##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 October 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 October 2015
Global end of trial reached?	Yes
Global end of trial date	21 October 2015
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

This is a 6-month, open-label, flexible-dose study evaluating desvenlafaxine succinate sustained release (DVS SR) in the treatment of child and adolescent outpatients with major depressive disorder (MDD) to evaluate safety, tolerability and efficacy of DVS SR.

Protection of trial subjects:

The study was conducted in accordance with legal and regulatory requirements, as well as the general principles set forth in the International Ethical Guidelines for Biomedical Research Involving Human Subjects (Council for International Organizations of Medical Sciences 2002), Guidelines for Good Clinical Practice (ICH 1996), and the Declaration of Helsinki (World Medical Association 1996 and 2008).

Evidence of a personally signed and dated informed consent and assent documents indicating that the subject and a legally acceptable representative were informed of all pertinent aspects of the study was required.

The investigator was to inform Pfizer immediately of any urgent safety measures taken by the investigator to protect the study subjects against any immediate hazard, and of any serious breaches of this protocol or of ICH GCP that the investigator became aware of.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 February 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Mexico: 28
Country: Number of subjects enrolled	United States: 240
Worldwide total number of subjects	268
EEA total number of subjects	0

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	108
Adolescents (12-17 years)	160
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Subjects who completed the 8-week, double-blind treatment phase of Desvenlafaxine Succinate Sustained Release (DVS SR B2061014 and completed the 1-week transition phase (week 9) of the short-term study were eligible to participate in this study (DVS SR B2061031).

### Pre-assignment

Screening details:

Subjects met all eligibility requirements at the Baseline visit prior to randomization.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Placebo / DVS SR

Arm description:

Placebo in previous study B2061014 / DVS SR flexible dose 20 mg – 50 mg in extension study B2061031

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

placebo plus DVS SR flexible dose 20 mg – 50 mg

<b>Arm title</b>	Fluoxetine / DVS SR
------------------	---------------------

Arm description:

Fluoxetine 20 mg in previous study B2061014 /DVS SR flexible dose 20 mg – 50 mg in extension study B2061031

Arm type	Experimental
Investigational medicinal product name	Fluoxetine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Fluoxetine plus DVS SR flexible dose 20 mg – 50 mg

<b>Arm title</b>	Desvenlafaxine Succinate Sustained Release / DVS SR
------------------	---

Arm description:

DVS SR weight based (25 mg, 35 mg, 50 mg) in previous study B2061014 / DVS SR flexible dose 20 mg – 50 mg in extension study B2061031

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Desvenlafaxine Succinate Sustained Release
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Desvenlafaxine Succinate Sustained Release plus DVS SR flexible dose 20 mg – 50 mg

Number of subjects in period 1	Placebo / DVS SR	Fluoxetine / DVS SR	Desvenlafaxine Succinate Sustained Release / DVS SR
Started	87	89	92
Completed	59	65	62
Not completed	28	24	30
Consent withdrawn by subject	5	7	11
Adverse event, non-fatal	5	4	5
Not specified	2	3	-
Lost to follow-up	8	2	6
Protocol deviation	6	4	5
Lack of efficacy	2	4	3

## Baseline characteristics

### Reporting groups

Reporting group title	Placebo / DVS SR
Reporting group description: Placebo in previous study B2061014 / DVS SR flexible dose 20 mg – 50 mg in extension study B2061031	
Reporting group title	Fluoxetine / DVS SR
Reporting group description: Fluoxetine 20 mg in previous study B2061014 /DVS SR flexible dose 20 mg – 50 mg in extension study B2061031	
Reporting group title	Desvenlafaxine Succinate Sustained Release / DVS SR
Reporting group description: DVS SR weight based (25 mg, 35 mg, 50 mg) in previous study B2061014 / DVS SR flexible dose 20 mg – 50 mg in extension study B2061031	

Reporting group values	Placebo / DVS SR	Fluoxetine / DVS SR	Desvenlafaxine Succinate Sustained Release / DVS SR
Number of subjects	87	89	92
Age categorical Units: Subjects			
Children (2-11 years)	35	38	35
Adolescents (12-17 years)	52	51	57
Age Continuous   Units: years			
arithmetic mean	12.5	12.4	12.8
standard deviation	± 2.9	± 3.01	± 3.14
Gender, Male/Female			
Safety population - included all randomized participants who received at least 1 dose of study drug. Total = sum across Arm/Groups = Combination of 3 groups from previous study B2061014 who received DVS SR flexible dose 20 mg – 50 mg in extension study B2061031.			
Units: Participants			
Female	47	39	49
Male	40	50	43

Reporting group values	Total		
Number of subjects	268		
Age categorical Units: Subjects			
Children (2-11 years)	108		
Adolescents (12-17 years)	160		
Age Continuous   Units: years			
arithmetic mean			
standard deviation	-		
Gender, Male/Female			
Safety population - included all randomized participants who received at least 1 dose of study drug. Total = sum across Arm/Groups = Combination of 3 groups from previous study B2061014 who received DVS SR flexible dose 20 mg – 50 mg in extension study B2061031.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events (AEs) recorded from informed consent and assent through Week 30 and Serious Adverse events (SAEs) collected through Week 32 visit. Participants discontinuing prior to Week 28 visit, AEs collected for 14 days and SAEs for 28 days.

Adverse event reporting additional description:

The same event may appear as both an AE and an SAE. However, what is presented are distinct events. An event may be categorized as serious in 1 participant and as non-serious in another participant, or 1 participant may have experienced both a serious and non-serious event during the study.

Assessment type	Non-systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 July 2011	Provided clarification for: dosing rationale, additional labeling on study drug packaging, informed consent text revised, added methaqualone to UDS testing, change in study drug blister packaging, deleted investigational procedures from Prohibited Concomitant Treatment.
22 May 2013	Combined / clarified efficacy endpoints. Deleted Final On-Therapy Visit reference. Clarified omission of taper. Updated Schedule of activities: study visit naming conventions and out of window wording; subjects who do not taper wording, comprehensive psychiatric evaluation information collected, risk assessment wording. Inclusion/Exclusion criteria updated: "legally acceptable representative" changed to "legal guardian", contraception requirements and definition of childbearing were clarified, length of time for post-study contraception was updated. Subjects requiring a prohibited medication to control a medical condition should not be enrolled, suicidal ideation exclusion and history of suicide behavior exclusion since last visit and risk assessment wording. Medication error section was added and protocol sponsor qualified medical personnel section, rater qualifications, and storage requirement text. Permitted and prohibited concomitant treatments were modified. Subject withdrawal to include those who could not comply with scheduled or required procedures, instruction for lost to follow-up subjects, risk assessment wording. Clarified: study visit schedule for subjects that did not taper, Hy's Law criteria, causality assessment definition (AEs), reporting of exposures in utero. Clarification regarding review of available laboratory/ECG results before randomization. Assessments updated : CRF be completed, weight be measured without shoes; requirement to a recommendation for BP measurement timing, additional details for pregnancy testing, fasting status recommendations, microscopic analysis, types of sympathomimetic drugs, provision of guidance materials text and rater requirements / training, requirements for risk assessment and discontinuation, added risk assessment, added vendor information, deleted End of Trial in a Member State section, added the table of diagnostician and rater requirements.

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
