

Clinical trial results:

Safety and efficacy of clopidogrel when added to aspirin and dipyridamole in high risk patients with recent ischaemic stroke or TIA: a randomised controlled trial

Summary

EudraCT number	2007-006749-42
Trial protocol	GB DK
Global end of trial date	30 June 2016

Results information

Result version number	v1 (current)
This version publication date	14 October 2017
First version publication date	14 October 2017

Trial information

Trial identification

Sponsor protocol code	31350
-----------------------	-------

Additional study identifiers

ISRCTN number	ISRCTN47823388
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	15 May 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 June 2016
Global end of trial reached?	Yes
Global end of trial date	30 June 2016
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To assess the safety of short-term administration (1 month) of intensive antiplatelet therapy (aspirin, dipyridamole and clopidogrel) versus current guideline therapy (dual aspirin and dipyridamole, or clopidogrel monotherapy) in patients with very recent ischaemic stroke or TIA.

Protection of trial subjects:

N/A

Background therapy:

Standard NHS care

Evidence for comparator:

N/A

Actual start date of recruitment	01 April 2009
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects**Subjects enrolled per country**

Country: Number of subjects enrolled	United Kingdom: 2955
Country: Number of subjects enrolled	Denmark: 51
Country: Number of subjects enrolled	New Zealand: 7
Country: Number of subjects enrolled	Georgia: 83
Worldwide total number of subjects	3096
EEA total number of subjects	3006

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	1093
From 65 to 84 years	1798
85 years and over	205

Subject disposition

Recruitment

Recruitment details:

Recruitment commenced in UK on 01/04/09, followed by Denmark on 01/07/13, New Zealand 18/10/13 and Georgia on 19/06/14.

Pre-assignment

Screening details:

Adults at high risk of recurrent ischaemic stroke. Stroke type confirmed by CT/MRI scan.

Period 1

Period 1 title	Randomisation
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Single blind
Roles blinded	Assessor ^[1]

Blinding implementation details:

N/A

Arms

Are arms mutually exclusive?	Yes
Arm title	Intensive

Arm description:

Clopidogrel, Aspirin and Dipyridamole

Arm type	Experimental
Investigational medicinal product name	Clopidogrel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use, Nasogastric use

Dosage and administration details:

Loading dose of 300mg followed by 30 days of 75mg per day

Investigational medicinal product name	Aspirin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use, Nasogastric use

Dosage and administration details:

Loading dose of 300mg at randomisation followed by 75mg for 30 days

Investigational medicinal product name	Dipyridamole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Nasogastric use , Oral use

Dosage and administration details:

200mg tablet twice per day for 30 days

Arm title	Guideline
------------------	-----------

Arm description:

Guideline therapy either clopidogrel alone or aspirin and dipyridamole

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Clopidogrel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Nasogastric use , Oral use
Dosage and administration details:	
Loading dose of 300mg followed by 30 days of 75mg per day	
Investigational medicinal product name	aspirin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Nasogastric use , Oral use
Dosage and administration details:	
Loading dose of 300mg followed by daily dose of 75mg for 28 days	
Investigational medicinal product name	Dipyridamole
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Nasogastric use , Oral use
Dosage and administration details:	
200mg twice daily	
Notes:

Number of subjects in period 3	Intensive	Guideline
Started	1556	1540
Recurrent stroke/TIA	41 ^[3]	57 ^[4]
Completed	1525	1502
Not completed	31	38
Adverse event, serious fatal	6	6
Consent withdrawn by subject	19	18
Logistical problem	6	14

Notes:

[3] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Participants were able to withdraw from a particular follow up without having to withdraw fully from the trial. Patients who suffered from a recurrent stroke or TIA were also asked to complete further follow ups. This meant they were still able to complete future follow ups if they wished.

[4] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Participants were able to withdraw from a particular follow up without having to withdraw fully from the trial. Patients who suffered from a recurrent stroke or TIA were also asked to complete further follow ups. This meant they were still able to complete future follow ups if they wished.

Blood and lymphatic system disorders			
Haematological disorders			
subjects affected / exposed	13 / 1556 (0.84%)	14 / 1540 (0.91%)	
occurrences causally related to treatment / all	10 / 13	12 / 14	
deaths causally related to treatment / all	0 / 0	0 / 0	

General disorders and administration site conditions			
Miscellaneous			
subjects affected / exposed	52 / 1556 (3.34%)	51 / 1540 (3.31%)	
occurrences causally related to treatment / all	16 / 52	10 / 55	
deaths causally related to treatment / all	1 / 5	0 / 9	
Immune system disorders			
Immune system disorder			
subjects affected / exposed	4 / 1556 (0.26%)	1 / 1540 (0.06%)	
occurrences causally related to treatment / all	4 / 4	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Eye disorders			
Eye disorder			
subjects affected / exposed	12 / 1556 (0.77%)	6 / 1540 (0.39%)	
occurrences causally related to treatment / all	9 / 12	4 / 6	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastrointestinal disorders			
Gastrointestinal events			
subjects affected / exposed	91 / 1556 (5.85%)	49 / 1540 (3.18%)	
occurrences causally related to treatment / all	67 / 97	31 / 49	
deaths causally related to treatment / all	1 / 3	0 / 1	
Respiratory, thoracic and mediastinal disorders			
Respiratory disorder			
subjects affected / exposed	87 / 1556 (5.59%)	67 / 1540 (4.35%)	
occurrences causally related to treatment / all	62 / 100	32 / 75	
deaths causally related to treatment / all	0 / 2	0 / 3	
Skin and subcutaneous tissue disorders			
Cutaneous			
subjects affected / exposed	159 / 1556 (10.22%)	58 / 1540 (3.77%)	
occurrences causally related to treatment / all	167 / 180	46 / 62	
deaths causally related to treatment / all	0 / 0	0 / 0	
Renal and urinary disorders			
Genito-urinary			
subjects affected / exposed	46 / 1556 (2.96%)	25 / 1540 (1.62%)	
occurrences causally related to treatment / all	34 / 56	7 / 28	
deaths causally related to treatment / all	0 / 0	0 / 0	

Musculoskeletal and connective tissue disorders			
Musculoskeletal disorder			
subjects affected / exposed	9 / 1556 (0.58%)	14 / 1540 (0.91%)	
occurrences causally related to treatment / all	5 / 9	0 / 14	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metabolism and nutrition disorders			
Metabolic disorder			
subjects affected / exposed	5 / 1556 (0.32%)	8 / 1540 (0.52%)	
occurrences causally related to treatment / all	0 / 5	0 / 9	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 0 %

Non-serious adverse events	Intensive	Guideline	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 1556 (0.00%)	0 / 1540 (0.00%)	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 February 2012	Guideline group changed from aspirin and dipyridamole to aspirin and dipyridamole or clopidogrel

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

N/A

Notes:
