## General information about the trial

Main objective of the trial:

- Zoster-022 study:  
To evaluate vaccine efficacy (VE) in the prevention of herpes Zoster (HZ) compared to placebo in adults  $\geq 70$  years of age (YOA), as measured by the reduction in HZ risk.
- Zoster-006 and Zoster-022 pooled studies:  
To evaluate VE in the prevention of postherpetic neuralgia (PHN) compared to placebo in subjects  $\geq 70$  YOA across both Phase III studies.  
To consolidate VE estimation in the prevention of HZ compared to placebo in subjects  $\geq 70$  YOA across both Phase III studies.

Protection of trial subjects:

The vaccine/product recipients were to be observed closely for at least 30 minutes, with appropriate medical treatment readily available in case of a rare anaphylactic reaction following the administration of vaccine/product. Vaccines/products were administered by qualified and trained personnel. Vaccines/products were administered only to eligible subjects that had no contraindications to any components of the vaccines/products. Subjects were followed-up for 30 days after the last vaccination/product administration.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 August 2010
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

During the screening the following steps occurred: check for inclusion/exclusion criteria, contraindications/precautions, medical history of the subjects and signing informed consent forms.

### Pre-assignment period milestones

Number of subjects started	13913
----------------------------	-------

Number of subjects completed	13900
------------------------------	-------

### Pre-assignment subject non-completion reasons

Reason: Number of subjects	No vaccination received: 13

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Out of the 13913 subjects enrolled in the trial, 13 were assigned participant codes but did not receive vaccination, hence were excluded from study start.

-----------------	--

End point description:

Occurrence, intensity and relationship to vaccination of unsolicited AEs during 30 days (Days 0-29) after each vaccination, according to the MedDRA classification, in subjects  $\geq$  70 YOA. An unsolicited AE covers any untoward medical occurrence in a clinical investigation subject temporally associated with the use of a medicinal product, whether or not considered related to the medicinal product and reported in addition to those solicited during the clinical study and any solicited symptom with onset outside the specified period of follow-up for solicited symptoms. Any was defined as the occurrence of any unsolicited AE regardless of intensity grade or relation to vaccination. Grade 3 AE = an AE which prevented normal, everyday activities. Related = AE assessed by the investigator as related to the vaccination.
