

OVERALL SURVIVAL CENSORED AT 2 YEARS
KAPLAN-MEIER ANALYSIS
FULL ANALYSIS SET

	DASATINIB N=406			IMATINIB N=406				
	Number at risk		Number of events	Survival probability	Number at risk		Number of events	Survival probability
Overall survival (months)								
[0-12)	406		5	0.988	406		5	0.988
[12-24)	393		9	0.977	392		11	0.972
Estimates (95% confidence interval) (months)								
25 th percentile	NA	(NA; NA)			NA	(NA; NA)		
50 th percentile	NA	(NA; NA)			NA	(NA; NA)		
75 th percentile	NA	(NA; NA)			NA	(NA; NA)		
Log-rank test								
(DASATINIB vs IMATINIB)	0.656							

Note 1: Overall survival is calculated as (Date of death from any cause - Date of first dose of study medication)/30.4. Patients who have not died within 2 years are censored at the earliest of (date of last contact, or the date of first dose of study medication + 730.5 days).
