| Is this the analysis of the primary completion data? | Yes |
| Primary completion date | 30 November 2011 |
| Global end of trial reached? | Yes |
| Global end of trial date | 30 November 2011 |
| Was the trial ended prematurely? | No |

Notes:

General information about the trial

Main objective of the trial:

Das primäre Ziel der Studie ist, den Einfluss genetischer Polymorphismen im CYP2D6-Gen auf die Wirkstoffkonzentration im Plasma der Acetylcholinesterase-inhibitoren Donezepil und Rivastigmin zu untersuchen.

Protection of trial subjects:

Es ist einmalig ein Mundhöhlenabstrich für die genetische Untersuchung notwendig.

Background therapy:

Evidence for comparator:

-

| | |
|-----------------------------------------------------------|---------------|
| Actual start date of recruitment | 31 March 2009 |
| Long term follow-up planned | No |
| Independent data monitoring committee (IDMC) involvement? | No |

Notes:

Population of trial subjects

Subjects enrolled per country

| | |
|--------------------------------------|--------------|
| Country: Number of subjects enrolled | Austria: 126 |
| Worldwide total number of subjects | 126 |
| EEA total number of subjects | 126 |

Notes:

Subjects enrolled per age group

| | |
|-------------------------------------------|----|
| In utero | 0 |
| Preterm newborn - gestational age < 37 wk | 0 |
| Newborns (0-27 days) | 0 |
| Infants and toddlers (28 days-23 months) | 0 |
| Children (2-11 years) | 0 |
| Adolescents (12-17 years) | 0 |
| Adults (18-64 years) | 5 |
| From 65 to 84 years | 90 |
| 85 years and over | 31 |

Subject disposition

Recruitment

Recruitment details:

Die Rekrutierung der Demenzpatienten erfolgt über die Universitätsklinik für Psychiatrie Innsbruck, (zum Hauptanteil über die Gedächtnissprechstunde), die bereits über ein großes und gut untersuchtes Patientenkollektiv verfügt.

Pre-assignment

Screening details:

Inkludiert werden geschäftsfähige Patienten mit der Diagnose einer Demenz vom Alzheimer Typ oder gemischt vaskulärem Typ. Vor Studieneinschluss erfolgt ein ausführliches Informationsgespräch bzw. eine genetische Aufklärung.

Period 1

| | |
|------------------------------|-----------------------------|
| Period 1 title | Behandlung (overall period) |
| Is this the baseline period? | Yes |
| Allocation method | Not applicable |
| Blinding used | Not blinded |

Arms

| | |
|----------------------------------------|---------------------------|
| Arm title | Behandlung |
| Arm description: - | |
| Arm type | Experimental |
| Investigational medicinal product name | Aricept 5mg-Filmtabletten |
| Investigational medicinal product code | |
| Other name | Donepezil Hydrochloride |
| Pharmaceutical forms | Tablet |
| Routes of administration | Oral use |

Dosage and administration details:

Nach einer klinischen Beurteilung der Behandlung mit 5 mg/Tag nach einem Monat kann die Aricept-Dosis bei Bedarf auf 10 mg/Tag (einmal tägliche Gabe) erhöht werden. Die empfohlene Maximaldosis beträgt 10 mg/Tag.

| | |
|----------------------------------------|----------------------------|
| Investigational medicinal product name | Aricept 10mg-Filmtabletten |
| Investigational medicinal product code | |
| Other name | Donepezil Hydrochloride |
| Pharmaceutical forms | Tablet |
| Routes of administration | Oral use |

Dosage and administration details:

Nach einer klinischen Beurteilung der Behandlung mit 5 mg/Tag nach einem Monat kann die Aricept-Dosis bei Bedarf auf 10 mg/Tag (einmal tägliche Gabe) erhöht werden. Die empfohlene Maximaldosis beträgt 10 mg/Tag.

| | |
|----------------------------------------|---------------------------|
| Investigational medicinal product name | Reminyl 4mg-Filmtabletten |
| Investigational medicinal product code | |
| Other name | Galantamine Hydrobromide |
| Pharmaceutical forms | Tablet |
| Routes of administration | Oral use |

Dosage and administration details:

Initialdosis: 4 mg 2mal / Tag, über 4 Wochen

anfängliche Erhaltungsdosis : 8 mg 2mal / Tag; über mind. 4 Wochen

gesteigerte Erhaltungsdosis: 12 mg 2mal / Tag; individuell nach sorgfältiger Beurteilung der Behandlung im Hinblick auf therapeutischen Nutzen und Verträglichkeit

reduzierte Erhaltungsdosis: 16 mg / Tag; bei einzelnen Patienten, die bei Gabe von 24 mg / Tag keine erhöhte Ansprechrates zeigen oder die diese Dosis nicht vertragen

| | |
|----------------------------------------|----------------------------|
| Investigational medicinal product name | Reminyl 8 mg-Filmdabletten |
| Investigational medicinal product code | |
| Other name | Galantamine Hydrobromide |
| Pharmaceutical forms | Tablet |
| Routes of administration | Oral use |

Dosage and administration details:

Die Behandlung wird mit der 8-mg-Hartkapsel, die einmal täglich eingenommen wird, begonnen. Nach 4 Behandlungswochen wird die Dosis erhöht. Dann wird die 16-mg-Hartkapsel einmal täglich eingenommen. Frühestens nach weiteren 4 Behandlungswochen kann die Dosis auf 24-mg einmal täglich erhöht werden.

| | |
|----------------------------------------|-------------------------------------------------|
| Investigational medicinal product name | Exelon 4,6 mg/24 Stunden transdermales Pflaster |
| Investigational medicinal product code | |
| Other name | Rivastigmine |
| Pharmaceutical forms | Transdermal patch |
| Routes of administration | Transdermal use |

Dosage and administration details:

Normalerweise beginnt die Behandlung mit Exelon 4,6 mg/24 Stunden.

Die empfohlene übliche Tagesdosis ist Exelon 9,5 mg/24 Stunden. Wird sie gut vertragen, kann der behandelnde Arzt eine Erhöhung der Dosis auf 13,3 mg/24 Stunden in Betracht ziehen.

Ein Pflaster wird pro Tag angewendet.
