

Mean analyses of the Wechsler Intelligence Test show that the patient and control groups differ significantly. The patient group is superior to the comparison population in the subscales Number Reasoning and Number Symbol Test (see Table 13).

*Table 1: Mean comparison of Wechsler Adult Intelligence Scale of patient and control group at V1*

	M <sub>PG</sub>	M <sub>KG</sub>	t	p
<b>WAIS</b>				
Matrix reasoning	10.9	12.1	-1.36	.17
Digit span	10.8	9.3	2.11	.04*
Letter-Number Sequencing	9.1	11.7	-3.69	<.01*

\*result is significant
