

Clinical trial results:

A Randomized, Open-label, Multicenter Phase 3 Study of the Combination of Rituximab, Cyclophosphamide, Doxorubicin, VELCADE, and Prednisone (VcR-CAP) or Rituximab, Cyclophosphamide, Doxorubicin, Vincristine, and Prednisone (R-CHOP) in Patients With Newly Diagnosed Mantle Cell Lymphoma who are not Eligible for a Bone Marrow Transplant

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 June 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 June 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to determine which regimen of chemotherapy, VELCADE-rituximab-cyclophosphamide-doxorubicin-prednisone (VcR-CAP) or rituximab-cyclophosphamide-doxorubicin-prednisone-vincristine (R-CHOP), provided greater benefit in newly diagnosed mantle cell lymphoma (MCL) subjects with Stage II, III, or IV disease, as assessed by significant prolongation of progression-free survival (PFS).

Protection of trial subjects:

This study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with Good Clinical Practices and applicable regulatory requirements. Safety was evaluated throughout the study and included adverse events (AEs), Serious Adverse Events (SAEs), routine clinical laboratory tests (hematology, chemistry, and coagulation, Hepatitis B screening and Pregnancy test), vital signs, Electrocardiograms (ECGs).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 May 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Austria: 10
Country: Number of subjects enrolled	Belgium: 26
Country: Number of subjects enrolled	Brazil: 22
Country: Number of subjects enrolled	Canada: 7
Country: Number of subjects enrolled	Chile: 3

EEA total number of subjects	136

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	241
From 65 to 84 years	246
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 487 subjects were randomized from 128 centers in 28 countries from 22 May 2008 to 05 December 2011; 244 to the R-CHOP treatment group and 243 to the VcR-CAP treatment group. Of the 487 randomized subjects, 242 in the R-CHOP group and 240 in the VcR-CAP group received at least 1 dose of study drug.

Period 1

Period 1 title	Open-Label
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title

R-CHOP

Arm description:

Rituximab 375 milligram / meter² (mg/m²) intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Cyclophosphamide 750 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Doxorubicin 50 mg/m² Intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Prednisone 100 mg/m² orally on Day 1 to Day 5 of a 21 day (3 week) cycle for 6 cycles; Vincristine 1.4 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles. Subjects entered to the short-term safety follow-up until PD/initiation of alternate therapy/withdrawal from study/death; and then to long term follow-up (extension) for survival assessment.

Arm type	Experimental
Investigational medicinal product name	Rituximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received Rituximab 375 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received Cyclophosphamide 750 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Vincristine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received vincristine 1.4 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Prednisone
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
Subjects received prednisone 100 mg/m ² orally on Days 1 through 5 of each 21-day (3-week) cycle	
Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use
Dosage and administration details:	
Subjects received doxorubicin 50 mg/m ² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.	
Arm title	VcR-CAP
Arm description:	
Rituximab 375 mg/m ² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Cyclophosphamide 750 mg/m ² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Doxorubicin 50 mg/m ² Intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Velcade 1.3 mg/m ² intravenous on Days 1, 4, 8, and 11 of a 21 day (3 week) cycle for 6 cycles; Prednisone 100 mg/m ² orally on Day 1 to Day 5 of a 21 day (3 week) cycle for 6 cycles. Subjects entered to the short-term safety follow-up until PD/initiation of alternate therapy/withdrawal from study/death; and then to long term follow-up (extension) for survival assessment.	
Arm type	Experimental
Investigational medicinal product name	Rituximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection
Routes of administration	Intravenous use
Dosage and administration details:	
Subjects received rituximab 375 mg/m ² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.	
Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use
Dosage and administration details:	
Subjects received Cyclophosphamide 750 mg/m ² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.	
Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use
Dosage and administration details:	
Subjects received Doxorubicin 50 mg/m ² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.	
Investigational medicinal product name	Velcade
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use
Dosage and administration details:	
Subjects received Velcade 1.3 mg/m ² IV on Days 1, 4, 8, and 11 of a 21-day (3-week) cycle of 6 cycles.	
Investigational medicinal product name	Prednisone
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received prednisone 100 mg/m² orally (PO) on Day 1 through Day 5 of a 21-day (3-week) cycle of 6 cycles.

Number of subjects in period 1	R-CHOP	VcR-CAP
Started	244	243
Treated	242	240
Completed	199	195
Not completed	45	48
Adverse Event	17	21

Period 2

Period 2 title	Extension Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Extension- R-CHOP

Arm description:

Rituximab 375 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Cyclophosphamide 750 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Doxorubicin 50 mg/m² Intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles; Prednisone 100 mg/m² orally on Day 1 to Day 5 of a 21 day (3 week) cycle for 6 cycles; Vincristine 1.4 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles. Subjects entered to the short term safety follow-up until PD/initiation of alternate therapy/withdrawal from study/death; and then to long term follow-up (extension) for survival assessment.

Arm type	Experimental
Investigational medicinal product name	Rituximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects will receive Rituximab 375 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received Cyclophosphamide 750 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received doxorubicin 50 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Vincristine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received vincristine 1.4 mg/m² intravenous on Day 1 of a 21 day (3 week) cycle for 6 cycles.

Investigational medicinal product name	Prednisone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received prednisone 100 mg/m² orally on Days 1 through 5 of each 21-day (3-week) cycle

Arm title	Extension- VcR-CAP
------------------	--------------------

Other name	
Pharmaceutical forms	Concentrate for solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received rituximab 375 mg/m² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received Cyclophosphamide 750 mg/m² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.

Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received Doxorubicin 50 mg/m² IV on Day 1 of a 21-day (3-week) cycle of 6 cycles.

Investigational medicinal product name	Velcade
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received VELCADE 1.3 mg/m² IV on Days 1, 4, 8, and 11 of a 21-day (3-week) cycle of 6 cycles.

Investigational medicinal product name	Prednisone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects received prednisone 100 mg/m² orally (PO) on Day 1 through Day 5 of a 21-day (3-week) cycle of 6 cycles.

Number of subjects in period 2^[1]	Extension- R-CHOP	Extension- VcR-CAP
Started	128	140
Completed	0	0
Not completed	128	140
Adverse event, serious fatal	51	32
Study closed by sponsor	62	89
Unspecified	2	4
Lost to follow-up	10	13
Withdrawal by subject	3	2

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: Subjects who elected to continue with the follow-up were only continued for extension period.

Secondary: Duration of Response

End point title	Duration of Response
End point description:	
The duration of treatment response was defined as the time from the date of the first response to the date of PD or death due to PD for those subjects with a best response of CR, CRu, or PR as determined by the Independent Review Committee. The duration of response for complete responders was defined as the time from the date of the first response to the date of PD or death due to PD for those subjects with a best response of CR or CRu verified by bone marrow and lactate dehydrogenase (LDH). The response-evaluable population was defined as all subjects who received at least 1 dose of study drug, had ≥ 1 measurable tumor mass (>1.5 cm in the longest dimension and >1.0 cm in the short axis) at baseline and had at least 1 post-baseline tumor assessment by Independent Review Committee, before any subsequent anti-lymphoma treatment. Here 'n' signifies the number of subjects analyzed at this time point.

End point title	Treatment-free Interval (TFI)
End point description:	
TFI was defined as the duration from the date of last dose plus 1 day to the start date of the new treatment. Death due to disease progression prior to subsequent therapy was considered as an event. Otherwise, treatment-free interval was censored at the date of death or the last date known to be alive. Population included all randomized subjects who received at least 1 dose of study medication. Here "99999" indicates data was not estimable.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 October 2008	The main reason of this amendment was to provide the clarification was added that the IDMC would review data for interim analyses of safety, efficacy and the concordance rate of histological review; TFI added as a secondary objective; MRU added as an exploratory objective; subjects who withdrew could agree to provide information (ie, outcome of adverse events and survival status); subjects with initial response documented in Cycle 6 could receive 2 further cycles of therapy; central radiology review and assessments based on modified IWRC criteria; clarifications to definition of PFS, TTP, OS, TTNT, TFI; clarifications to definitions of measurable and assessable disease, criteria for response categories; ECG/ECHO/MUGA scans added to document baseline abnormalities; clarification that carriers of hepatitis B were allowed, but those with active hepatitis B or human immunodeficiency virus (HIV) were excluded; guidance on management of study drug toxicities added; defined minimum laboratory requirements at the beginning of each cycle (other than Cycle 1) before study drug administration; clarification was added that patients for whom bone marrow transplantation was not available and patients who refused a transplant as frontline treatment were eligible for the study; additional clarifications were made to other subject inclusion/exclusion criteria, dose adjustments, and statistical analyses.
26 February 2009	The main reason of this amendment was to do the modification of inclusion criterion restricting enrollment to patients who are truly not eligible for transplantation and the criterion for platelet counts was modified to include patients with lower baseline platelet counts secondary to mantle cell lymphoma. Exclusion criterion regarding serious medical conditions was clarified. Criteria for efficacy response were modified to make measurements operationally feasible and to comply with modified IWRC recommendations. Some laboratory tests considered not to be mandatory were eliminated. Adverse event collection wording was clarified to ensure the capture of adverse events relevant to the study.
16 September 2009	The IDMC recommendation for an additional interim analysis on safety. To ensure the potential for feedback to the investigator regarding the quality of the samples sent for central review and whether they will be adequate for analysis. Provide clarity on what constitutes central MCL diagnosis. Changes to inclusion and exclusion criteria to include that a check of the quality of the lymph node sample be performed before the patient can be randomized and added in the potential to use steroids if they are waiting for the quality check of sample, and the patient has high burden disease.
23 September 2010	The main reason for this amendment in the protocol was to provide clarification that randomization could occur only after central confirmation of the diagnosis of MCL, except for potential patients in China where central confirmation of sample adequacy on lymph node tissue was required; mandatory hepatitis B screening added as per IDMC, with additional safety monitoring for subjects at risk for hepatitis B reactivation and recommendation to prophylactically treat hepatitis B surface antigen positive subjects with lamivudine or equivalent agent; subjects with moderate/severe hepatic impairment (total bilirubin $\leq 1.5 \times$ the upper limit of normal [ULN]) excluded; reconstitution of VELCADE added as per SmPC.
09 August 2011	The main reason for this amendment in protocol was to add a futility stopping guideline for the prospectively planned interim analysis.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

A limitation of this study is that current recommendations for rituximab maintenance therapy were not established when this study was initiated.
--

Notes:
