**Results analysis stage**

---

|  |                  |
|--|------------------|
| Analysis stage                                       | Final            |
| Date of interim/final analysis                       | 13 December 2013 |
| Is this the analysis of the primary completion data? | No               |
| Global end of trial reached?                         | Yes              |
| Global end of trial date                             | 27 October 2014  |
| Was the trial ended prematurely?                     | No               |

Notes:

---

**General information about the trial**

---

Main objective of the trial:

The primary objective of this study is to determine the objective response rate in patients with peripheral T cell lymphoma who are treated with belinostat monotherapy.

Protection of trial subjects:

Informed Consent Form was used to ensure all participation is voluntary and study subjects are aware of their right, including personal health information privacy. Clinical monitoring visits were conducted throughout the life of study to ensure study patient safety are continuously monitored and protected. The assigned medical monitor also reviewed the data on frequent basis to ensure that all safety data are adequately monitored and issues addressed timely.

Background therapy: -

Evidence for comparator: -

|   |                  |
|---|------------------|
| Actual start date of recruitment                          | 15 December 2008 |
| Long term follow-up planned                               | No               |
| Independent data monitoring committee (IDMC) involvement? | No               |

| Worldwide total number of subjects   | 129               |
| EEA total number of subjects         | 78                |

Notes:

| <b>Subjects enrolled per age group</b>    |    |
|---|----|
| In utero                                  | 0  |
| Preterm newborn - gestational age < 37 wk | 0  |
| Newborns (0-27 days)                      | 0  |
| Infants and toddlers (28 days-23 months)  | 0  |
| Children (2-11 years)                     | 0  |
| Adolescents (12-17 years)                 | 0  |
| Adults (18-64 years)                      | 67 |
| From 65 to 84 years                       | 62 |
| 85 years and over                         | 0  |

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Patients with relapsed or refractory T-Cell lymphoma must sign consent and meet all Inclusion/Exclusion criteria

### Period 1

|                              |                                |
|------------------------------|--------------------------------|
| Period 1 title               | Overall Trial (overall period) |
| Is this the baseline period? | Yes                            |
| Allocation method            | Not applicable                 |
| Blinding used                | Not blinded                    |

### Arms

|  |   |
|--|---|
| Arm title                              | Belinostat  |
| Arm description: -                     |   |
| Arm type                               | Experimental                                      |
| Investigational medicinal product name | Belinostat  |
| Investigational medicinal product code |   |
| Other name                             |   |
| Pharmaceutical forms                   | Concentrate and solvent for solution for infusion |
| Routes of administration               | Intravenous use                                   |

Dosage and administration details:

1000 mg/m<sup>2</sup> of Belinostat administered as a 30 minutes IV infusion on days 1-5 of every 3-week cycle

| Number of subjects in period 1 | Belinostat |
|--------------------------------|------------|
| Started                        | 129        |
| Completed                      | 129        |

## Baseline characteristics

### Reporting groups

### Primary: Objective Response Rate

|                 |  |
|-----------------|--|
| End point title | Objective Response Rate <sup>[1]</sup> |
|-----------------|--|

End point description:

Overall study duration from first dose until 2 years after the first dose. Objective response rate was defined as the percentage of patients with a complete response or a partial response according to IWG criteria. Response was assessed on the basis of clinical and radiological criteria. In addition to the primary analysis of response by central radiographic and clinical review by the IRC, the response assessment was also determined by the local Investigators. As pre-defined, the primary endpoint analysis for this study was based on the IRC assessment of response.

|                |         |

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

25 months. Patients must be carefully monitored for all adverse events that occur from the time Informed Consent is obtained until 30 days after the last study drug administration.

Reporting group description:

Overall description of adverse events in CLN-19 trial.

| Serious adverse events  | Full Patient Population |  |  |
|---|-------------------------|--|--|
| Total subjects affected by serious adverse events                   |                         |  |  |
| subjects affected / exposed   | 61 / 129 (47.29%)       |  |  |
| number of deaths (all causes)                                       | 14                      |  |  |
| number of deaths resulting from adverse events                      | 14                      |  |  |
| Neoplasms benign, malignant and unspecified (incl cysts and polyps) |                         |  |  |
| Tumour associated fever   |                         |  |  |
| subjects affected / exposed   | 1 / 129 (0.78%)         |  |  |
| occurrences causally related to treatment / all                     | 0 / 1                   |  |  |
| deaths causally related to treatment / all                          | 0 / 0                   |  |  |
| Tumour haemorrhage  |                         |  |  |
| subjects affected / exposed   | 1 / 129 (0.78%)         |  |  |
| occurrences causally related to treatment / all                     | 0 / 1                   |  |  |
| deaths causally related to treatment / all                          | 0 / 0                   |  |  |
| Vascular disorders  |                         |  |  |
| Deep vein thrombosis  |                         |  |  |
| subjects affected / exposed   | 3 / 129 (2.33%)         |  |  |
| occurrences causally related to treatment / all                     | 1 / 3                   |  |  |
| deaths causally related to treatment / all                          | 0 / 0                   |  |  |
| Hypotension   |                         |  |  |

|  |                 |  |  |
|--|-----------------|--|--|
| subjects affected / exposed                          | 2 / 129 (1.55%) |  |  |
