

## Clinical trial results:

### A Long-term, Open-label, Non-comparative Study to Evaluate the Safety and Efficacy of a Modigraf® Based Immunosuppression Regimen in Paediatric Solid Allograft Recipients

#### Summary

EudraCT number	2009-012259-21
Trial protocol	ES GB DE BE FR
Global end of trial date	02 April 2017

#### Results information

Result version number	v2
This version publication date	06 July 2018
First version publication date	28 March 2018
Version creation reason	

#### Trial information

##### Trial identification

Sponsor protocol code	F506-CL-0404
-----------------------	--------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01371344
WHO universal trial number (UTN)	-
Other trial identifiers	Acronym: PROGRESSION

Notes:

#### Sponsors

Sponsor organisation name	Astellas Pharma Europe, Ltd
Sponsor organisation address	2000 Hillswood Drive, Chertsey, United Kingdom, KT16 0RS

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	02 April 2017
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	02 April 2017
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

The study had 2 parts: Part A (F506-CL-0404A) and Part B (F506-CL-0404B). The objective of F506-CL-0404A was to monitor the safety of and efficacy of Modigraf® (tacrolimus granules) in stable paediatric allograft recipients.

The objective of F506-CL-0404B was to monitor dose changes and tacrolimus whole blood trough levels after conversion from a tacrolimus granules based immunosuppression regimen to a Prograf® (tacrolimus capsules) based immunosuppression regimen.

Part A was completed as planned, however the study was terminated during Part B due to low enrollment in Part B.

Protection of trial subjects:

This clinical study was written, conducted and reported in accordance with the protocol, International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice (GCP) Guidelines, and applicable local regulations, including the European Directive 2001/20/EC, on the protection of human rights, and with the ethical principles that have their origin in the Declaration of Helsinki. Astellas ensures that the use and disclosure of protected health information (PHI) obtained during a research study complies with the federal, national and/or regional legislation related to the privacy and protection of personal information.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 June 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 3
Country: Number of subjects enrolled	France: 3
Country: Number of subjects enrolled	Germany: 5
Country: Number of subjects enrolled	Poland: 1
Country: Number of subjects enrolled	Spain: 26
Country: Number of subjects enrolled	United Kingdom: 9
Worldwide total number of subjects	47
EEA total number of subjects	47

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	17
Children (2-11 years)	29
Adolescents (12-17 years)	1
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Children aged  $\leq 12$  years were enrolled at 11 sites in a total of 6 countries: UK (2 sites), Spain (3 sites), Germany (2 sites), Belgium (1 site), Poland (1 site) and France (2 sites).

### Pre-assignment

Screening details:

Pediatric participants who had undergone liver, kidney or heart transplantation and who had previously participated F506-CL-0403 study were enrolled in Part A of this study. Participants who participated in Part A or F506-CL-0403 and who were converted to receive tacrolimus capsules were enrolled in Part B.

### Period 1

Period 1 title	Part A
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Part A: Heart Transplant (Tacrolimus granules)

Arm description:

In Part A of the study, participants who were heart transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

Arm type	Experimental
Investigational medicinal product name	Tacrolimus granules
Investigational medicinal product code	FK506
Other name	Modigraf®
Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Participants received the same dose regimen of tacrolimus granules as they were receiving at the end of the F506-CL-0403 study, and the first dose was administered on day 1. Subsequent oral tacrolimus doses were adjusted by the investigator based on clinical evidence of efficacy and occurrence of adverse events and observing the recommended whole blood trough level range of 5 to 20 ng/ml. The tacrolimus granules for oral suspension were available in sachets containing either 0.2 mg or 1 mg tacrolimus granules per sachet.

<b>Arm title</b>	Part A: Liver Transplant (Tacrolimus granules)
------------------	--

Arm description:

In Part A of the study, participants who were liver transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

Arm type	Experimental
Investigational medicinal product name	Tacrolimus granules
Investigational medicinal product code	FK506
Other name	Modigraf®
Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

Dosage and administration details:

Participants received the same dose regimen of tacrolimus granules as they were receiving at the end of the F506-CL-0403 study, and the first dose was administered on day 1. Subsequent oral tacrolimus doses were adjusted by the investigator based on clinical evidence of efficacy and occurrence of adverse events and observing the recommended whole blood trough level range of 5 to 20 ng/ml. The tacrolimus granules for oral suspension were available in sachets containing either 0.2 mg or 1 mg tacrolimus

granules per sachet.

