Paediatric regulatory details	
Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage		
Analysis stage	Final	
Date of interim/final analysis	05 October 2010	
Is this the analysis of the primary completion data?	No	
Global end of trial reached?	Yes	
Global end of trial date	15 February 2010	
Was the trial ended prematurely?	Yes	

Notes:

#### General information about the trial

Main objective of the trial:

The primary objective of N01276 was to evaluate the efficacy of Brivaracetam (BRV) in the conversion to monotherapy at the doses of 50 and 100 mg/day (administered in 2 equal doses per day) in subjects with Partial Onset Seizures (POS) when compared to a historical pseudo-Placebo control group. This objective was based on the White Paper on Alternative Monotherapy Design in the Treatment of Epilepsy (French et al, 2005).

Protection of trial subjects:

Standard measures to minimize pain and stress.

Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	25 August 2008
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	7 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## **Population of trial subjects**

#### Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 8
Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Canada: 13
Country: Number of subjects enrolled	Czech Republic: 11
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Sweden: 12
Country: Number of subjects enrolled	United States: 34
Worldwide total number of subjects	88
EEA total number of subjects	33

Notes:

Subjects enrolled p	er age group	
In utero	n	

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	1
Adults (18-64 years)	84
From 65 to 84 years	3
85 years and over	0

## **Subject disposition**

#### Recruitment

Recruitment details:

This study started to enroll patients in August 2008 and concluded in February 2010.

#### **Pre-assignment**

Screening details:

The Participant Flow refers to the Randomized Set (RS).

Subjects withdrawn due to meeting an exit criterion are included in the count of early discontinuations with a reason of "Adverse Event" or "Lack of efficacy" as reported by the Investigator.

Period 1	
Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Carer, Investigator, Subject
Arms	
Are arms mutually exclusive?	Yes
Arm title	Brivaracetam 50 mg/day
Arm description:	
Brivaracetam: 25 mg tablet - 50 mg dail for subjects not participating in the follow	ly for 17 weeks (or 21 weeks if down-titrated (50 mg > 20 mg) w-up study)
Arm type	Experimental
Investigational medicinal product name	Brivaracetam
Investigational medicinal product code	ucb 34714
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use
Dosage and administration details:	
10 mg and 25 mg oral tablets of Brivara	cetam

10 mg and 25 mg oral tablets of Brivaracetam.

Arm title Brivaracetam 100 mg/day	
-----------------------------------	--

#### Arm description:

Brivaracetam: 25 mg tablet - 100 mg daily for 17 weeks (or 21 weeks if down-titrated (100 mg > 50 mg > 20 mg) for subjects not participating in the follow-up study)

Arm type	Experimental
Investigational medicinal product name	Brivaracetam
Investigational medicinal product code	ucb 34714
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

10 mg and 25 mg oral tablets of Brivaracetam.

Number of subjects in period 1	Brivaracetam 50 mg/day	Brivaracetam 100 mg/day
Started	68	20
Completed	23	8
Not completed	45	12
Consent withdrawn by subject	6	-
AE, non-serious non-fatal	4	-
AE of unknown type	1	-
Other reason	9	1
SAE, non-fatal	1	-
Lack of efficacy	23	11
SAE, non-fatal + AE, non-serious non-fatal	1	-

## **Baseline characteristics**

### **Reporting groups**

Reporting group title	Brivaracetam 50 mg/day

Reporting group description:

Brivaracetam: 25 mg tablet - 50 mg daily for 17 weeks (or 21 weeks if down-titrated (50 mg > 20 mg) for subjects not participating in the follow-up study)

Reporting group title Brivaracetam 100 mg/day

Reporting group description:

Brivaracetam: 25 mg tablet - 100 mg daily for 17 weeks (or 21 weeks if down-titrated (100 mg > 50 mg > 20 mg) for subjects not participating in the follow-up study)

Reporting group values	Brivaracetam 50 mg/day	Brivaracetam 100 mg/day	Total
Number of subjects	68	20	88
Age categorical			
Units: Subjects			
< 65	66	19	85

#### Adverse events

#### **Adverse events information**

Timeframe for reporting adverse events:

Adverse Events (AEs) were collected from Visit 1 (Week -8) over the BRV Add-On Period and Evaluation Period up to the end of the Re-conversion Follow-up Period (Week 23).

