##### **Paediatric regulatory details**

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	01 July 2009
Is this the analysis of the primary completion data?	No
Global end of trial reached?	No

Notes:

## General information about the trial

Main objective of the trial:

This study evaluated the efficacy of anacetrapib 100 mg for 24 weeks relative to placebo, on plasma concentrations of Low Density Lipoprotein Cholesterol and assessed the 76-week safety and tolerability of anacetrapib 100mg in participants with coronary heart disease (CHD)/CHD risk equivalent disease on stable dose regimen of statin with or without other lipid-modifying therapy. The 2 year extension to this study further evaluated the long-term safety profile and efficacy of anacetrapib 100 mg in CHD/CHD-risk equivalent participants who were on ongoing therapy with a statin with or without other lipid-modifying therapy.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy:

All participants were required to be on a stable-regimen of statin  $\pm$  other lipid-modifying medication(s) for at least 6-weeks prior to enrollment.

Evidence for comparator: -

Actual start date of recruitment	24 March 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 59
Country: Number of subjects enrolled	Austria: 34
Country: Number of subjects enrolled	Canada: 62
Country: Number of subjects enrolled	Colombia: 5
Country: Number of subjects enrolled	Finland: 51
Country: Number of subjects enrolled	France: 38
Country: Number of subjects enrolled	Germany: 42
Country: Number of subjects enrolled	Hong Kong: 36
Country: Number of subjects enrolled	Hungary: 82
Country: Number of subjects enrolled	Israel: 59
Country: Number of subjects enrolled	Malaysia: 66
Country: Number of subjects enrolled	Mexico: 68
Country: Number of subjects enrolled	Netherlands: 186
Country: Number of subjects enrolled	New Zealand: 48
Country: Number of subjects enrolled	Norway: 48
Country: Number of subjects enrolled	Peru: 35
Country: Number of subjects enrolled	Russian Federation: 47

Country: Number of subjects enrolled	Spain: 93
Country: Number of subjects enrolled	Sweden: 74
Country: Number of subjects enrolled	United States: 490
Worldwide total number of subjects	1623
EEA total number of subjects	648

Notes:

---

### **Subjects enrolled per age group**

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	889
From 65 to 84 years	734
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Base study consisted of a 76 week treatment period and a 12-week reversal period (no treatment). The active study was extended for 2-years which was followed by a 1 year reversal (no treatment).

### Pre-assignment

Screening details:

This study was enrolled participants with coronary heart disease (CHD) or CHD risk-equivalent disease that were taking a statin with or without other lipid-modifying medications. Other inclusion and exclusion criteria applied.

### Period 1

Period 1 title	Base Study - Treatment Phase (Part A)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Anacetrapib

Arm description:

one 100-mg Anacetrapib tablet daily with food for 76 weeks administered with participant's current stable regimen of lipid-lowering therapy.

Arm type	Experimental
Investigational medicinal product name	Anacetrapib
Investigational medicinal product code	
Other name	MK-0859
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

one 100-mg tablet once daily

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

one placebo tablet daily with food for 76 weeks administered with participant's current stable regimen of lipid-lowering therapy.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

one 100-mg tablet once daily

<b>Number of subjects in period 1</b>	Anacetrapib	Placebo
Started	811	812
Completed	548	663
Not completed	263	149
Physician decision	6	6
Consent withdrawn by subject	46	57
Adverse Event	46	48
LDL-C Stopping Criteria Met	142	1
Study Terminated by Sponsor	5	3
Lost to follow-up	3	13
Lack of efficacy	1	1
Protocol deviation	14	20

## Period 2

Period 2 title	Base Study - Reversal (Part B)
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Anacetrapib 100 mg - Base Study Reversal

Arm description:

Completers and Non-completers who received 100 mg Anacetrapib during treatment period. Participants continue with current stable regimen of lipid-lowering therapy.

Arm type	No intervention
No investigational medicinal product assigned in this arm	

<b>Arm title</b>	Placebo -Base Study Reversal
------------------	------------------------------

Arm description:

Completers and non-completers who received placebo in treatment period of base study. Participants continue with current stable regimen of lipid-lowering therapy.

Arm type	No intervention
No investigational medicinal product assigned in this arm	

Number of subjects in period 2	Anacetrapib 100 mg - Base Study Reversal	Placebo -Base Study Reversal
Started	548	663
Completed	655	690
Not completed	29	24
Unknown	29	24

non-completers from treatment phase	136	51

### Period 3

Period 3 title	2-year Extension (Part C)
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

### Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	Anacetrapib-Extension Study

#### Arm description:

one 100-mg Anacetrapib tablet daily with food for 104 weeks administered with participant's current stable regimen of lipid-lowering therapy.

Arm type	Experimental
Investigational medicinal product name	Anacetrapib
Investigational medicinal product code	
Other name	MK-0859
Pharmaceutical forms	Tablet
Routes of administration	Oral use

#### Dosage and administration details:

one 100-mg tablet once daily

<b>Arm title</b>	Placebo-Extension Study
------------------	-------------------------

#### Arm description:

one placebo tablet daily with food for 104 weeks administered with participant's current stable regimen of lipid-lowering therapy.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code

## Primary: Number of Participants With Hepatitis-related Adverse Events (AEs)- Base Study

End point title	Number of Participants With Hepatitis-related Adverse Events (AEs)- Base Study <sup>[1]</sup>
End point description:	An AE was defined as any unfavorable and unintended change in the structure, function, or chemistry of the body temporally associated with the use of the product, whether or not considered related to the use of the product. Any worsening (i.e., any clinically significant adverse change in frequency and/or intensity) of a preexisting condition which was temporally associated with the use of the product, was also an AE. Hepatitis-related AEs were identified by a collective review using the following prespecified set of preferred terms: cholestasis, hepatic necrosis, hepatocellular damage, cytolytic hepatitis, hepatitis, hepatomegaly, jaundice, hepatic failure, hepatitis cholestatic, jaundice cholestatic, hepatitis fulminant, hyperbilirubinaemia, jaundice hepatocellular, ocular icterus, yellow skin, hepatic function abnormal, acute hepatic failure, subacute hepatic failure, hepatitis acute, hepatitis toxic, hepatotoxicity, and mixed hepatocellular-cholestatic injury.
End point type	Primary
End point timeframe:	up to 88 weeks

### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was planned for this outcome.

### Primary: Percentage of Participants Who Experience at Least 1 AE- 1 year Reversal Study

End point title	Percentage of Participants Who Experience at Least 1 AE- 1 year Reversal Study <sup>[2]</sup>
-----------------	---

End point description:

An AE was defined as any untoward medical occurrence in a subject which does not necessarily have a causal relationship with the treatment. An AE was any unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease temporally associated with use of a medicinal product, whether or not considered related to the medicinal product. Note: An interactive voice response system (IVRS) distribution error resulted in only 1 participant who received placebo during the 2-year extension enrolled in the 1-year reversal phase instead of the approximately 68 placebo participants that were planned. All participants who had received anacetrapib 100 mg during the 2 year extension enrolled as planned in the 1-year reversal phase. Thus no comparative analysis was performed on data from the 1-year reversal phase.

End point type	Primary
----------------	---------

End point timeframe:

up to 52 weeks

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: An error with the IVRS during enrollment resulted in only 1 placebo participant being enrolled. Planned statistical analysis was not performed.

<b>End point values</b>	Anacetrapib-1 year Reversal Study-Safety	Placebo-1 year Reversal Study-Safety		
Subject group type	Subject analysis set	Subject analysis set

### Statistical analyses

Statistical analysis title	Between Group Comparison
Comparison groups	Anacetrapib 100 mg - Extension Study - Efficacy v Placebo-Extension Study - Efficacy
Number of subjects included in analysis	669
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	Difference in Least-squares Means
Point estimate	-39.9
Confidence interval	
level	95 %
sides	2-sided
lower limit	-43.8
upper limit	-36

## Secondary: Percentage Change from Baseline in High Density Lipoprotein Cholesterol (HDL-C) at Week 104- Extension Study

End point title	Percentage Change from Baseline in High Density Lipoprotein Cholesterol (HDL-C) at Week 104- Extension Study
End point description:	HDL-C levels measured at baseline and after 104 weeks of treatment.
End point type	Secondary
End point timeframe:	Baseline and week 104 of Extension

End point values	Anacetrapib 100 mg - Extension Study - Efficacy	Placebo- Extension Study - Efficacy		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	310	361		
Units: Percentage Change				
least squares mean (confidence interval 95%)	169.3 (165 to 173.7)	15.8 (11.7 to 19.8)		

## Statistical analyses

<b>Statistical analysis title</b>	Between Group Comparison
Comparison groups	Anacetrapib 100 mg - Extension Study - Efficacy v Placebo-Extension Study - Efficacy
Number of subjects included in analysis	671
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	Difference in Least-squares Means
Point estimate	153.5
Confidence interval	
level	95 %
sides	2-sided
lower limit	147.9
upper limit	159.2