<b>Arm title</b>	Part A: Kidney Transplant (Tacrolimus granules)
Arm description: In Part A of the study, participants who were kidney transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Arm type	Experimental
Investigational medicinal product name	Tacrolimus granules
Investigational medicinal product code	FK506
Other name	Modigraf®
Pharmaceutical forms	Granules for oral suspension
Routes of administration	Oral use

**Dosage and administration details:**

Participants received the same dose regimen of tacrolimus granules as they were receiving at the end of the F506-CL-0403 study, and the first dose was administered on day 1. Subsequent oral tacrolimus doses were adjusted by the investigator based on clinical evidence of efficacy and occurrence of adverse events and observing the recommended whole blood trough level range of 5 to 20 ng/ml. The tacrolimus granules for oral suspension were available in sachets containing either 0.2 mg or 1 mg tacrolimus granules per sachet.

<b>Number of subjects in period 1</b>	Part A: Heart Transplant (Tacrolimus granules)	Part A: Liver Transplant (Tacrolimus granules)	Part A: Kidney Transplant (Tacrolimus granules)
Started	17	18	12
Completed	16	11	10
Not completed	1	7	2
Intolerable Adverse Event	-	1	1
Withdrawal of Consent	-	3	1
Other	-	1	-
Lost to follow-up	1	-	-
Retransplantation	-	2	-

**Period 2**

Period 2 title	Part B
Is this the baseline period?	No
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

**Arms**

<b>Arm title</b>	Part B: All Participants (Tacrolimus capsules)
Arm description:	
In Part B of the study, participants who were heart, kidney or liver transplant recipients and who were converted from tacrolimus granules-based immunosuppression regimen, received tacrolimus capsules twice daily for 1 month and thereafter received commercially available tacrolimus capsules.	
Arm type	Experimental
Investigational medicinal product name	Tacrolimus capsules
Investigational medicinal product code	FK506
Other name	Prograf®
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

**Dosage and administration details:**

Participants received an initial daily dose of tacrolimus capsules that is identical to the daily dose of tacrolimus granules prior to conversion to tacrolimus capsules and was administered on day 1. Subsequent oral tacrolimus doses were adjusted based on clinical evidence of efficacy and occurrence of adverse events, and observed the recommended whole blood trough level range of 5 to 20 ng/ml. Tacrolimus capsules contained 0.5 mg, 1 mg or 5 mg of tacrolimus per capsule.

<b>Number of subjects in period 2<sup>[1]</sup></b>	Part B: All Participants (Tacrolimus capsules)
Started	5
Completed	6
Joined	1
Joined from F506-CL-0403	1

**Notes:**

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: Part A and Part B are independent of each other, where: (1) Participants can be enrolled in Part A only, and may not be enrolled in Part B; (2) Participants can be can be enrolled in Part A and subsequently to Part B; or (3) Participants can directly be enrolled into Part B only.

## Baseline characteristics

### Reporting groups

Reporting group title	Part A: Heart Transplant (Tacrolimus granules)
Reporting group description:	
In Part A of the study, participants who were heart transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Reporting group title	Part A: Liver Transplant (Tacrolimus granules)
Reporting group description:	
In Part A of the study, participants who were liver transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Reporting group title	Part A: Kidney Transplant (Tacrolimus granules)
Reporting group description:	
In Part A of the study, participants who were kidney transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

## End points

### End points reporting groups

Reporting group title	Part A: Heart Transplant (Tacrolimus granules)
Reporting group description: In Part A of the study, participants who were heart transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Reporting group title	Part A: Liver Transplant (Tacrolimus granules)
Reporting group description: In Part A of the study, participants who were liver transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Reporting group title	Part A: Kidney Transplant (Tacrolimus granules)
Reporting group description: In Part A of the study, participants who were kidney transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.	
Reporting group title	Part B: All Participants (Tacrolimus capsules)
Reporting group description: In Part B of the study, participants who were heart, kidney or liver transplant recipients and who were converted from tacrolimus granules-based immunosuppression regimen, received tacrolimus capsules twice daily for 1 month and thereafter received commercially available tacrolimus capsules.	

### Primary: Part A: Number of Participants with Acute Rejection Episodes

End point title	Part A: Number of Participants with Acute Rejection Episodes <sup>[1]</sup>
End point description: Rejection episodes/acute rejections were indicated by clinical and/or laboratory signs, and were classified according to their rejection specific treatment: •Spontaneously Resolving Acute Rejection: not treated with new or increased corticosteroid medication, antibodies or any other medication and resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Sensitive Acute Rejection: treated with new or increased corticosteroid medication only and which has resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Resistant Acute Rejection: did not resolve following treatment with corticosteroids; - Resolved with further treatment: any acute rejection with an end date AND a treatment other than corticosteroid used; - Unresolved with further treatment: any acute rejection with no end date AND a treatment other than corticosteroid used; - Unresolved with no further treatment: any acute rejection with no end date AND ONLY corticosteroid treatment was used. SAF.	
End point type	Primary
End point timeframe: Up to 12 months	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: As this is a single-arm study, there were no pre-determined hypothetical or comparative statistical analyses performed in Part A of the study.

