

Clinical trial results:

Long-term follow-up of study participants from GlaxoSmithKline (GSK) Biologicals'-sponsored clinical trials evaluating Human Immunodeficiency Virus vaccine [F4co (p24-RT-Nef-p17)/AS01B vaccine] (732461) for therapeutic use.

Due to a system error, the data reported in v1 is not correct and has been removed from public view.

Summary

EudraCT number	2009-018097-64
Trial protocol	DE
Global end of trial date	19 May 2014

Results information

Result version number	v2 (current)
This version publication date	13 July 2016
First version publication date	29 May 2015
Version creation reason	• Correction of full data set Data correction due to a system error in EudraCT – Results

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	24 September 2012
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 May 2014
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

- To assess the health status of HIV-infected persons who have been previously enrolled in studies evaluating the F4co/AS01B vaccine
- To assess CD4 count and viral load kinetics of HIV-infected persons who have been previously enrolled in studies evaluating the F4co/AS01B vaccine
- To assess time to (re)initiation of ART of HIV-infected persons who have been previously enrolled in studies evaluating the F4co/AS01B vaccine
- To assess the incidence of specific clinical events (cardiovascular, end stage renal and hepatic events, opportunistic infections, cancers) of HIV-infected persons who have been previously enrolled in studies evaluating the F4co/AS01B vaccine
- To evaluate the safety of the F4co/AS01B vaccine and to check the safety of study participation

Protection of trial subjects:

All subjects were supervised after vaccination/product administration with appropriate medical treatment readily available. Vaccines were administered by qualified and trained personnel. Vaccines were administered only to eligible subjects that had no contraindications to any components of the vaccines.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 March 2010
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	7 Years
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 37
Country: Number of subjects enrolled	France: 52
Country: Number of subjects enrolled	Germany: 69
Country: Number of subjects enrolled	United States: 32
Worldwide total number of subjects	190
EEA total number of subjects	158

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	190
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

During the screening the following steps occurred: check for inclusion/exclusion criteria, contraindications/precautions, medical history of the subjects and signing informed consent forms.

Pre-assignment period milestones

Number of subjects started	190
Number of subjects completed	165

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Unknown completion reason: 25
----------------------------	-------------------------------

Period 1

Period 1 title	Year 1 (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

Partially blind for the ART-Naïve population: Results for this group may be amended at a forthcoming update of this summary as this group includes subjects previously enrolled in the ongoing 2010-021356-26 study, from which there may be more subjects to be enrolled.

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	HIV 732462 Naïve Group
------------------	------------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	GSK HIV vaccine 732462
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Arm title	Placebo Naïve Group
------------------	---------------------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Physiological Saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Arm title	Blinded Naïve Group
------------------	---------------------

Arm description: -	
Arm type	Active comparator
Investigational medicinal product name	Physiological Saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Investigational medicinal product name	GSK HIV vaccine 732462
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Arm title	HIV 732462 Treated Group
------------------	--------------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	GSK HIV vaccine 732462
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Arm title	Placebo Treated Group
------------------	-----------------------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	Physiological Saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intramuscular use

Dosage and administration details:

No additional vaccine doses were administered in this study, all vaccine doses were administered during the primaty studies.

Number of subjects in period 1^[1]	HIV 732462 Naïve Group	Placebo Naïve Group	Blinded Naïve Group
Started	9	8	129
Completed	7	8	129
Not completed	2	0	0
Lost to follow-up	2	-	-

Number of subjects in period 1^[1]	HIV 732462 Treated Group	Placebo Treated Group
Started	9	10
Completed	9	10
Not completed	0	0
Lost to follow-up	-	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Out of 190 enrolled, 25 have an unknown status due to ongoing study 111679 and blinded results

Statistical analyses

No statistical analyses for this end point

Secondary: Frequency of F4-computed fussion protein and Nef, P17, P24, RT antigens – specific cluster of differentiation CD40L+ CD4+ T- cells expressing at least one cytokine

End point title	Frequency of F4-computed fussion protein and Nef, P17, P24, RT antigens – specific cluster of differentiation CD40L+ CD4+ T- cells expressing at least one cytokine ^[16]
-----------------	---

End point description:

Magnitude was defined as the frequency of F4co, P17, P24, Nef and RT-specific CD40L+ CD4+ T-cells expressing at least one cytokine.

End point type	Secondary
----------------	-----------

End point timeframe:

At Year 0 and Year 1

Notes:

[16] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The analysis did not include the Blinded Group.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 August 2011	Amendment 1 The names of the persons now in charge of the study have been changed on the cover page. Section 11 and Appendix C, which provide country-specific information for participating centres in France, have been added. Some aspects of study design, endpoints and study conclusion have been reworded for clarity.
06 February 2012	Amendment 2 This amendment was developed in order to extend safety follow-up to the collection of information on 1) Serious adverse events considered by the investigator to be related to study vaccination (which was performed in previous GSK-sponsored trials evaluating the F4co/AS01B vaccine) or study participation and 2) Potential immune-mediated diseases. The US BB-IND number has also been added where required by GSK's protocol template.
13 January 2014	Recent data from study TH HIV-008 (Efficacy and safety of HIV vaccine 732462 in ART-naïve HIV-1 infected persons; eTrack study number: 111679) failed to demonstrate a significant reduction of HIV-1 viral load after vaccination with two or three doses of F4co/AS01B, as compared to a placebo. The observed incidence of adverse events after F4co/AS01B vaccination, their type and severity were acceptable. No clinical relevant changes in any laboratory parameters which could be imputed to the F4co/AS01B vaccine were observed. There was no clinically significant dose-dependent reactogenicity variation. A first evaluation of the long-term safety profile has been performed in study TH HIV-011 (cf interim report Y1, includes subjects from studies TH HIV-008 and TH HIV-010), where no significant safety issue was reported. In consequence, the long-term evaluation of the benefit/risk associated with study vaccination has become irrelevant and the present TH HIV-011 study, initially planned to last 7 years, will be prematurely terminated after collection of Year 1 data for all subjects enrolled in the study. Minor changes have been implemented (e.g., update of the listing of contributing authors [names and titles], changes in tenses, addition of abbreviations), and typographical errors/misspellings have been corrected.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
------	--------------	--------------

24 September 2012	Recent data from study TH HIV-008 (Efficacy and safety of HIV vaccine 732462 in ART-naïve HIV-1 infected persons; eTrack study number: 111679) failed to demonstrate a significant reduction of HIV-1 viral load after vaccination with two or three doses of F4co/AS01B, as compared to a placebo. In consequence, the long-term evaluation of the benefit/risk associated with study vaccination has become irrelevant and the present TH HIV-011 study, initially planned to last 7 years, will be prematurely terminated after collection of Year 1 data for all subjects enrolled in the study.	-
