Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	29 January 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 January 2015
Global end of trial reached?	Yes
Global end of trial date	29 January 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To demonstrate the dose-related efficacy by evaluating morning lung function at the end of the dosing interval (AM pre-dose percent predicted forced expiratory volume in one second [FEV1]) after 12 weeks of treatment, of three doses (50 mcg, 100 mcg, and 200 mcg) of mometasone furoate (MF) metered dose inhaler (MDI) twice a day (BID) compared with placebo in children 5 to 11 years of age, inclusive, with persistent asthma.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research. The following additional measure defined for this individual study was in place for the protection of trial subjects: participants were provided with a short-acting β -agonist (albuterol MDI 90 mcg in the United States [US], salbutamol MDI 100 mcg non-US) as rescue therapy.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	25 January 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 64
Country: Number of subjects enrolled	Bulgaria: 41
Country: Number of subjects enrolled	Estonia: 19
Country: Number of subjects enrolled	Greece: 4
Country: Number of subjects enrolled	Hungary: 71
Country: Number of subjects enrolled	Latvia: 20
Country: Number of subjects enrolled	Serbia: 1
Country: Number of subjects enrolled	Colombia: 28
Country: Number of subjects enrolled	Croatia: 5
Country: Number of subjects enrolled	Guatemala: 92
Country: Number of subjects enrolled	Mexico: 20
Country: Number of subjects enrolled	South Africa: 14
Country: Number of subjects enrolled	Switzerland: 11
Country: Number of subjects enrolled	Ukraine: 32
Country: Number of subjects enrolled	United States: 91
Country: Number of subjects enrolled	Romania: 41

Country: Number of subjects enrolled	Russian Federation: 24
Worldwide total number of subjects	578
EEA total number of subjects	265

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	577
Adolescents (12-17 years)	1
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Participants aged 5 to 11 years, inclusive, who had persistent asthma were screened for this study.

Period 1

Period 1 title	Treatment Period (12 weeks) (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	MF MDI 50 mcg BID
------------------	-------------------

Arm description:

Participants receive MF MDI 25 mcg X 2 inhalations (50 mcg total dose) BID plus Placebo dry powder inhaler (DPI) X 1 inhalation in the evening for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Mometasone furoate metered dose inhaler (MF MDI)
Investigational medicinal product code	
Other name	SCH 032088, MK-0887
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

MF MDI 25 mcg, 50 mcg or 100 mcg X 2 inhalations BID for 12 weeks

Investigational medicinal product name	Placebo dry powder inhaler (Placebo DPI)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

Placebo DPI X 1 inhalation in the evening for 12 weeks

Arm title	MF MDI 100 mcg BID
------------------	--------------------

Arm description:

Participants receive MF MDI 50 mcg X 2 inhalations (100 mcg total dose) BID plus Placebo DPI X 1 inhalation in the evening for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Placebo dry powder inhaler (Placebo DPI)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

Placebo DPI X 1 inhalation in the evening for 12 weeks

Investigational medicinal product name	Mometasone furoate metered dose inhaler (MF MDI)
Investigational medicinal product code	
Other name	SCH 032088, MK-0887

Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details:	
MF MDI 25 mcg, 50 mcg or 100 mcg X 2 inhalations BID for 12 weeks	
Arm title	MF MDI 200 mcg BID
Arm description:	
Participants receive MF MDI 100 mcg X 2 inhalations (200 mcg total dose) BID plus Placebo DPI X 1 inhalation in the evening for 12 weeks.	
Arm type	Experimental
Investigational medicinal product name	Placebo dry powder inhaler (Placebo DPI)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details:	
Placebo DPI X 1 inhalation in the evening for 12 weeks	
Investigational medicinal product name	Mometasone furoate metered dose inhaler (MF MDI)
Investigational medicinal product code	
Other name	SCH 032088, MK-0887
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details:	
MF MDI 25 mcg, 50 mcg or 100 mcg X 2 inhalations BID for 12 weeks	
Arm title	MF DPI 100 mcg QD
Arm description:	
Participants receive Placebo MDI X 2 inhalations BID plus MF DPI 100 mcg X 1 inhalation once daily in the evening for 12 weeks.	
Arm type	Active comparator
Investigational medicinal product name	Placebo MDI
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details:	
Placebo MDI X 2 inhalations BID for 12 weeks	
Investigational medicinal product name	Mometasone furoate dry powder inhaler (MF DPI)
Investigational medicinal product code	
Other name	SCH 032088, MK-0887
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details:	
MF DPI 100 mcg X 1 inhalation once daily in the evening for 12 weeks	
Arm title	Placebo
Arm description:	
Participants receive Placebo MDI X 2 inhalations BID plus Placebo DPI X 1 inhalation once daily in the evening for 12 weeks.	
Arm type	Placebo

Investigational medicinal product name	Placebo dry powder inhaler (Placebo DPI)

Primary: Change from Baseline in Percent Predicted Morning (AM) Forced Expiratory Volume in 1 Second (FEV1)

End point title	Change from Baseline in Percent Predicted Morning (AM) Forced Expiratory Volume in 1 Second (FEV1)
End point description: FEV1 is the amount of air, measured in liters, forcibly exhaled in 1 second. Pulmonary function tests were to be performed by participants in the morning before dosing. The percent predicted FEV1 equals the participant's observed FEV1 divided by the participant's predicted FEV1 (determined by height and race) and converted to a percentage by multiplying by 100%.	
End point type	Primary
End point timeframe: Baseline and Week 12

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 December 2011	Amendment 02: Amendment 02 was developed prior to any participant being randomized. The primary reason for the protocol amendment was to remove the Interviewer-Administered Asthma Control Questionnaire (ACQ-IA) from the study and to clarify Events of Clinical Interest.
30 March 2012	Amendment 01: Amendment 01 was developed prior to any participant being randomized. The primary reason for the protocol amendment was to clarify text and update the protocol template.
13 September 2013	Amendment 03: The primary reason for Amendment 03 was to clarify and align sections throughout the protocol and to remove an analysis of covariance (ANCOVA) analysis originally proposed as a confirmatory analysis.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