## Secondary: Percentage Change from Baseline in Non-High Density Lipoprotein Cholesterol at Week 104- Extension Study

End point title	Percentage Change from Baseline in Non-High Density Lipoprotein Cholesterol at Week 104- Extension Study
End point description:	Non-HDL-C levels measured at baseline and after 104 weeks of treatment.
End point type	Secondary
End point timeframe:	Baseline and Week 104 of Extension Study

<b>End point values</b>	Anacetrapib 100 mg - Extension Study - Efficacy	Placebo- Extension Study - Efficacy		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	310	361		
Units: Percentage Change				
least squares mean (confidence interval 95%)	-35.5 (-38.1 to -33)	-4.6 (-7 to -2.3)		

### Statistical analyses

<b>Statistical analysis title</b>	Between Group Comparison
Comparison groups	Anacetrapib 100 mg - Extension Study - Efficacy v Placebo-Extension Study - Efficacy
Number of subjects included in analysis	671
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	Difference in Least-squares means
Point estimate	-30.9
Confidence interval	
level	95 %
sides	2-sided
lower limit	-34.2
upper limit	-27.5

### Secondary: Percentage Change from Baseline in Apolipoprotein B at Week 104-Extension Study

End point title	Percentage Change from Baseline in Apolipoprotein B at Week 104- Extension Study
End point description:	Apolipoprotein B levels measured at baseline and after 104 weeks of treatment.
End point type	Secondary
End point timeframe:	Baseline and Week 104 of Extension Study

<b>End point values</b>	Anacetrapib 100 mg - Extension Study - Efficacy	Placebo- Extension Study - Efficacy		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	310	358		
Units: Percentage Change				
least squares mean (confidence interval 95%)	-30.6 (-32.6 to -28.6)	-14.3 (-16.2 to -12.4)		

### Statistical analyses

<b>Statistical analysis title</b>	Between Group Comparison
Comparison groups	Anacetrapib 100 mg - Extension Study - Efficacy v Placebo- Extension Study - Efficacy
Number of subjects included in analysis	668
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	Difference in Least-squares Means
Point estimate	-16.3
Confidence interval	
level	95 %
sides	2-sided
lower limit	-18.9
upper limit	-13.7

### Secondary: Percentage Change from Baseline in Apolipoprotein A-1 at Week 104- Extension Study

End point title	Percentage Change from Baseline in Apolipoprotein A-1 at Week 104- Extension Study
End point description:	Apolipoprotein A-1 levels measured at baseline and after 104 weeks of treatment.
End point type	Secondary
End point timeframe:	Baseline and Week 104 of Extension Study

<b>End point values</b>	Anacetrapib 100 mg - Extension Study - Efficacy	Placebo- Extension Study - Efficacy		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	310	358		
Units: Percentage Change				
least squares mean (confidence interval 95%)	41.8 (39.5 to 44.1)	-2.7 (-4.8 to - 0.5)		

## Statistical analyses

<b>Statistical analysis title</b>	Between Group Comparison
Comparison groups	Anacetrapib 100 mg - Extension Study - Efficacy v Placebo-Extension Study - Efficacy
Number of subjects included in analysis	668
Analysis specification	Pre-specified
Analysis type	other
Parameter estimate	Difference in Least-squares Means
Point estimate	44.5
Confidence interval	
level	95 %
sides	2-sided
lower limit	41.6
upper limit	47.4

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Base Study-Treatment Phase-up to 76 weeks; Reversal Phase-up to 12 weeks; Post-study Phase- up to 24 weeks. Extension Study-up to 104 weeks. Reversal Study-up to 52 weeks

Adverse event reporting additional description:

AE additional description

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	15.0
--------------------	------

### Reporting groups

Reporting group title	Placebo-Reversal Phase-Base Study
-----------------------	-----------------------------------

Reporting group description:

Participants, who received at least 1 dose of Placebo in Treatment Phase of Base Study, started Reversal Phase of Base Study and had available safety data.

Reporting group title	Placebo-Treatment Phase-Base Study
-----------------------	------------------------------------

Reporting group description:

Participants who received at least 1 dose of placebo in Treatment Phase of Base Study and had available safety data.

Reporting group title	Anacetrapib 100 mg-Treatment Phase-Base Study
-----------------------	---

Reporting group description:

Participants who received at least 1 dose of Anacetrapib in Treatment Phase of Base Study and had available safety data.

Reporting group title	Anacetrapid 100 mg-Reversal Phase-Base Study
-----------------------	--

Reporting group description:

-Participants, who received at least 1 dose of Anacetrapib in Treatment Phase of Base Study, started Reversal Phase of Base Study and had available safety data.

Reporting group title	Placebo-Post Treatment Phase-Base Study
-----------------------	---

Reporting group description:

Participant enrolled in Base Study who received at least 1 dose of Placebo in Treatment Phase of Base Study and had available safety data. Post Treatment period was period from end of Reversal Phase up to start of 2-year extension.

Reporting group title	Anacetrapib 100 mg-Post Treatment Phase-Base Study
-----------------------	--

Reporting group description:

Participant enrolled in Base Study who received at least 1 dose of Anacetrapib in Treatment Phase of Base Study and had available safety data. Post Treatment period was period from end of Reversal Phase up to start of 2-year extension.

Reporting group title	Anacetrapib-2-year Extension Study
-----------------------	------------------------------------

Reporting group description:

Participants who were enrolled in 2-year extension, received at least 1 dose of Anacetrapib and had available safety data.

Reporting group title	Placebo-2-year Extension Study
-----------------------	--------------------------------

Reporting group description:

Participants who were enrolled in 2-year extension, received at least 1 dose of placebo and had available safety data.

Reporting group title	Anacetrapib-1-year Reversal Study
-----------------------	-----------------------------------

Reporting group description:

Participants who were enrolled in 1-year reversal, received at least 1 dose of Anacetrapib in the extension and had available safety data.

Reporting group title	Placebo-1-year Reversal Study
-----------------------	-------------------------------

Reporting group description:

Participants who were enrolled in 1-year reversal, received at least 1 dose of Placebo in the extension

<b>Serious adverse events</b>	Placebo-Reversal Phase-Base Study	Placebo-Treatment Phase-Base Study	Anacetrapib 100 mg-Treatment Phase-Base Study
Total subjects affected by serious adverse events			
subjects affected / exposed	19 / 714 (2.66%)	118 / 804 (14.68%)	112 / 808 (13.86%)

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 June 2008	AM1: Primary reason for the amendment was to revise the Participant Population to include only CHD/CHD risk-equivalent participants.
20 March 2009	AM2: Primary reason for the amendment was to add an interim safety analysis once all participants had reached Week 54.
19 August 2009	AM3: The primary reason for the amendment was to add the collection of safety follow-up information (serious cardiovascular adverse events or death) for discontinued participants at their intended Week 54 visit.
22 February 2010	AM4: The primary reason for this amendment was to extend the 12-week reversibility phase of Base Study by up to another 12 weeks (if required) in order to allow participants completing final visit (Week 88) to continue in the study until the planned extension study was ready for implementation at the site.
17 March 2010	Ext 10: The primary reason for this amendment was to add a 2-year Extension Study to the Base Study in order to further evaluate the long-term safety profile (~3.5years) and efficacy of anacetrapib in CHD/CHD-risk equivalent participants who were on ongoing therapy with a statin ± other lipid-modifying therapy.
07 March 2011	AM11 (AM1 to Ext10): The primary reason for this amendment was to add the results from the warfarin and digoxin drug interaction studies that was recently added to the Investigator's Brochure. As a result, digoxin or other cardiac glycosides and Coumadin (warfarin) or coumadin-like anticoagulants were no longer prohibited medications for the study. Added blood draws to estimate the time to steady state levels for anacetrapib. Also added an archive blood sample for biomarkers.
13 January 2012	AM12 (AM2 to Ext 10): The primary reason for this amendment was to extend the reversal period of the 2-year extension study from 12 weeks to 1-year.
24 April 2013	AM6: The primary reason for this amendment was to add a follow-up of 5 months up to 5 years for evaluation of pharmacokinetics and lipids for all participants who were previously treated with anacetrapib in the Base or Extension Studies (completed or discontinued). Additionally All women of child-bearing potential (WOCBP), who had previously received anacetrapib in the treatment phase would be contacted annually by the site for pregnancy and outcome. WOCBP would also receive guidance for proper use of contraception.
02 June 2013	AM14 (AM4 to Ext): The primary reason for this amendment was to reconcile the unblinding text such that participants can be unblinded after they complete the 2-year Extension Study on a rolling basis and then enrolled in AM6.
17 October 2013	AM7: The primary reason for the amendment was to add evaluations of participants to determine if anacetrapib levels were present in the adipose tissue, approximately 1 up to 5 years after the participant last took anacetrapib.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

None reported
