

## Clinical trial results:

### RAMSETE: A single arm, multicenter, single-stage phase II trial of RAD001 in Advanced and Metastatic Silent neuro-Endocrine Tumors in Europe

#### Summary

EudraCT number	2008-006182-88
Trial protocol	SE DE GB ES NL IT
Global end of trial date	07 November 2016

#### Results information

Result version number	v1 (current)
This version publication date	22 November 2017
First version publication date	22 November 2017

#### Trial information

##### Trial identification

Sponsor protocol code	CRAD001CDE16
-----------------------	--------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT00688623
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Novartis Pharma AG
Sponsor organisation address	CH-4002, Basel, Switzerland,
Public contact	Clinical Disclosure Office, Novartis Pharma AG, 41 613241111, Novartis.email@novartis.com
Scientific contact	Clinical Disclosure Office, Novartis Pharma AG, 41 613241111, Novartis.email@novartis.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 November 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 November 2016
Global end of trial reached?	Yes
Global end of trial date	07 November 2016
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The main objective of the trial was to evaluate the efficacy of everolimus as monotherapy in patients with non-syndromic NETs. Efficacy is defined as the proportion of patients with a complete (CR) or partial response (PR) according to RECIST criteria

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 June 2009
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 19
Country: Number of subjects enrolled	Italy: 11
Country: Number of subjects enrolled	Poland: 2
Country: Number of subjects enrolled	Spain: 15
Country: Number of subjects enrolled	Sweden: 4
Country: Number of subjects enrolled	Netherlands: 6
Country: Number of subjects enrolled	United Kingdom: 16
Worldwide total number of subjects	73
EEA total number of subjects	73

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	44
From 65 to 84 years	29
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Eight-two patients were screened and 73 were treated with study drug.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

<b>Arm title</b>	Everolimus
------------------	------------

Arm description:

10 mg/day dose of everolimus was given by continuous oral daily dosing of two 5 mg tablets

Arm type	Experimental
Investigational medicinal product name	Everolimus
Investigational medicinal product code	RAD001
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

two 5 mg tablets of everolimus orally once daily

Number of subjects in period 1	Everolimus
Started	73
Safety analysis set	73
Per protocol (PP)	60
Completed	18
Not completed	55
Adverse event, serious fatal	3
Consent withdrawn by subject	4
Adverse event, non-fatal	22
disease progression	23
abnormal lab value	1
Protocol deviation	2

## Baseline characteristics

### Reporting groups

Reporting group title	Everolimus
-----------------------	------------

Reporting group description:

10 mg/day dose of everolimus was given by continuous oral daily dosing of two 5 mg tablets

Reporting group values	Everolimus	Total	
Number of subjects	73	73	
Age categorical			
Units: Subjects			
In utero		0	
Preterm newborn infants (gestational age < 37 wks)		0	
Newborns (0-27 days)		0	
Infants and toddlers (28 days-23 months)		0	
Children (2-11 years)		0	
Adolescents (12-17 years)		0	
Adults (18-64 years)		0	
From 65-84 years		0	
85 years and over		0	
Age Continuous			
Units: years			
arithmetic mean	59.9		
standard deviation	± 13.0	-	
Gender, Male/Female			
Units: Subjects			
Female	33	33	
Male	40	40	
Tumor histology/cytology			
Units: Subjects			
Bronchial (thymic) carcinoid -typical	9	9	
Bronchial (thymic) carcinoid - atypical	12	12	
Neuroendocrine tumor	16	16	
Neuroendocrine carcinoma	36	36	
Time since first diagnosis			
Units: Subjects			
< 1 year	19	19	
1 year to < 3 years	26	26	
3 years to < 6 years	17	17	
6 years to < 10 years	3	3	
≥ 10 years	6	6	
Missing	2	2	
Race/Ethnicity, Customized			
Units: Subjects			
Caucasian	71	71	
Other	2	2	

## End points

### End points reporting groups

Reporting group title	Everolimus
Reporting group description: 10 mg/day dose of everolimus was given by continuous oral daily dosing of two 5 mg tablets	

### Primary: Percentage of participants' Best Overall Response Rate - Per Protocol Set (PP)

End point title	Percentage of participants' Best Overall Response Rate - Per Protocol Set (PP) <sup>[1]</sup>
-----------------	---

End point description:

Overall response rate (ORR) was based on RECIST central assessment and defined as the percentage of patients with best overall response (BOR) of a confirmed complete response (CR) or partial response (PR). The BOR was calculated on basis of the tumor or overall lesion response evaluated at each visit. To be assigned a status of PR or CR, changes in tumor measurements had to be confirmed by repeat assessments obtained within 4 weeks after the criteria for response were first met. Assessments was based on RECIST criteria 1.0. Measurable disease lesions had to be accurately measured in at least one dimension with longest diameter  $\geq 20$  mm using conventional techniques or  $\geq 10$  mm with spiral CT scan (with minimum lesion size no less than double the slice thickness). PR required at least a 30% decrease in the sum of the longest diameter of all target lesions, taking as reference the baseline sum of the longest diameters. CR required disappearance of all target and non-target lesions.

End point type	Primary
----------------	---------

End point timeframe:

baseline up to approximately 24 months

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was done.

End point values	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	60			
Units: percentage of participants				
number (not applicable)				
Complete response (CR)	0.0			
Partial response	0.0			
Stable disease (SD)	56.7			
Progressive disease (PD)	43.3			
Unknown	0.0			

### Statistical analyses

No statistical analyses for this end point

### Primary: Percentage of participants with Objective Response Rate - Per Protocol Set (PP)

End point title	Percentage of participants with Objective Response Rate - Per Protocol Set (PP) <sup>[2]</sup>
-----------------	--

End point description:

Overall Response Rate (ORR) was calculated for total PP population based on central review as confirmatory, primary analysis as well as for ITT population as sensitivity analysis. It was presented with relative frequencies and the exact 2-sided 80% confidence limit (CL; computed using the Clopper-Pearson method). If the lower limit of the CI did not include  $p_0=5\%$ , the hypothesis that  $p \leq 5\%$  was rejected. The primary analysis was based on the PP Set

End point type	Primary
----------------	---------

End point timeframe:

baseline up to approximately 12 months

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was done.

End point values	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	60			
Units: percentage of participants				
number (confidence interval 80%)	0.0 (0.0 to 3.8)			

## Statistical analyses

No statistical analyses for this end point

### Primary: Percentage of participants with a Overall Response Rate with a complete response (CR) or partial response (PR) ITT set

End point title	Percentage of participants with a Overall Response Rate with a complete response (CR) or partial response (PR) ITT set <sup>[3]</sup>
-----------------	---

End point description:

The best overall response (BOR) was calculated on basis of the tumor of overall lesion response evaluated at each visit. To be assigned a status of PR or CR, changes in tumor measurements had to be confirmed by repeat assessments that should have been performed not less than 4 weeks after the criteria for response were first met. Assessments was based on RECIST criteria 1.0. Measurable disease lesions had to be accurately measured in at least one dimension with longest diameter  $\geq 20$  mm using conventional techniques or  $\geq 10$  mm with spiral CT scan (with minimum lesion size no less than double the slice thickness). PR required at least a 30% decrease in the sum of the longest diameter of all target lesions, taking as reference the baseline sum of the longest diameters. CR required disappearance of all target and non-target lesions.

End point type	Primary
----------------	---------

End point timeframe:

baseline up to approximately 12 months

Notes:

[3] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was done.

End point values	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	73			
Units: percentage of participants				
number (not applicable)				
Complete response (CR)	0.0			
Partial response	0.0			

Stable disease (SD)	74.0			
Progressive disease (PD)	16.4			
Unknown	9.6			

## Statistical analyses

No statistical analyses for this end point

### Primary: Percentage of participants with Objective Response Rate - ITT Set

End point title	Percentage of participants with Objective Response Rate - ITT Set <sup>[4]</sup>
-----------------	--

End point description:

Overall Response Rate (ORR) was presented for ITT population as sensitivity analysis. It was presented with relative frequencies and the exact 2-sided 80% confidence limit (CL; computed using the Clopper-Pearson method). If the lower limit of the CI did not include  $p_0=5\%$ , the hypothesis that  $p \leq 5\%$  was rejected.

End point type	Primary
----------------	---------

End point timeframe:

baseline up to approximately 12 months

Notes:

[4] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analysis was done.

<b>End point values</b>	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	73			
Units: percentage of participants				
number (confidence interval 80%)	0.0 (0.0 to 3.1)			

## Statistical analyses

No statistical analyses for this end point

### Secondary: Percentage of participants with Disease Control Rate (DCR) for Per Protocol (PP) and ITT sets

End point title	Percentage of participants with Disease Control Rate (DCR) for Per Protocol (PP) and ITT sets
-----------------	---

End point description:

DCR was based on central radiologic review and is defined as the percentage of patients with a best overall response of 'Complete response' (CR), 'Partial response' (PR) or 'Stable disease' (SD). Relative frequencies together with their exact 2-sided 80% confidence intervals were presented

End point type	Secondary
----------------	-----------

End point timeframe:

baseline up to approximately 12 months

<b>End point values</b>	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	73			
Units: percentage of participants				
number (confidence interval 80%)				
DCR for Per protocol set (60)	56.7 (47.6 to 65.4)			
DCR for Intent to treat set (73)	50.7 (42.6 to 58.8)			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Percentage of participants' biochemical response rate based on the tumor marker Chromogranin A (CgA)

End point title	Percentage of participants' biochemical response rate based on the tumor marker Chromogranin A (CgA)
End point description:	
Biochemical response was defined as level and change from baseline in CgA during the course of the trial. The resulting values showed a high variation and were not interpretable, as different methodology was used for the assessment of CgA at the individual centers.	
End point type	Secondary
End point timeframe:	
baseline up to approximately 12 months	

<b>End point values</b>	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	0 <sup>[5]</sup>			
Units: percentage of participants				

Notes:

[5] - Values had high variation, were not interpretable; methods for assessing CgA differed across centers

## Statistical analyses

No statistical analyses for this end point

## Secondary: Duration of Progression Free Survival (PFS) for Per Protocol (PP) and ITT sets

End point title	Duration of Progression Free Survival (PFS) for Per Protocol (PP) and ITT sets
End point description:	
Duration of PFS was defined as the time from first study drug administration to objective tumor progression or death from any cause. Observations from patients not experiencing tumor progression or death at date of DBC were censored with the date of their last adequate tumor assessment	
End point type	Secondary
End point timeframe:	
baseline up to approximately 12 months	

<b>End point values</b>	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	73			
Units: days				
median (confidence interval 95%)				
PFS days for Per protocol set (60)	185 (160 to 262)			
PFS days for Intent to treat set (73)	190 (161 to 262)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Overall Survival (OS) for Per Protocol (PP) and ITT sets

End point title	Overall Survival (OS) for Per Protocol (PP) and ITT sets
-----------------	--

End point description:

OS was defined as the time from first study drug administration to death from any cause. If a patient was not known to have died at date of database closure, overall survival was censored at the date of last contact.

End point type	Secondary
----------------	-----------

End point timeframe:

baseline up to approximately 12 months

<b>End point values</b>	Everolimus			
Subject group type	Reporting group			
Number of subjects analysed	73			
Units: days				
arithmetic mean (standard error)				
OS for Per protocol set (60)	451.8 (± 19.8)			
OS for Intent to treat set (73)	437.1 (± 18.6)			

### Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse Events are collected from First Patient First Visit (FPFV) until Last Patient Last Visit (LPLV). All Adverse events are reported in this record from First Patient First Treatment until Last Patient Last Visit.

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

Assessment type	Systematic
-----------------	------------

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 April 2010	Protocol was updated to include new background information. Addition of guidelines for management of hepatitis B and C and management of hyperglycemia and guidance on the usage of CYP3A4 and/or P-glycoprotein (PgP) inducers and inhibitors was modified. Entry criteria was clarified. Change in ECOG status table from grade 0-3 to grade 0-5 was made.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
