

## Clinical trial results:

### A phase II, randomized, open-label, multi-centre study of weekly APG101 + reirradiation versus reirradiation in the treatment of patients with first or second progression of glioblastoma

#### Summary

EudraCT number	2009-013421-42
Trial protocol	DE AT
Global end of trial date	09 October 2014

#### Results information

Result version number	v1 (current)
This version publication date	13 August 2016
First version publication date	13 August 2016
Summary attachment (see zip file)	Synopse CSR APG101_CD_002 (Synopse CSR Final.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	APG101_CD_002
-----------------------	---------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01071837
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	Apogenix AG
Sponsor organisation address	Im Neuenheimer Feld 584, Heidelberg, Germany,

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	30 July 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	09 October 2014
Global end of trial reached?	Yes
Global end of trial date	09 October 2014
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

6 months rate of progression free survival (PFS6)

Protection of trial subjects:

Medication that is considered necessary for the patients' safety and well-being may be given at the discretion of the Investigator(s).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	07 December 2009
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Austria: 15
Country: Number of subjects enrolled	Germany: 58
Country: Number of subjects enrolled	Russian Federation: 18
Worldwide total number of subjects	91
EEA total number of subjects	73

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	69
From 65 to 84 years	22
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Overall, 91 patients were allocated randomly to one of the two treatment groups (APG101 + RT or RT alone) in 26 active trial centres in three countries. Recruitment period: December 2009 to September 2011

### Pre-assignment

Screening details:

Patients with a recurrence/progression of glioblastoma (first or second progression) either not being eligible for tumour resection or having macroscopic residual tumour after resection of the recurrence can be included (tumor size must 1-4 cm in T1-weighted MRI). They will be randomized to RT or RT + APG101.

### Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Re-Irradiation

Arm description:

33% of the patients will be randomized to reirradiation (RT) alone. They will receive 36 Gy (2 Gy per fraction)

Arm type	Re-Irradiation
No investigational medicinal product assigned in this arm	
<b>Arm title</b>	Re-Irradiation + APG101

Arm description:

66% of the patients will be randomized to reirradiation (RT) + 400 mg APG101 weekly. They will receive 36 Gy (2 Gy per fraction) and 400 mg APG101 weekly as an intravenous infusion

Arm type	Experimental
Investigational medicinal product name	APG101
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

APG101 was administered as a 30-minute i.v. infusion in a volume of 200 to 290 ml (depending on the size/volume of the NaCl infusion bag to which the total amount of 400 mg APG101 was added). It was administered to the patient before RT.

<b>Number of subjects in period 1</b>	Re-Irradiation	Re-Irradiation + APG101
Started	30	61
Completed	26	58
Not completed	4	3
Consent withdrawn by subject	4	2
Physician decision	-	1

## Baseline characteristics

### Reporting groups

Reporting group title	overall trial
-----------------------	---------------

Reporting group description: -

Reporting group values	overall trial	Total	
Number of subjects	91	91	
Age categorical			
Units: Subjects			
In utero		0	
Preterm newborn infants (gestational age < 37 wks)		0	
Newborns (0-27 days)		0	
Infants and toddlers (28 days-23 months)		0	
Children (2-11 years)		0	
Adolescents (12-17 years)		0	
Adults (18-64 years)		0	
From 65-84 years		0	
85 years and over		0	
Age continuous			
Units: years			
median	57		
full range (min-max)	20 to 79	-	
Gender categorical			
Units: Subjects			
Female	36	36	
Male	55	55	

## End points

### End points reporting groups

Reporting group title	Re-Irradiation
Reporting group description: 33% of the patients will be randomized to reirradiation (RT) alone. They will receive 36 Gy (2 Gy per fraction)	
Reporting group title	Re-Irradiation + APG101
Reporting group description: 66% of the patients will be randomized to reirradiation (RT) + 400 mg APG101 weekly. They will receive 36 Gy (2 Gy per fraction) and 400 mg APG101 weekly as an intravenous infusion	
Subject analysis set title	FAS
Subject analysis set type	Full analysis
Subject analysis set description: From a total of 91 patients, seven patients (7.7%) received no study treatment because of withdrawal of consent, ineligibility and sponsor decision. Thus, the safety set and the FAS consisted of 84 patients.	

### Primary: Efficacy Endpoint (PFS6)

End point title	Efficacy Endpoint (PFS6)
End point description:	
End point type	Primary
End point timeframe: Progression-free survival was defined from the day of randomisation to the day of local tumour progression or recurrence, based on the central assessment of MRI or the day of death from any cause.	

End point values	Re-Irradiation	Re-Irradiation + APG101		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	26	58		
Units: Percent	4	21		

### Statistical analyses

Statistical analysis title	Two Stage Simon Design
Comparison groups	Re-Irradiation + APG101 v Re-Irradiation
Number of subjects included in analysis	84
Analysis specification	Pre-specified
Analysis type	other
P-value	≤ 15
Method	Two Stage Simon Design

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Assessed throughout the study

Assessment type	Non-systematic
-----------------	----------------
