

Clinical trial results:

Bortezomib (Velcade®): a feasibility and phase II study in childhood relapsed acute lymphoblastic leukemia

Summary

EudraCT number	2009-014037-25
Trial protocol	NL DE IT BE DK AT
Global end of trial date	21 October 2014

Results information

Result version number	v1 (current)
This version publication date	21 March 2018
First version publication date	21 March 2018
Summary attachment (see zip file)	Summary Bortezomib_CSR (CSR Bortezomib dd 23-05-2017-summary.pdf)

Trial information

Trial identification

Sponsor protocol code	ITCC021
-----------------------	---------

Additional study identifiers

ISRCTN number	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 May 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 October 2014
Global end of trial reached?	Yes
Global end of trial date	21 October 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Determine the antileukemic activity of combination chemotherapy including bortezomib as reinduction therapy in childhood relapsed/refractory ALL

Protection of trial subjects:

By the Informed consent and voluntary participation in the trial.

Surgical interventions take place under anaesthesia.

Background therapy:

Dexamethasone, vincristine and intrathecal methotrexate

Evidence for comparator:

All patients will be treated with one cycle of bortezomib, consisting of 4 doses in 2 weeks.

However, they will be randomised 1:1 in 2 arms, group A getting "early" bortezomib, starting at day 1 of therapy, and group B getting "late" bortezomib, starting at day 8.

Randomization will be stratified for the number of circulating leukemic blasts at inclusion in this study protocol. This design allows demonstrating an additional antileukemic effect of bortezomib when added to dexamethasone, after 1 week of therapy, measured by a reduction in ALL cells in peripheral blood and bone marrow. In addition, this design allows comparing the toxicity of limited (group A) and more extended (group B) overlap of administrations of bortezomib and vincristine.

Actual start date of recruitment	08 October 2010
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 9
Country: Number of subjects enrolled	Austria: 1
Country: Number of subjects enrolled	Belgium: 1
Country: Number of subjects enrolled	Germany: 4
Country: Number of subjects enrolled	Italy: 8
Country: Number of subjects enrolled	France: 6
Worldwide total number of subjects	29
EEA total number of subjects	29

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	4
Children (2-11 years)	14
Adolescents (12-17 years)	11
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Study initiation date / first subject visit: October 8, 2010

Study completion date / last subject completed: October 21, 2014

29 subjects enrolled; 29 subjects completed and analyzed.

Pre-assignment

Screening details:

Screening measures conducted prior to enrollment constitute a standard battery of tests designed to thoroughly examine the potential subject for any medical issues.

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Arm A

Arm description:

Arm A received bortezomib on days 1, 4, 8 and 11

Arm type	Active comparator
Investigational medicinal product name	Bortezomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Per day, 1.3 mg/m² milligram(s)/square meter

Arm title	Arm B
------------------	-------

Arm description:

Arm B received bortezomib on days 8, 11, 15 and 18

Arm type	Active comparator
Investigational medicinal product name	Bortezomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Per day, 1.3 mg/m² milligram(s)/square meter

Number of subjects in period 1	Arm A	Arm B
Started	14	15
Completed	14	15

subjects affected / exposed	0 / 14 (0.00%)	1 / 15 (6.67%)	
occurrences (all)	0	2	
AST increase			
subjects affected / exposed	1 / 14 (7.14%)	2 / 15 (13.33%)	
occurrences (all)	1	4	
GGT increase			
subjects affected / exposed	1 / 14 (7.14%)	1 / 15 (6.67%)	
occurrences (all)	2	2	
Haemorrhage			
subjects affected / exposed	5 / 14 (35.71%)	5 / 15 (33.33%)	
occurrences (all)	5	6	
INR alteration			
subjects affected / exposed	0 / 14 (0.00%)	1 / 15 (6.67%)	
occurrences (all)	0	2	

Vascular disorders			
Arterial hypertension			
subjects affected / exposed	0 / 14 (0.00%)	1 / 15 (6.67%)	
occurrences (all)	0	3	
Nervous system disorders			
Peripheral neuropathy			
subjects affected / exposed	2 / 14 (14.29%)	5 / 15 (33.33%)	
occurrences (all)	4	8	
Tremor			
subjects affected / exposed	1 / 14 (7.14%)	1 / 15 (6.67%)	
occurrences (all)	1	1	
Blood and lymphatic system disorders			
Anemia			
subjects affected / exposed	13 / 14 (92.86%)	14 / 15 (93.33%)	
occurrences (all)	27	30	
Leukopenia			
subjects affected / exposed	13 / 14 (92.86%)	12 / 15 (80.00%)	
occurrences (all)	22	24	
Neutropenia			
subjects affected / exposed	14 / 14 (100.00%)	13 / 15 (86.67%)	
occurrences (all)	25	28	
Thrombopenia			
subjects affected / exposed	14 / 14 (100.00%)	15 / 15 (100.00%)	
occurrences (all)	32	38	
General disorders and administration site conditions			
Edema			
subjects affected / exposed	2 / 14 (14.29%)	2 / 15 (13.33%)	
occurrences (all)	2	3	
Fatigue			
subjects affected / exposed	8 / 14 (57.14%)	6 / 15 (40.00%)	
occurrences (all)	12	9	
Fever			
subjects affected / exposed	9 / 14 (64.29%)	9 / 15 (60.00%)	
occurrences (all)	11	12	
Pain			

subjects affected / exposed occurrences (all)	7 / 14 (50.00%) 10	8 / 15 (53.33%) 12	
Gastrointestinal disorders			
Mucositis			
subjects affected / exposed	1 / 14 (7.14%)	4 / 15 (26.67%)	
occurrences (all)	2	5	
Nausea			
subjects affected / exposed	4 / 14 (28.57%)	3 / 15 (20.00%)	
occurrences (all)	5	3	
Vomiting			
subjects affected / exposed	3 / 14 (21.43%)	2 / 15 (13.33%)	
occurrences (all)	3	3	
Respiratory, thoracic and mediastinal disorders			
Cough and rhinitis			
subjects affected / exposed	0 / 14 (0.00%)	1 / 15 (6.67%)	
occurrences (all)	0	2	
Hypoxia			
subjects affected / exposed	1 / 14 (7.14%)	1 / 15 (6.67%)	
occurrences (all)	1	1	
Hepatobiliary disorders			
Hepatotoxicity			
subjects affected / exposed	1 / 14 (7.14%)	1 / 15 (6.67%)	
occurrences (all)	1	1	
Skin and subcutaneous tissue disorders			
Alopecia			
subjects affected / exposed	2 / 14 (14.29%)	0 / 15 (0.00%)	
occurrences (all)	2	0	
Ecchymosis and petechias			
subjects affected / exposed	0 / 14 (0.00%)	1 / 15 (6.67%)	
occurrences (all)	0	2	
Rash/desquamation			
subjects affected / exposed	4 / 14 (28.57%)	3 / 15 (20.00%)	
occurrences (all)	6	4	
Renal and urinary disorders			
Renal function failure			

subjects affected / exposed occurrences (all)	1 / 14 (7.14%) 2	0 / 15 (0.00%) 0	
Infections and infestations Infection with neutropenia subjects affected / exposed occurrences (all)	5 / 14 (35.71%) 6	8 / 15 (53.33%) 9	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
18 December 2009	Protocol Amendment 1 (first approved version)
08 December 2010	clarification total dose vincristine Protocol
08 July 2011	updated safety and risk paragraph due to new IB ed 14 Velcade

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Some patients who were not fully eligible in hindsight and slow recruitment.

Notes:
