

## Clinical trial results:

### A Multi-center, Open-label, Extension Study to Evaluate the Long-term Efficacy and Safety of Oral Tolvaptan Tablet Regimens in Subjects with Autosomal Dominant Polycystic Kidney Disease (ADPKD)

#### Summary

EudraCT number	2010-018401-10
Trial protocol	DE FR GB BE IT NL
Global end of trial date	29 February 2016

#### Results information

Result version number	v1 (current)
This version publication date	17 March 2017
First version publication date	17 March 2017

#### Trial information

##### Trial identification

Sponsor protocol code	156-08-271
-----------------------	------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01214421
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Otsuka Pharmaceutical Development & Commercialization, Inc.
Sponsor organisation address	2440 Research Boulevard, Rockville, United States, MD 20850
Public contact	Otsuka Transparency Department, Otsuka Pharmaceutical Development & Commercialization, Inc., DT-inquiry@otsuka.jp
Scientific contact	Otsuka Transparency Department, Otsuka Pharmaceutical Development & Commercialization, Inc., DT-inquiry@otsuka.jp

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	29 February 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 February 2016
Global end of trial reached?	Yes
Global end of trial date	29 February 2016
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of this ongoing open-label trial was to demonstrate whether tolvaptan modifies ADPKD progression as measured by changes in endpoints of total kidney volume (TKV) and renal function (eGFR CKD-EPI) measured from baseline in TEMPO 3:4 to Month 24 in TEMPO 4:4. Disease modification was evidenced further by the non-inferiority of endpoint progression slope during this trial for those receiving early-treatment with tolvaptan, as compared to those with delayed-treatment, ie, whose initial treatment was with placebo in Trial 2006-002768-24.

Protection of trial subjects:

This trial is being conducted under the investigational new drug exemption of the US FDA, 21 CFR Part 312. It is being performed in compliance with Good Clinical Practice, the sponsor's standard operating procedures, and ethical principles for the protection of human research subjects that have their origins in the Declaration of Helsinki. Consistent with ethical principles for the protection of human research subjects, no study procedures were performed on study candidates until written consent had been obtained from them. The informed consent form, protocol, and amendments for this study were submitted to and approved by the institutional review board (IRB) or ethics committee (EC) at each respective study center.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	26 May 2010
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 35
Country: Number of subjects enrolled	Australia: 43
Country: Number of subjects enrolled	Belgium: 55
Country: Number of subjects enrolled	Canada: 40
Country: Number of subjects enrolled	France: 66
Country: Number of subjects enrolled	Germany: 124
Country: Number of subjects enrolled	Italy: 45
Country: Number of subjects enrolled	Netherlands: 69
Country: Number of subjects enrolled	Poland: 71
Country: Number of subjects enrolled	Romania: 19
Country: Number of subjects enrolled	Russian Federation: 13
Country: Number of subjects enrolled	United Kingdom: 57
Country: Number of subjects enrolled	United States: 446

Worldwide total number of subjects	1083
EEA total number of subjects	506

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1083
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

This study was conducted in 1083 participants at 106 trial sites in 13 countries.

### Pre-assignment

Screening details:

All subjects who completed a tolvaptan autosomal dominant polycystic kidney disease (ADPKD) or renal impairment trial were eligible to be screened for this study. The prespecified analyses were only for those that rolled over (transition time 13-829 days) from TEMPO 3:4 to month 24 in TEMPO 4:4.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

This was an open-label trial; blinding procedures were not applicable.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Trial 2006-002768-24 Prior Tolvaptan

Arm description:

Participants received a daily split-dose of tolvaptan titrated to the maximally tolerated dose, starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability were given orally twice daily until last participant originating from trial 2006-002768-24 who was eligible for efficacy analysis completed the Month 24 visit.

Arm type	Experimental
Investigational medicinal product name	Tolvaptan
Investigational medicinal product code	OPC-41061
Other name	OPC-156
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily split-dose of tolvaptan titrated to the maximally tolerated dose. Starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability.

<b>Arm title</b>	Trial 2006-002768-24 Prior Placebo
------------------	------------------------------------

Arm description:

Participants received placebo in previous trial 2006-002768-24 were enrolled in this study.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Participants received placebo in previous trial 2006-002768-24 were enrolled in this study.

<b>Arm title</b>	Other Trials Prior Tolvaptan
------------------	------------------------------

Arm description:

Participants received a daily split-dose of tolvaptan titrated to the maximally tolerated dose, starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability were given orally twice daily until last participant originating from other trials who was eligible for efficacy analysis completed the Month 24 visit.

Arm type	Experimental
Investigational medicinal product name	Tolvaptan
Investigational medicinal product code	OPC-41061
Other name	OPC-156
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily split-dose of tolvaptan titrated to the maximally tolerated dose. Starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability.

<b>Arm title</b>	Other Trials Prior Placebo
------------------	----------------------------

Arm description:

Participants received placebo in other previous trials were enrolled in this study.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Participants received placebo in other previous trials were enrolled in this study.

<b>Number of subjects in period 1</b>	Trial 2006-002768-24 Prior Tolvaptan	Trial 2006-002768-24 Prior Placebo	Other Trials Prior Tolvaptan

## End points

### End points reporting groups

Reporting group title	Trial 2006-002768-24 Prior Tolvaptan
-----------------------	--------------------------------------

Reporting group description:

Participants received a daily split-dose of tolvaptan titrated to the maximally tolerated dose, starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability were given orally twice daily until last participant originating from trial 2006-002768-24 who was eligible for efficacy analysis completed the Month 24 visit.

Reporting group title	Trial 2006-002768-24 Prior Placebo
-----------------------	------------------------------------

Reporting group description:

Participants received placebo in previous trial 2006-002768-24 were enrolled in this study.

Reporting group title	Other Trials Prior Tolvaptan
-----------------------	------------------------------

Reporting group description:

Participants received a daily split-dose of tolvaptan titrated to the maximally tolerated dose, starting daily tolvaptan dose of 45mg/15mg titrated to 60mg/30mg, then 90mg/30mg based on tolerability were given orally twice daily until last participant originating from other trials who was eligible for efficacy analysis completed the Month 24 visit.

Reporting group title	Other Trials Prior Placebo
-----------------------	----------------------------

Reporting group description:

Participants received placebo in other previous trials were enrolled in this study.

Subject analysis set title	Early treated
----------------------------	---------------

Subject analysis set type	Sub-group analysis
---------------------------	--------------------

Subject analysis set description:

Participants were randomized to tolvaptan and placebo in trial 2006-002768-24.

Subject analysis set title	Delayed treated
----------------------------	-----------------

Subject analysis set type	Sub-group analysis
---------------------------	--------------------

Subject analysis set description:

Participants were enrolled and treated to tolvaptan and placebo in trial 2010-018401-10.

### Primary: Percent Change in Total Kidney Volume (TKV)

End point title	Percent Change in Total Kidney Volume (TKV)
-----------------	---

End point description:

For participants continuing from protocol 2006-002768-24: change from trial 2006-002768-24 baseline TKV at month 24 of trial 2010-018401-10 comparing early-treated (those previously treated with tolvaptan) to delayed-treated (those previously treated with placebo).

End point type	Primary
----------------	---------

End point timeframe:

5+ years

End point values	Early treated	Delayed treated		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	505	267		
Units: percent change from baseline				
arithmetic mean (standard deviation)	28.66 (± 26.14)	30.58 (± 27.21)		

## Statistical analyses

Statistical analysis title	Treatment comparisons
Statistical analysis description:	
Derived from a MMRM analysis of the percent change from baseline in total kidney volume with fixed factors of treatment, visit, treatment visit interaction, hypertensive status, renal volume status and creatinine clearance status at baseline, region, baseline value, and baseline visit interaction as covariates, and with an unstructured variance covariance matrix.	
Comparison groups	Delayed treated v Early treated
Number of subjects included in analysis	772
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.358
Method	Mixed models analysis
Parameter estimate	Ratio of geometric means (final values)
Point estimate	0.99
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.96
upper limit	1.02

## Secondary: Change in Estimated Glomerular Filtration Rate (eGFR)

End point title	Change in Estimated Glomerular Filtration Rate (eGFR)
End point description:	
For participants randomized to tolvaptan and placebo in trial 2006-002768-24 and enrolled and treated in trial 2010-018401-10 as early-treated and delayed-treated groups: change from trial 2006-002768-24 baseline eGFR at month 24 of trial 2010-018401-10.	
End point type	Secondary
End point timeframe:	
24 months	

End point values	Early treated	Delayed treated		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	503	264		
Units: ml/min/1.73m <sup>2</sup>				
least squares mean (standard deviation)	-16.77 (± 13.16)	-19.92 (± 16.4)		

## Statistical analyses

Statistical analysis title	Treatment comparisons
Statistical analysis description:	
Derived from a mixed model repeated measures (MMRM) analysis with fixed factors of treatment, visit, treatment visit interaction, hypertensive status, renal volume status and creatinine clearance status at baseline, region, baseline value, and baseline visit interaction as covariates, and with a heterogeneous	

toeplitz variance covariance matrix.

Comparison groups	Delayed treated v Early treated
Number of subjects included in analysis	767
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.0003
Method	Mixed models analysis
Parameter estimate	LS mean difference (final values)
Point estimate	3.15
Confidence interval	
level	95 %
sides	2-sided
lower limit	1.462
upper limit	4.836

### Secondary: Slope of TKV

End point title	Slope of TKV
End point description: For participants randomized to tolvaptan and placebo in trial 2006-002768-24 and enrolled and treated in trial 2010-018401-10 as early treated and delayed treatment groups: annual growth of TKV (slope) measured from TEMPO 4:4 baseline up to Month 24.	
End point type	Secondary
End point timeframe: 24 months	

End point values	Early treated	Delayed treated		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	509	268		
Units: %/Yr				
number (not applicable)	6.164	4.96		

### Statistical analyses

Statistical analysis title	Treatment comparisons
Statistical analysis description: Derived from testing interaction of time and treatment using linear mixed model in which intercept and time are treated as random effects.	
Comparison groups	Early treated v Delayed treated

Number of subjects included in analysis	777
Analysis specification	Pre-specified
Analysis type	non-inferiority
P-value	= 0.0462
Method	Mixed models analysis
Parameter estimate	Ratio of geometric means (final values)
Point estimate	1.011
Confidence interval	
level	95 %
sides	2-sided
lower limit	1
upper limit	1.023

## Secondary: Slope of eGFR (CKD-EPI)

End point title	Slope of eGFR (CKD-EPI)
End point description:	
For participants randomized to tolvaptan and placebo in trial 2006-002768-24 and enrolled and treated in trial 2010-018401-10 as early treated and delayed treatment groups: annual change in eGFR (slope) from 4:4 baseline up to Month 24.	
End point type	Secondary
End point timeframe:	
24 months	

End point values	Early treated	Delayed treated		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	549	304		
Units: ml/min/1.73m <sup>2</sup> /year				
number (not applicable)	-3.255	-3.142

Statistical analysis title	Treatment comparisons
Statistical analysis description:	
Derived from testing interaction of time and treatment using linear mixed model in which intercept and time are treated as random effects.	
Comparison groups	Early treated v Delayed treated
Number of subjects included in analysis	853
Analysis specification	Pre-specified
Analysis type	non-inferiority
P-value	= 0.7259
Method	Mixed models analysis
Parameter estimate	Ratio of geometric means (final values)
Point estimate	-0.113

Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.746
upper limit	0.52

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events (AEs) and serious adverse events (SAEs) were reported from the signing of the informed consent form until the end of the study regardless of whether the subjects were on or off active study medication (approximately 5 years).

Adverse event reporting additional description:

The AEs were continued to be captured even when the study medication was discontinued for various participants. All subjects who died during the trial were in the rollover 251 tolvaptan treatment group. None of the 5 subjects with TEAEs that led to death were taking IMP at the time of death.

Assessment type	Non-systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
02 June 2011	Amendment 1 (dated 02 Jun 2011) added safety laboratory tests at 3-month intervals between the 6-month scheduled visits, added guidance to investigators regarding the work up of potential Hy's criteria cases, and revised the statistical approach to the disease modification analysis. Additional changes were made that did not have a major impact on trial conduct. Minor procedural changes included a modification of titration instructions to allow all participants to titrate to the highest dose tolerated regardless of previous trial dosing; the addition of eGFR calculation by CKD-EPI equation; extension of trial enrollment at the sponsor's discretion; change to entry criteria to allow participants who were unable to complete prior trials due to exceptional circumstances making them eligible for enrollment beginning in January 2012, with permission of the sponsor and approval of the medical monitor (these participants had to complete enrollment by May 2012); change to entry criteria to extend the timing of screening eGFR; and combining of the entry exclusion criterion regarding marketed therapies affecting PKD cysts with the efficacy exclusion criterion of medications or illnesses likely to confound endpoint assessments.
19 February 2013	Amendment 2 (dated 19 Feb 2013) clarified that hepatitis testing at screening was optional and that participants who chose to undergo hepatitis testing might receive appropriate pre- and post-screening counseling as per local requirements and best practices. It also clarified procedures for the inclusion and ongoing care of participants with eGFR < 30 mL/min/1.73m <sup>2</sup> (by MDRD). It also specified the SAEs that were considered related to the underlying ADPKD being studied in the trial and, therefore, might not be reported to regulatory authorities as expedited reports. Amendment 2 also added the option to include the following evaluations to the protocol-specified chemistry panel if clinically indicated and approved by the medical monitor: serum calcium, phosphorous, parathyroid hormone, vitamin D, and bicarbonate levels. It also added serum laboratory tests at 1-month ( $\pm$ 1 week) intervals up to Month 18 between the scheduled 6-month visits rather than at 3-month intervals and reporting of product quality complaints. It clarified that sites would receive only the TKV assessment following each MRI evaluation, and trial participation options after participants discontinued tolvaptan. The exploratory endpoints of progressing hypertension and worsening albuminuria were removed.
11 March 2014	Amendment 3 (dated 11 Mar 2014) incorporated provisions for participants who terminated from this trial early to continue on tolvaptan treatment (under this protocol) until a subsequent trial was ready to screen and enroll participants. The exact dates for trial completion varied among sites, according to the approval dates of the individual country IRB/IECs for sites, but the trial was expected to be completed by 31 Dec 2014. Safety information for the overall program was updated, specifically the possible clinical importance of elevated hepatic transaminase levels as early indicators of hepatic toxicity. Amendment 3 also provided additional information on DNA genotyping, clarified information on the need for an MRI 24 months on treatment, and established a lower titrated dose, on a case-by-case basis, with prior consultation and approval of the medical monitor. Administrative Change 1 (dated 01 May 2014) was made primarily to restore the list of Institutions Concerned with the Trial (contained in Appendix 2 of the protocol), plus 2 additional institutions, as the former was accidentally deleted from the existing, approved amendment during the development of Amendment 3. Names of sponsor personnel listed in protocol Appendix 1 were updated to clearly depict administrative changes, and minor editorial changes were also made.

Notes:

---

## **Interruptions (globally)**

Were there any global interruptions to the trial? No

## **Limitations and caveats**

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The trial did not meet its primary endpoint as both groups showed similar decreases in the rate of TKV growth due in part to unforeseen limitations in the trial design. However, early-treatment resulted in cumulative improvements in renal function.
