignment

Screening details:

A total number of 610 patients were screened and 572 patients were randomized. A 2-week run-in period followed by a 12-week blinded treatment period. The screening visit (Visit -1) was followed by a 2-week run-in period during which all asthma treatments except reliever medication were to be stopped.

Pre-assignment period milestones

Number of subjects started	610 ^[1]
Number of subjects completed	572

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Adverse event, serious non-fatal: 1
Reason: Number of subjects	Consent withdrawn by subject: 4
Reason: Number of subjects	Adverse event, non-fatal: 1
Reason: Number of subjects	Physician decision: 1
Reason: Number of subjects	Pregnancy: 1
Reason: Number of subjects	Lost to follow-up: 3
Reason: Number of subjects	Ineligibility: 24
Reason: Number of subjects	Sponsor decision: 3

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Patients didn't complete the study due to various reasons.

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Salmeterol/Fluticasone MDI HEXAL (25 µg/50 µg)
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Salmeterol/Fluticasone MDI HEXAL
Investigational medicinal product code	
Other name	NA
Pharmaceutical forms	Pressurised inhalation
Routes of administration	Inhalation use

Dosage and administration details:

Salmeterol/Fluticasone MDI HEXAL (25 µg/50 µg of salmeterol/fluticasone per actuation), 2x2 actuations per day

Arm title	Seretide 50 Evohaler
Arm description: -	
Arm type	Active comparator
Investigational medicinal product name	Seretide 50
Investigational medicinal product code	
Other name	NA
Pharmaceutical forms	Pressurised inhalation
Routes of administration	Inhalation use
Dosage and administration details:	
Seretide 50 Evohaler (25 µg/50 µg per actuation), 2x2 actuations per day	
Arm title	Salmeterol/Fluticasone MDI HEXAL (25 µg/250 µg)

Primary: The mean change in FEV1 from baseline to the end of 12-week study period (Visit 6)

End point title	The mean change in FEV1 from baseline to the end of 12-week study period (Visit 6)
-----------------	--

End point description:

The change from baseline at the end of the 12-week treatment period. Missing values of the primary endpoint 'change in FEV1' were replaced using the last-value-carried-forward strategy as follows: in case if both pre-dose FEV1 values were missing at Visit 6/ET, the last value observed under treatment before Visit 6/ET was imputed as Visit 6/ET value. If there is no such last value under treatment, no imputation was made. If there is only one assessment of FEV1 pre-dose values at Visit 0 or Visit 6/ET is done, the available value was used for analysis.

P-value	= 0.9621
Method	ANCOVA
Parameter estimate	Mean difference (final values)
Point estimate	0.960046
Confidence interval	
level	Other: 97.5 %
sides	1-sided
lower limit	0.917738

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From the first intake of investigational product (IP) till the 28 days after the last intake of IP

Assessment type	Systematic