Adverse event reporting additional description:

Adverse Events refer to the Intention-to-Treat (ITT) Set consisting of all randomized subjects with at least one intake of study medication.

Assessment type	Non-systematic
Dictionary used	
Dictionary name	MedDRA
Dictionary version	13.0

## **More information**

## Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
04 April 2008	Protocol Amendment 1 was finalized on 04 Apr 2008, before any subjects were enrolled, and resulted in the following:  • Replacement of the option for enrollment in N01199 and N01125 with the option of enrollment in N01315. This change was based on feedback received from ethics committees and regulatory authorities in some European countries.  • Revision of the methods for handling missing data in acknowledgement of the fact that no details were known regarding the way missing data were handled, if at all, in the historical-control studies. Thus, the application of any imputation rule for the assessment of Exit Criterion 2 during the study (and implemented in the study EDC system) leading to subjects being prematurely or incorrectly exited from the study was avoided. Final sensitivity analyses were to include these revised methods. The possibility for the Investigator exiting subjects on the basis of Exit Criterion 4 was considered an adequate safeguard against subjects remaining too long in the study if missing data interfered with the assessment of Exit Criterion 1 or 2.
04 April 2008	Protocol Amendment 1 was finalized on 04 Apr 2008, before any subjects were enrolled, and resulted in the following:  • Addition of text describing randomization stratification by region to provide clarity with regard to the percentage of the subjects anticipated for enrollment in the US.  • Clarification that the total duration of the Baseline Period was 8 weeks +/-1 week.  • Replacement of exclusion criteria referring to "clusters" of seizures with "seizure patterns being too frequent or indistinctively separated to reliably be counted" in order to more clearly define the term "clusters."  • Addition of a recommendation for the sites to call subjects weekly to promote good completion of the subject diary. Text referring to this recommendation was added to the Informed Consent.  • Replacement of the interactive voice response system (IVRS) with EDC for screening subjects. This change was made in accordance with recommendations of the IVRS and Seizure Frequency EDC system provider.  • Replacement of the subject's daily record card (DRC) with the CRF as the location for recording the "Investigator Seizure Assessment."  • Correction of typographical errors.

02 November 2009	Protocol Amendment 2 was finalized on 02 Nov 2009, and resulted in the following:  • Addition of a recruitment hold and interim analysis. This change was motivated by ongoing monitoring that suggested a higher than expected number of subjects discontinuing either for predefined exit criteria or other reasons. The interim analysis was to include efficacy information for all subjects who had an opportunity to complete 112 days of treatment after initiation of concomitant AED tapering by the time of the defined clinical cut-off date.  • Establishment of an IDMC to review primary efficacy, sensitivity, and safety date for the purpose of making a recommendation to the Sponsor regarding study continuation.  • Elimination of the requirement for restricted database access of the study team before approval of the final Statistical Analysis Plan (SAP) in accordance UCB Standard Operating Procedures (SOPs) revised subsequent to study initiation. Due to this change and because the primary efficacy analysis was fully specified in the original and amended protocols, this requirement was eliminated from this protocol.  • Updates of UCB study personnel and the List of Abbreviations.  Following the recruitment hold, a decision was made to require subjects who were in the Baseline Period, the BRV Add-On Period, and the AED Tapering Phase to terminate the study. Subjects who had already progressed to the Monotherapy Phase were permitted to remain in the study.
16 November 2009	Protocol Amendment 3 was finalized on 16 Nov 2009 (after the recruitment hold) and resulted in the following:  • Provision for enrollment in N01315 for subjects discontinued from the BRV Add-On Period or the Baseline AED Tapering Phase due to recruitment hold and interim analysis. This enrollment option was made available to provide continued treatment with BRV to these subjects as deemed beneficial by both subjects and Investigators.  • Correction of an error in Amendment 2 that placed information pertaining to database access and SAP finalization in an incorrect section of the protocol.

Notes:

## **Interruptions (globally)**

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
	Concerning high discontinuation rate and subsequent determination of low probabilty of success (eg, criteria for futility were met).	-

Notes:

## **Limitations and caveats**

None reported
