

## Clinical trial results:

**A phase II study to assess engraftment and engraftment kinetics after double cord blood transplantation with a reduced-intensity conditioning regimen in patients eligible for allogeneic stem cell transplantation lacking a matched unrelated donor**

### Summary

EudraCT number	2008-000053-35
Trial protocol	NL
Global end of trial date	04 July 2017

### Results information

Result version number	v1 (current)
This version publication date	10 March 2022
First version publication date	10 March 2022

### Trial information

#### Trial identification

Sponsor protocol code	HO106
-----------------------	-------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

### Sponsors

Sponsor organisation name	HOVON
Sponsor organisation address	De Boelelaan 1117, Amsterdam, Netherlands,
Public contact	HOVON Data Center, HOVON, hdc@erasmusmc.nl
Scientific contact	HOVON Data Center, HOVON, hdc@erasmusmc.nl

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 October 2013
Is this the analysis of the primary completion data?	Yes
Primary completion date	19 March 2012
Global end of trial reached?	Yes
Global end of trial date	04 July 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Evaluation of engraftment and disease-free survival following double cord blood transplantation after a reduced intensity conditioning regimen in adult patients. In addition to description of clinical parameters biological studies will be performed in order to evaluate whether parameters can be identified that predict which graft ultimately prevails.

Protection of trial subjects:

Monitoring and Insurance

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	29 July 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 60
Worldwide total number of subjects	60
EEA total number of subjects	60

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	60
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

All subjects gave written informed consent and were screened according to the inclusion and exclusion criteria.

### Period 1

Period 1 title	Overall period (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

<b>Arm title</b>	Experimental group
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	UCB
Investigational medicinal product code	
Other name	CBU
Pharmaceutical forms	Infusion
Routes of administration	Infusion

Dosage and administration details:

Depending on the existence of major ABO-incompatibility between CBU and recipient and the number of prefreeze RBC CBU's will undergo a careful washing procedure after thawing or will be infused immediately after a direct-thaw procedure.

Major ABO-incompatible CBU's will undergo a post-thaw washing procedure if the total prefreeze RBC count exceeds  $150 \times 10^9$ . Minor ABO-incompatible or ABO-compatible CBU's will undergo a post-thaw washing procedure if the total prefreeze RBC count exceeds  $300 \times 10^9$ . In all other cases CBU's will be infused immediately after a direct-thaw procedure. Grafts will be infused on two consecutive days (day 0 and day +1). An ABO compatible graft will be given first.

<b>Number of subjects in period 1</b>	Experimental group
Started	60
Completed	54
Not completed	6
Protocol deviation	6

## Baseline characteristics

### Reporting groups

Reporting group title	Overall period
-----------------------	----------------

Reporting group description: -

Reporting group values	Overall period	Total	
Number of subjects	60	60	
Age categorical			
Units: Subjects			
In utero	0	0	
Preterm newborn infants (gestational age < 37 wks)	0	0	
Newborns (0-27 days)	0	0	
Infants and toddlers (28 days-23 months)	0	0	
Children (2-11 years)	0	0	
Adolescents (12-17 years)	0	0	
Adults (18-64 years)	0	0	
From 65-84 years	0	0	
85 years and over	0	0	
Adults (18-65 years)	60	60

### Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events will be reported from the first study-related procedure until 30 days following the last dose of any drug from the protocol treatment schedule or until the start of subsequent systemic therapy for the disease under study, if earlier.

Adverse event reporting additional description:

Adverse events occurring after 30 days should also be reported if considered at least possibly related to the investigational medicinal product by the investigator.

Assessment type	Systematic
