

Clinical trial results:

A phase III, 12-week, multicentre, multinational, randomised, double-blind, double-dummy, 3 arm-parallel group study to test the efficacy of CHF 1535 50/6 microgram (fixed combination of beclomethasone dipropionate plus formoterol fumarate) versus a free combination of beclomethasone dipropionate 50 microgram plus formoterol fumarate 6 microgram and versus a monotherapy of beclomethasone dipropionate 50 microgram, in partly controlled asthmatic children.

Summary

EudraCT number	2009-016757-18

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000548-PIP01-09
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 September 2012
Is this the analysis of the primary completion data?	Yes
Primary completion date	28 September 2012
Global end of trial reached?	Yes
Global end of trial date	28 September 2012
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Demonstrate that CHF 1535 50/6 µg pMDI (daily dose: BDP 200 µg/FF 24 µg) is superior to the corresponding monotherapy with beclomethasone dipropionate 50 µg pMDI (daily dose: BDP 200 µg) and non-inferior relative to the corresponding free combination of beclomethasone dipropionate 50 µg pMDI (daily dose: BDP 200 µg) plus formoterol fumarate 6 µg pMDI (daily dose: FF 24 µg) (all treatments administered via the AeroChamber Plus™ spacer device) in terms of pulmonary function (change from baseline in pre-dose morning FEV1 after a 12-week treatment period) in paediatric patients with "partly controlled" persistent asthma.

BDP = Beclomethasone dipropionate

FF=Formoterol fumarate

CHF 1535=Fixed combination of BDP and FF

pMDI=Pressurised metered dose inhaler

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki, Good Clinical Practices (GCP) guidelines, and local law requirements. Other than routine care, no specific measures for protection of trial subjects were implemented.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	25 September 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 185
Country: Number of subjects enrolled	Slovakia: 35
Country: Number of subjects enrolled	Bulgaria: 111
Country: Number of subjects enrolled	France: 2
Country: Number of subjects enrolled	Germany: 26
Country: Number of subjects enrolled	Hungary: 108
Country: Number of subjects enrolled	Italy: 5
Country: Number of subjects enrolled	Russian Federation: 74
Country: Number of subjects enrolled	Ukraine: 77
Country: Number of subjects enrolled	Romania: 15

Worldwide total number of subjects	638
EEA total number of subjects	487

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	638
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Overall, 779 patients were screened; of these 638 patients were randomized.

Pre-assignment

Screening details:

Pre-screening visit was performed 3-7 days before screening visit. At screening visit, inclusion/exclusion criteria were assessed, followed by a Run-in period of 2 weeks when patients stopped their current asthma treatment and received BDP 100mcg pMDI.

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Blinding implementation details:

Placebo was provided to assure a complete double-blind, double-dummy design. The canisters/actuators of CHF 1535 and FF pMDI were of identical appearance.

Arms

Are arms mutually exclusive?	Yes
Arm title	Treatment A - fixed combination CHF 1535 50/6 µg

Arm description:

Treatment A: CHF 1535 50/6 µg (total daily dose: BDP 200 µg/FF 24 µg)

- 2 inhalations CHF 1535 50/6 µg pMDI via AeroChamber Plus spacer device
- 2 inhalations of BDP placebo pMDI with AeroChamber Plus spacer device, twice a day

BDP=Beclomethasone dipropionate

FF=Formoterol fumarate

CHF 1535=Fixed combination of BDP 50µg and FF 6 µg

Arm type	Experimental
Investigational medicinal product name	CHF 1535 50/6 µg
Investigational medicinal product code	
Other name	BDP/FF, Fixed combination of beclomethasone dipropionate and formoterol fumarate
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

CHF 1535 50/6 µg pMDI via AeroChamber Plus spacer device

- 2 inhalations twice a day

CHF 1535 50/6 µg=Fixed combination of BDPµg and FF 50µg/6 µg

BDP=Beclomethasone dipropionate

FF=Formoterol fumarate

pMDI=pressurised Metered Dose Inhaler

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	Extrafine BDP placebo
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

2 inhalations twice a day

Arm title	Treatment B - free combination BDP + FF
------------------	---

Arm description:

Treatment B: (total daily dose: BDP 200 µg + FF 24 µg)

- 2 inhalations BDP 50 µg pMDI via AeroChamber Plus spacer device
- 2 inhalations of FF 6 µg pMDI with AeroChamber Plus spacer device, twice a day

BDP = Beclomethasone dipropionate

FF=Formoterol fumarate

Arm type	Active comparator
Investigational medicinal product name	Beclomethasone dipropionate (BDP)
Investigational medicinal product code	
Other name	Beclomethasone dipropionate, Ventolair
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

BDP 50 µg pMDI via AeroChamber Plus spacer device

- 2 inhalations twice a day

BDP=Beclomethasone dipropionate

pMDI=pressurised Metered Dose Inhaler

Investigational medicinal product name	Formoterol fumarate (FF)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

FF 6 µg pMDI via AeroChamber Plus spacer device

- 2 inhalations twice a day.

FF=Formoterol fumarate

pMDI=pressurised Metered Dose Inhaler

Arm title	Treatment C - monotherapy BDP
------------------	-------------------------------

Arm description:

Treatment C: (total daily dose: BDP 200 µg)

- 2 inhalations BDP 50 µg pMDI via AeroChamber Plus spacer device
- 2 inhalations of CHF 1535 placebo pMDI with AeroChamber Plus spacer device, twice a day

Arm type	Active comparator
Investigational medicinal product name	Beclomethasone dipropionate (BDP)
Investigational medicinal product code	
Other name	Beclomethasone dipropionate, Ventolair
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

BDP 50 µg pMDI via AeroChamber Plus spacer device

- 2 inhalations twice a day

BDP=Beclomethasone dipropionate

pMDI=pressurised Metered Dose Inhaler

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	CHF 1535 placebo pMDI
Pharmaceutical forms	Inhalation solution
Routes of administration	Inhalation use

Dosage and administration details:

- 2 inhalations of CHF 1535 placebo pMDI with AeroChamber Plus spacer device, twice a day

BDP = Beclomethasone dipropionate
 FF=Formoterol fumarate
 CHF 1535=Fixed combination of BDP and FF

Statistical analyses

Statistical analysis title	Change from baseline to entire treatment (A vs C)
Statistical analysis description: Only evening PEF measurements performed before evening study medication intake were considered.	
Comparison groups	Treatment A - fixed combination CHF 1535 50/6 µg v Treatment C - monotherapy BDP

Number of subjects included in analysis	398
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.053
Method	ANCOVA
Parameter estimate	Adjusted mean difference
Point estimate	5.574
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.062
upper limit	11.21

Statistical analysis title	Change from baseline to entire treatment (A vs B)
Statistical analysis description: Only evening PEF measurements performed before evening study medication intake were considered.	
Comparison groups	Treatment A - fixed combination CHF 1535 50/6 µg v Treatment B - free combination BDP + FF
Number of subjects included in analysis	398
Analysis specification	Pre-specified
Analysis type	non-inferiority
P-value	= 0.919
Method	ANCOVA
Parameter estimate	Adjusted mean difference
Point estimate	0.294
Confidence interval	
level	95 %
sides	2-sided
lower limit	-5.344
upper limit	5.932

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

None.
