Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 November 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	04 July 2014
Global end of trial reached?	Yes
Global end of trial date	04 July 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

- To allow access to tivozanib for subjects who participated in Protocol AV-951-09-301 and AV-951-09-902 and failed sorafenib treatment on either protocol.
- To allow long-term access to tivozanib for subjects who participated in Protocol AV-951-09-301 and demonstrated clinical benefit and acceptable tolerability to tivozanib
- To allow long-term access to sorafenib for subjects who participated in Protocol AV-951-09-301 and demonstrated clinical benefit and acceptable tolerability to sorafenib
- To assess long-term safety in subjects who continued treatment with tivozanib

Protection of trial subjects:

The protocol and amendments, informed consent forms, and any other appropriate study-related information were reviewed and approved by the appropriate Institutional Review Board (IRB) or Ethics Committee (EC). The study was conducted in accordance with the protocol (and subsequent amendments), the United States (US) Code of Federal Regulations, Title 21 CFR Part 56, principles of Good Clinical Practice (GCP), the International Conference on Harmonization (ICH) Guideline for GCP [E6 (R1)] (reference number CPMP/ICH/135/95), the national laws and regulations of the country in which the research was conducted, and the principles of the Declaration of Helsinki (54th World Medical Association General Assembly, Washington, USA, 2002). Prior to any study-related procedures, the Investigator explained to each subject the aims, methods, anticipated benefits and potential hazards, which were relevant to the subject's decision to participate. An informed consent document approved by the IRB/EC was signed by the subject and the Investigator before any study-related procedures were performed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	24 May 2010
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	3 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 7
Country: Number of subjects enrolled	Canada: 5
Country: Number of subjects enrolled	Poland: 36
Country: Number of subjects enrolled	Romania: 14
Country: Number of subjects enrolled	United Kingdom: 3
Country: Number of subjects enrolled	Bulgaria: 20
Country: Number of subjects enrolled	Czech Republic: 1
Country: Number of subjects enrolled	Hungary: 6

Country: Number of subjects enrolled	Italy: 6
Country: Number of subjects enrolled	Chile: 4
Country: Number of subjects enrolled	India: 6
Country: Number of subjects enrolled	Ukraine: 51
Country: Number of subjects enrolled	Russian Federation: 103
Country: Number of subjects enrolled	Serbia: 15
Worldwide total number of subjects	277
EEA total number of subjects	86

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	195
From 65 to 84 years	80
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

Subjects were enrolled at 55 sites (4 sites in Bulgaria, 1 site in Canada, 2 sites in Chile, 1 site in Czech Republic, 2 sites in Hungary, 4 sites in India, 2 sites in Italy, 6 sites in Poland, 4 sites in Romania, 17 sites in Russia, 4 sites in Serbia, 6 sites in Ukraine, 1 site in the United Kingdom, and 1 site in the United States).

Pre-assignment

Screening details:

All subjects underwent inclusion and exclusion criteria assessment and all eligible subjects signed the informed consent before undergoing any study related procedures. All the study assessments were performed as per the schedule of assessment.

Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Sorafenib Crossover to Tivozanib

Arm description:

The subjects who failed sorafenib (had Response Evaluation Criteria in Solid Tumors [RECIST]-defined progressive disease) on the parent Protocol AV- 951-09-301 were offered tivozanib hydrochloride on Protocol AV- 951-09-902.

Arm type	Experimental
Investigational medicinal product name	Tivozanib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Tivozanib was administered at a dose of 1.5 mg orally once daily (QD), at least 1 hour before or 2 hours after ingesting any food or other medication, for as long as the subject tolerated treatment in the absence of disease progression or unacceptable toxicity. Grapefruit juice could not have been ingested during the study. All subjects receiving tivozanib followed the dosing schedule of 3 weeks on treatment (beginning on Day 1) followed by 1 week off treatment. One cycle was defined as 4 weeks of treatment.

Investigational medicinal product name	Sorafenib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Sorafenib was administered orally, at a dose of 400 mg (2 x 200 mg tablets) twice daily, beginning on Day 1 of Cycle 1. Subjects received sorafenib continuously (1 cycle = 4 weeks). Sorafenib was to be taken at least 1 hour before or 2 hours after ingesting any food or other medications.

Arm title	First Line Tivozanib
------------------	----------------------

Arm description:

The subjects who were randomized to tivozanib (continued from the parent Protocol AV-951-09-301), and demonstrated clinical benefit and acceptable tolerability in Protocol AV-951-09-301.

Secondary: Number of Subjects with Objective Response Rate (ORR) Who Continued Treatment With Tivozanib or Sorafenib and Who Received Tivozanib After Failure of Sorafenib

End point title	Number of Subjects with Objective Response Rate (ORR) Who Continued Treatment With Tivozanib or Sorafenib and Who Received Tivozanib After Failure of Sorafenib
-----------------	---

End point description:

ORR is defined as the proportion of subjects with confirmed complete response (CR) or confirmed partial response (PR) according to RECIST (Version 1.0), relative to the total population of dosed subjects. CR is disappearance of all target and non-target lesions and normalization of tumor marker levels. At least a 30% decrease in the sum of the loading dose (LD) of target lesions, taking as reference the baseline sum LD.

To allow long-term access to sorafenib for subjects who participated in Protocol AV-951-09-301 (NCT01030783), and demonstrated clinical benefit and acceptable tolerability to sorafenib. Objective did not allow for a measured outcome.

End point type	Secondary
----------------	-----------

End point timeframe:

From Day 1 to the end of treatment (EOT) Visit, approximately every 8 weeks.

Statistical analyses

No statistical analyses for this end point

Secondary: Duration of Response (DR)

End point title	Duration of Response (DR)
-----------------	---------------------------

End point description:

Duration of Response was defined as the time from the first documentation of objective tumor response (confirmed CR or confirmed PR) according to RECIST (Version 1.0) to the first documentation of objective tumor progression or to death due to any reason. DR was calculated for the subgroup of subjects with a confirmed objective tumor response (PR or CR). CR is disappearance of all target and non-target lesions and normalization of tumor marker levels. PR is at least a 30% decrease in the sum of the LD of target lesions, taking as reference the baseline sum LD.

99.9999 = Not Available; DR was only summarized for subjects who had an objective tumor response.

End point type	Secondary
----------------	-----------

End point timeframe:

From the first documentation of objective tumor response to the first documentation of objective tumor progression, assessed up to treatment discontinuation or to death due to any reason or maximum up to 3 years, whichever occurred earlier.

End point values	Sorafenib Crossover to Tivozanib	First Line Tivozanib	First Line Sorafenib

Secondary: Progression-free Survival (PFS)

End point title	Progression-free Survival (PFS)
-----------------	---------------------------------

End point description:

PFS was defined as the date of first dose of study drug to the first documentation of objective tumor progression or death due to any reason, whichever occurred first. For the crossover subjects and subjects with first-line experience on tivozanib treatment, the timeframe for PFS assessment started from the date of first dose of tivozanib in the AV-951-09-902 study. For subjects with first-line experience on sorafenib treatment, the timeframe for PFS assessment started from the date of first dose of sorafenib in the AV-951-09-902.

99.9999 = Not available, For the crossover and first line tivozanib subjects the PFS time was calculated from the first dose date of tivozanib in the AV-951-09-902 study. For the first line sorafenib subjects the first dose date of sorafenib in the AV-951-09-902 was used in the PFS calculation.

End point type	Secondary
----------------	-----------

End point timeframe:

From the date of first dose of study drug (tivozanib or sorafenib) in the AV-951-09-902 study to the first documentation of objective tumor progression or death due to any reason or maximum up to 3 years, whichever occurred first.

25% Quartile	8.2 (6.0 to 12.1)	99.9999 (99.9999 to 99.9999)	99.9999 (99.9999 to 99.9999)	
50% Quartile	21.6 (17.0 to 27.6)	99.9999 (99.9999 to 99.9999)	99.9999 (99.9999 to 99.9999)	
75% Quartile	30.7 (28.8 to 99.9999)	99.9999 (99.9999 to 99.9999)	99.9999 (99.9999 to 99.9999)	

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From enrollment assessed up to 3 years of treatment or until follow-up (up to 30 days end-of-trial visit after treatment discontinuation), whichever occurred earlier

Assessment type	Non-systematic

Reporting groups

Reporting group title	Sorafenib Crossover to Tivozanib
-----------------------	----------------------------------

Reporting group description:

The subjects who failed sorafenib (had Response Evaluation Criteria in Solid Tumors [RECIST]-defined progressive disease) on the parent Protocol AV- 951-09-301 were offered tivozanib hydrochloride on Protocol AV- 951-09-902.

Reporting group title	First Line Tivozanib
-----------------------	----------------------

Reporting group description:

The subjects who were randomized to tivozanib (continued from the parent Protocol AV-951-09-301), and demonstrated clinical benefit and acceptable tolerability in Protocol AV-951-09-301.

Reporting group title	First Line Sorafenib
-----------------------	----------------------

Reporting group description:

The subjects who were randomized to sorafenib (continued from the parent Protocol AV-951-09-301) and demonstrated clinical benefit and acceptable tolerability were to be offered long term access to sorafenib.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
29 September 2010	<ul style="list-style-type: none">• Added further language regarding long-term survival follow-up.• Updated subject enrollment window to occur within the specified timeframe outlined in the eligibility criteria.• Revised Exclusion Criterion #1, added Exclusion Criteria #2 and #3, and renumbered criteria due to addition of new criteria.• Modified visit windows.• Modified window for clinic visits to occur.• Clarified use of end of treatment (EOT) Visit data for subjects initiating tivozanib and those continuing sorafenib or tivozanib from Protocol AV-951-09-301.• Modified language referring to frequency of labs in the Schedule of Activities.• Clarified that further imaging was required for subjects who had progressive disease (PD) and crossed over to tivozanib after sorafenib failure on this study.• Removed substrates from the cytochrome P450 enzyme 3A4 (CYP3A4) inhibitors and inducers table.• Removed criteria that tumor evaluation would be repeated 4 weeks to allow for confirmation of tumor status for patients with SD.• Modified that follow-up measurements had to have met stable disease (SD) criteria at least once after study entry, at a minimum interval of 4 weeks.
10 November 2010	<ul style="list-style-type: none">• Updated pharmacovigilance contact name.• Revised Inclusion Criterion #1 for clarity.• Revised language regarding contact for OS.• Clarified in Table 1: "Schedule of Study Events for Subjects Continuing Tivozanib or Sorafenib Therapy from AV-951-09-301" that the ± 2 day window applied to all visit procedures except study drug administration.• Reformatted Table 2: "Schedule of Study Events for Subjects Initiating Tivozanib After Sorafenib Failure on AV-951-09-301" and combined Cycles 1 and 2 to allow the addition of Cycle 4 (and all even numbered cycles) column.• Clarified the following in Table 2: "Schedule of Study Events for Subjects Initiating Tivozanib After Sorafenib Failure on AV-951-09-301": ± 2 day window applied to all visit procedures except study drug administration, coagulation parameters and thyroid function tests were collected on Day 1 of Cycle 1 only, and disease assessment (CT scan) was performed at end of Cycle 2 only.• Repositioned the "x" under Cycle 3 (and all odd numbered cycles) to show tivozanib administration.• Added a Cycle 4 (and all even numbered cycles) column and the timing of procedures and evaluations required at those time points.• Added contact information for reporting deaths, SAEs, and unexpected AEs.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
