Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	13 December 2013
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 April 2010
Global end of trial reached?	Yes
Global end of trial date	30 April 2010
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the efficacy of 2 different dose levels of olaparib with liposomal doxorubicin in patients with advanced BRCA1- or BRCA2- associated ovarian cancer. This was assessed by the following:

Primary variable

- Progression-free survival (PFS)

Secondary variables

- Objective response rate (complete response (CR) and partial response (PR)) at various timepoints and overall
- Overall duration of response
- Tumour size
- CA-125 levels
- Overall survival

Protection of trial subjects:

The Patient Informed Consent Document will incorporate wording that complies with relevant data protection and privacy legislation. Pursuant to this wording, patients will authorise the collection, use and disclosure of their study data by the Investigator and by those persons who need that information for the purposes of the study.

The Sponsor reserves the right to stop the study at any time on the basis of new information regarding safety or efficacy, or if study progress is unsatisfactory, or for other valid administrative reasons. After such a decision is made, the Investigator must inform all screened patients within 1 week.

If any pregnancy occurs in the course of the study, then investigators or other site personnel must inform appropriate AstraZeneca representatives immediately but no later than the end of the next business day of when he or she becomes aware of it. The designated AstraZeneca representative works with the investigator to ensure that all relevant information is provided to the appropriate AstraZeneca Patient Safety data entry site within 30 calendar days.

Any crossover patients must be followed for full safety assessments for 57 days.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 July 2008
Long term follow-up planned	Yes
Long term follow-up rationale	Regulatory reason, Safety
Long term follow-up duration	1 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 6
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Germany: 1
Country: Number of subjects enrolled	Israel: 24
Country: Number of subjects enrolled	Poland: 14
Country: Number of subjects enrolled	Spain: 2
Country: Number of subjects enrolled	Sweden: 2
Country: Number of subjects enrolled	United Kingdom: 18
Country: Number of subjects enrolled	United States: 26
Worldwide total number of subjects	97
EEA total number of subjects	41

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	84
From 65 to 84 years	13
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

First patient enrolled on 30 July 2008 and last patient on 3 March 2009 at 25 centres in 9 countries

Pre-assignment

Screening details:

97 of 125 screened women with advanced BRCA 1/2 ovarian cancer who had chemotherapy were randomized

Period 1

Period 1 title	Randomised part
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Olaparib 200 mg bd

Arm description:

Olaparib (AZD2281) 200 mg oral capsules twice daily

Arm type	Experimental
Investigational medicinal product name	AZD2281
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

200 mg bd orally

Arm title	Olaparib 400 mg bd
------------------	--------------------

Arm description:

Olaparib (AZD2281) 400 mg oral capsules twice daily

Arm type	Experimental
Investigational medicinal product name	AZD2281
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

400 mg bd orally

Arm title	Liposomal doxorubicin
------------------	-----------------------

Arm description:

Liposomal doxorubicin 50 mg/m² intravenously every 4 weeks

Arm type	Active comparator
Investigational medicinal product name	Doxil
Investigational medicinal product code	
Other name	Caelyx
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

50 mg/m² i.v.

Number of subjects in period 1	Olaparib 200 mg bd	Olaparib 400 mg bd	Liposomal doxorubicin
Started	32	32	33
Completed	32	32	32
Not completed	0	0	1
Consent withdrawn by subject	-	-	1

Period 2

Period 2 title	Ongoing Initial Study Treatment at DCO
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Olaparib 200 mg bd

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 March 2008	<p>Clarification that withdrawal was from study treatment rather than from study (Section 3.2.1, Section 3.2.2, Section 3.3.2, Section 3.5.2.1, Section 4.5.1, Section 4.5.1.1, Section 5.3.2, and Section 5.3.3).</p> <p>For any patient with a treatment-free interval of more than 12 months, then re-treatment with platinum should be the first option. However a patient may be considered for this study if there is a medical contra-indication to further platinum chemotherapy. This must be discussed both with the patient and with AstraZeneca prior to consent and any screening procedures (Section 4.3).</p> <p>Collection of demography data and extra data for cardiac monitoring (ECG and MUGA scans) and safety haematology and biochemistry (e.g. mean cell volume, amylase and lipase assessments) (Section 5.2.2, Section 5.2.9, Section 5.2.10, Section 3.3.3.5, Section 5.2.12.1)</p>
20 May 2008	<p>Change to number of doses of olaparib to be studied (Study title, Section 1.6, Section 3.2.1)</p> <p>Collection of OS as secondary objective, changes to statistical methods as a result of change in number in olaparib dose groups, clarification of patient management (Section 2.1, Section 2.2, Section 4.3, Section 5.2.14, Section 7.2, Section 7.4.1, Section 7.4.1.5, Section 7.5.1)</p> <p>Changes to management of toxicity based on the new dose group of 200 mg bd (Section 3.3.2)</p> <p>Inclusion criteria (Section 4.1)</p> <p>Exclusion criteria (Section 4.2)</p> <p>Clarification of safety assessments (Section 5.3.2)</p>

13 November 2008	<p>Synopsis, Target patient population Text changes to Synopsis, Key Procedures, Overall Survival (Section 7.4.1.5), Determination of sample size (Section 7.5), Adverse event reporting period Section 6.6) to account for overall survival as secondary endpoint. Inclusion Criteria (Section 4.1, criterion 7) Exclusion Criteria (Section 4.2, criterion 2) Exclusion Criteria (Section 4.2 previously criterion 5, now criterion 6) Assignment of patient E-code number and stratification (Section 4.3) Discontinuation from study treatment and (Section 4.5.1.2) and CT or MRI scans (Section 5.2.14) Treatment period(s) and assessments text (Section 5.3.2) Withdrawal visit text (Section 5.3.3) Crossover from liposomal doxorubicin text (Section 5.3.4) Patient management Post-Primary Analysis (new section) (Section 5.3.6)</p>
05 April 2010	<p>Key procedures and statistical summary (Synopsis), Table 5, crossover from liposomal doxorubicin text (Section 5.3.4), Table 6, Final follow-up visit text (Section 5.3.5), Patient management post primary analysis (Section 5.3.6), Figure 2, patient management post data cut-off text (Section 5.3.7, new text), Adverse event reporting period text (Section 6.6), Overall survival text (Section 7.4.1.5), Determination of sample size text (Section 7.5), Study timetable text (Section 11) Clinical experience text (Section 1.5) Management of olaparib toxicity text (Section 3.3.2) Exclusion criteria (Section 4.2; criterion 15) Discontinuation from study treatment text (Section 4.5.1.2), Crossover from liposomal doxorubicin text (Section 5.3.4) Table 7 (New table of study schedule for patients crossing over from liposomal doxorubicin to olaparib following approval of protocol amendment 4) Patient management post primary analysis (Section 5.3.6) Figure 2 Reporting of AE and SAE text (Section 6.2)</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The AEs reported include all events up to the OS data cut-off. After the PFS data cut-off, AEs were only collected for the olaparib and cross-over groups. The safety profile of these 2 groups at OS was consistent with that at the time of PFS.

Notes:
