

Clinical trial results:

Double blind, randomized, placebo-controlled, parallel group study to evaluate the effect of a 4-week treatment with oral doses of MEN15596 in irritable bowel syndrome.

Summary

EudraCT number	2008-000214-71
Trial protocol	GB ES SK LV DE DK IT
Global end of trial date	18 February 2009

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 March 2010
Is this the analysis of the primary completion data?	Yes
Primary completion date	18 February 2009
Global end of trial reached?	Yes
Global end of trial date	18 February 2009
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the efficacy of three doses of MEN 15596 on IBS symptoms relief as compared to placebo in the broad population of irritable bowel syndrome (IBS) patients following a 4 week oral treatment.

Protection of trial subjects:

If any event(s) related to the conduct of the study or the development of the IMP which affected the safety of the study participants, the sponsor and the investigator were to take appropriate urgent safety measures to protect the patients against any immediate hazard. The CAs and IRB/ECs were to be informed forthwith about these new events and the measures taken. For patients participating in the study, the Sponsor had stipulated an insurance policy in accordance with local regulatory requirements.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	15 July 2008
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	1 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Slovakia: 22
Country: Number of subjects enrolled	Spain: 17
Country: Number of subjects enrolled	United Kingdom: 52
Country: Number of subjects enrolled	Denmark: 148
Country: Number of subjects enrolled	Germany: 80
Country: Number of subjects enrolled	Italy: 3
Country: Number of subjects enrolled	Latvia: 72
Country: Number of subjects enrolled	Russian Federation: 72
Country: Number of subjects enrolled	Ukraine: 88
Worldwide total number of subjects	554
EEA total number of subjects	394

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	508
From 65 to 84 years	46
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

First patient in (screening) 15th July 2008, last patient out 18th February 2009.

Pre-assignment

Screening details:

The study design included a 2-week run-in period, starting from Screening on Day -14 until Day - 1 (start of the treatment).

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Placebo oral film-coated tablet, (three tablets), once daily in the morning.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo oral film-coated tablet, (three tablets), once daily in the morning.

Arm title	Ibodontant 10mg
------------------	-----------------

Arm description:

Ibodontant 10mg, oral film-coated tablet, three tablets (one ibodontant 10 mg tablet plus two placebo tablets), once daily in the morning.

Arm type	Experimental
Investigational medicinal product name	Ibodontant
Investigational medicinal product code	MEN15596
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Ibodontant 10 mg: oral film-coated tablet, three tablets (one ibodontant 10 mg tablet plus two placebo tablets), once daily in the morning.

Arm title	Ibodontant 30mg
------------------	-----------------

Arm description:

Ibodontant 30mg, oral film-coated tablet, three tablets (one ibodontant 30 mg tablet plus two placebo tablets), once daily in the morning.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Ibodutant
Investigational medicinal product code	MEN15596
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Ibodutant 30mg, oral film-coated tablet, three tablets (one ibodutant 30 mg tablet plus two placebo tablets), once daily in the morning.

Arm title	Ibodutant 60mg
------------------	----------------

Arm description:

Ibodutant 60mg, oral film-coated tablet, three tablets (one ibodutant 60 mg tablet plus two placebo tablets), once daily in the morning.

Arm type	Experimental
Investigational medicinal product name	Ibodutant
Investigational medicinal product code	MEN15596
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Ibodutant 60mg, oral film-coated tablet, three tablets (one ibodutant 60 mg tablet plus two placebo tablets), once daily in the morning.

Number of subjects in period 1^[1]	Placebo	Ibodutant 10mg	Ibodutant 30mg

Completed	114	117	112
Not completed	22	23	21
Protocol deviation	22	23	21

Number of subjects in period 1^[1]	Ibodutant 60mg
Started	135
Completed	112
Not completed	23
Protocol deviation	23

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Overall, 763 patients were screened. Among them, 554 were randomised to receive the study drug and therefore considered as enrolled. 3 patients did not take any dose of study drug, and 7 more patients who did take medication withdrew their consent. Intention to treat (ITT) population was composed of 544 patients. ITT were all patients of the Safety population who had at least one response to the binary question after randomisation.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 October 2008	There were 3 protocol amendments but just one of them was substantial to the Final Protocol (Amendment nº 3) that affected the conditions for subject's participation in the trial, the Patient Information Leaflet/Informed Consent Form (PIL/ICF) was accordingly amended to incorporate this modification and participating subjects were required to consider and sign the amended version indicating that they re-consented to participate in the trial.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
