## General information about the trial

Main objective of the trial:

The primary objectives of this study were to evaluate the efficacy (endoscopic/histological healing) and safety of 2 dose levels (0.5 milligram per kilogram (mg/kg) [10 mg max dose] and 1.0 mg/kg [20 mg max dose]) of a pediatric bead formulation of rabeprazole sodium (which can be administered orally mixed with food as needed) in a 12-week, parallel-group, double-blind design followed by a long-term safety and efficacy assessment in a 24-week, double-blind maintenance treatment phase in subjects, 1 to 11 years of age, with endoscopically proven Gastroesophageal Reflux Disease (GERD).

Protection of trial subjects:

An Independent Data Safety Monitoring Board (DSMB) was commissioned for the study as well as for the whole pediatric program, and monitored serious adverse events (SAEs), subject withdrawals, and other safety data. Safety variables included adverse events (AEs), clinical laboratory tests, and urinalysis, vital sign measurements (Oral or tympanic temperature, pulse and respiration rate, diastolic and systolic blood pressure measurement), physical examinations (including body weight and height), and Tanner Staging.

## Subject disposition

### Recruitment

Recruitment details:

In the study, 127 subjects were enrolled at 30 sites from 8 countries.

### Pre-assignment

Screening details:

In the study, 108 subjects completed the 12-week phase (Part 1) and were counted for the primary outcome measure (OM). Subjects with healing at Week 12 had the option to continue the treatment for 24 weeks. Among the 87 with healing, 64 enrolled into Part 2. Only 52 had the primary efficacy endpoint available and were included in the primary OM

### Period 1

Period 1 title	Short-term Double-blind Phase (Part 1)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes

## Secondary: The Change From Baseline in the Hetzel and Dent Endoscopic Classification Grade Score (Short-term Double-blind Treatment Phase)

End point title	The Change From Baseline in the Hetzel and Dent Endoscopic Classification Grade Score (Short-term Double-blind Treatment Phase)
-----------------	---

End point description:

The Hetzel and Dent Classification grades range from 0 (normal esophageal mucosa, no abnormalities noted) to 4 (deep ulcers anywhere in the esophagus or ulceration of more than half of the esophageal mucosa). Higher observed scores indicate more serious condition. For change of baseline, a score of 0 indicates no change; a positive score indicates the condition is worsening, while a negative score indicates an improvement. ITT analysis set included all participants randomized into the study and who had at least 1 postbaseline efficacy measurement.

End point title	The Change From Baseline in the Total Gastroesophageal Reflux Disease (GERD) Symptom and Severity Score (Short-term Double-blind Treatment Phase)

The GERD symptom and severity scale measures the frequency (0= Never; 1= 1-2 times; 2= 3-4 times; 3= 5-6 times; 4= 7 or more times) and the severity (1= Mild; 2= Moderate; 3=Severe) of GERD symptoms. The score is defined as the sum of the frequency (0-4) and severity (1-3) of that symptom. The total score is the sum of the scores of all the symptoms and ranges from 12 to 84. Higher scores indicate more serious condition. For change from baseline, 0 indicates no change; a positive score indicates worsening and negative score indicates improvement. ## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 December 2008	The overall reason for the amendment INT-1 was to allow assent to the informed consent process (as minors were included in the study), to add updated information, and to correct textual inconsistencies within the protocol.
05 March 2009	The overall reason for the amendment INT-2 was to extend the end of study visit window and to expand the list of antacids allowed during the study; several sections also were revised to provide further text clarification.