End point values	Part A: Heart Transplant (Tacrolimus granules)	Part A: Liver Transplant (Tacrolimus granules)	Part A: Kidney Transplant (Tacrolimus granules)	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	17	18	12	
Units: Participants				
Spontaneously Resolving Acute Rejection	1	0	0	

Corticosteroid Sensitive Acute Rejection	3	2	0	
Corticosteroid Resistant Acute Rejections	0	1	0	
Other Acute Rejections	1	0	1

No statistical analyses for this end point

### Primary: Part A: Severity of BPARs

End point title	Part A: Severity of BPARs <sup>[2]</sup>
-----------------	--

End point description:

The severity of BPARs was categorized with specific criteria by organ: For kidney transplant participants, according to Banff '97 Diagnostic categories for renal allograft biopsies – Banff '07 update (C4d deposition, Acute antibody-mediated rejection I, II, and III, Acute T cell mediated rejection IA, IB, IIA, IIB and III); for liver transplant participants, according to 1997 Banff Schema for Grading of Liver Allograft Rejection - Rejection Activity Index score (sum of grades: 1-mild, 2-moderate, 3-severe; range from 0-9); for heart, according to Standardized Nomenclature of the International Society of Heart and Lung Transplantation - Standardised Cardiac Biopsy Grading: Acute Cellular Rejection 2004 (mild, moderate, severe). The analysis population was the Safety Analysis Set (SAF), which consisted of participants took at least 1 dose of study drug. Categories not applicable to the reporting groups are denoted as "99999."

End point type	Primary
----------------	---------

End point timeframe:

Up to 12 months

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: As this is a single-arm study, there were no pre-determined hypothetical or comparative statistical analyses performed in Part A of the study.

### Primary: Part A: Number of Participants with Adverse Events (AEs)

End point title	Part A: Number of Participants with Adverse Events (AEs) <sup>[5]</sup>
-----------------	---

End point description:

Safety was assessed by AEs, which included abnormalities identified during a medical test (e.g. clinical laboratory tests, vital signs, etc.) if the abnormality induced clinical signs or symptoms, needed active intervention, interruption or discontinuation of study medication or was clinically significant. A serious AE (SAE) was an event resulting in death, persistent or significant disability/incapacity or congenital anomaly or birth defect, was life-threatening, required or prolonged hospitalization or was considered medically important. A treatment emergent adverse event (TEAE) was defined as an AE observed after investigational drug administration. The analysis population was the SAF.

End point type	Primary
----------------	---------

End point timeframe:

From first dose of study drug up to 30 days after last dose of study drug (up to 13 months)

Notes:

[5] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: As this is a single-arm study, there were no pre-determined hypothetical or comparative statistical analyses performed in Part A of the study.

No statistical analyses for this end point

### Primary: Part B: Number of Dose Adjustments

End point title	Part B: Number of Dose Adjustments <sup>[10]</sup>
-----------------	--

End point description:

The analysis population was the conversion analysis set. Only participants with dose adjustments were included in the analysis.

End point type	Primary
----------------	---------

End point timeframe:

From first dose of study drug up to 1 month

Notes:

[10] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: As this is a single-arm study, there were no pre-determined hypothetical or comparative statistical analyses performed in Part B of the study.

End point values	Part B: All Participants (Tacrolimus capsules)			
Subject group type	Reporting group			
Number of subjects analysed	3			
Units: participants				
1 adjustment	1			
2 adjustments	0			
3 adjustments	2			

## Statistical analyses

No statistical analyses for this end point

## Secondary: Part A: Number of Participants with Biopsy-proven Acute Rejection Episodes (BPARs)

End point title	Part A: Number of Participants with Biopsy-proven Acute Rejection Episodes (BPARs)
End point description:	
BPAR episodes were defined as acute rejection episodes confirmed by biopsy, and were classified according to their rejection specific treatment: •Spontaneously Resolving Acute Rejection: not treated with new or increased corticosteroid medication, antibodies or any other medication and resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Sensitive Acute Rejection: treated with new or increased corticosteroid medication only and which has resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Resistant Acute Rejection: did not resolve following treatment with corticosteroids; - Resolved with further treatment: any acute rejection with an end date AND a treatment other than corticosteroid used; - Unresolved with further treatment: any acute rejection with no end date AND a treatment other than corticosteroid used; - Unresolved with no further treatment: any acute rejection with no end date AND ONLY corticosteroid treatment used. SAF.	
End point type	Secondary
End point timeframe:	
Up to 12 months	

End point values	Part A: Heart Transplant (Tacrolimus granules)	Part A: Liver Transplant (Tacrolimus granules)	Part A: Kidney Transplant (Tacrolimus granules)	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	17	18	12	
Units: participants				
number (not applicable)				
Spontaneously Resolving Acute Rejection	0	0	0	
Corticosteroid Sensitive Acute Rejection	2	2	0	
Corticosteroid Resistant Acute Rejection	0	1	0	

Other Acute Rejections	0	0	0	
------------------------	---	---	---	--

## Statistical analyses

---

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Part A: From first dose of study drug (tacrolimus granules) up to 30 days after last dose of study drug (up to 13 months); Part B: From first dose of study drug (tacrolimus capsules) up to 7 days after last dose (up to 38 days)

Assessment type	Systematic

### Dictionary used

Dictionary name	MedDRA
Dictionary version	15.0

### Reporting groups

Reporting group title	Part A: Liver Transplant (Tacrolimus granules)
-----------------------	--

Reporting group description:

In Part A of the study, participants who were liver transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

Reporting group title	Part A: Heart Transplant (Tacrolimus granules)
-----------------------	--

Reporting group description:

In Part A of the study, participants who were heart transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

Reporting group title	Part B: All Participants (Tacrolimus capsules)
-----------------------	--

Reporting group description:

In Part B of the study, participants who were heart, kidney or liver transplant recipients and who were converted from tacrolimus granules-based immunosuppression regimen, received tacrolimus capsules twice daily for 1 month and thereafter received commercially available tacrolimus capsules.

Reporting group title	Part A: Kidney Transplant (Tacrolimus granules)
-----------------------	---

Reporting group description:

In Part A of the study, participants who were kidney transplant recipients received tacrolimus granules-based immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

Serious adverse events	Part A: Liver Transplant (Tacrolimus granules)	Part A: Heart Transplant (Tacrolimus granules)	Part B: All Participants (Tacrolimus capsules)

Diarrhoea subjects affected / exposed occurrences (all)	7 / 12 (58.33%) 13		
Gastrooesophageal reflux disease subjects affected / exposed occurrences (all)	0 / 12 (0.00%) 0		
Mouth ulceration subjects affected / exposed occurrences (all)	1 / 12 (8.33%) 1		
Nausea subjects affected / exposed occurrences (all)	0 / 12 (0.00%) 0		
Vomiting subjects affected / exposed occurrences (all)	6 / 12 (50.00%) 13		
Hepatobiliary disorders			
Bile duct obstruction subjects affected / exposed occurrences (all)	0 / 12 (0.00%) 0		
Bile duct stenosis subjects affected / exposed occurrences (all)	0 / 12 (0.00%) 0		
Hepatotoxicity			

subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Hyperbilirubinaemia			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Portal vein thrombosis			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Skin and subcutaneous tissue disorders			
Alopecia			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Dermatitis			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Dermatitis exfoliative			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Drug eruption			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Eczema			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Pruritus			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Rash			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Swelling face			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Renal and urinary disorders			
Dysuria			

subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Nephropathy toxic			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Renal failure			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Renal impairment			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Renal injury			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Urinary retention			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Endocrine disorders			
Hypothyroidism			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Infections and infestations			
Abdominal infection			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Biliary tract infection bacterial			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Biliary tract infection fungal			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Clostridial infection			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Device related infection			

subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Epstein-Barr virus infection			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Gastroenteritis norovirus			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Gastrointestinal candidiasis			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Genital infection male			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Herpes zoster			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Human herpesvirus 6 infection			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Lower respiratory tract infection bacterial			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Nasopharyngitis			
subjects affected / exposed	4 / 12 (33.33%)		
occurrences (all)	4		
Oral candidiasis			
subjects affected / exposed	2 / 12 (16.67%)		
occurrences (all)	2		
Oral fungal infection			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Peritonitis bacterial			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		

Pneumonia			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Respiratory tract infection			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Upper respiratory tract infection			
subjects affected / exposed	2 / 12 (16.67%)		
occurrences (all)	2		
Viral infection			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Metabolism and nutrition disorders			
Hyperglycaemia			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Hyperkalaemia			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Hyperphosphataemia			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Hypokalaemia			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Hypomagnesaemia			
subjects affected / exposed	1 / 12 (8.33%)		
occurrences (all)	1		
Hyponatraemia			
subjects affected / exposed	2 / 12 (16.67%)		
occurrences (all)	2		
Hypophosphataemia			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Metabolic acidosis			

subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		
Vitamin D deficiency			
subjects affected / exposed	0 / 12 (0.00%)		
occurrences (all)	0		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

This study was terminated during Part B, due to low number of participants enrolled in Part B.
