

## Clinical trial results:

**Estudio de fase II de la combinación de panitumumab con paclitaxel como tratamiento de primera línea de sujetos con cáncer de cabeza y cuello recurrente o metastásico. Estudio “VECTITAX”.**

### Summary

EudraCT number	2010-018898-37
Trial protocol	ES
Global end of trial date	23 September 2014

### Results information

Result version number	v1 (current)
This version publication date	08 February 2020
First version publication date	08 February 2020

### Trial information

#### Trial identification

Sponsor protocol code	TTCC-2009-03
-----------------------	--------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01264328
WHO universal trial number (UTN)	-

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	02 July 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	23 September 2014
Global end of trial reached?	Yes
Global end of trial date	23 September 2014
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the effect of the combination of panitumumab and paclitaxel on objective response rate in first-line treatment of metastatic or recurrent squamous cell carcinoma of head and neck (SCCHN).

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki (Seoul 2008 version) and the local laws and regulations. The study was approved by the Institutional Review Board of the participant centers. All patients gave written informed consent. Patients could completely or partially withdraw study at any time for any reason without any disadvantage or prejudice.

The infusion was stopped in patients who experienced any serious reaction during the administration of panitumumab. Patients who experienced toxicities and needed to permanently discontinue the administration of panitumumab were withdrawn of treatment but continued a safety and survival follow-up.

Background therapy:

Not applicable.

Evidence for comparator:

Panitumumab, a fully human IgG2 anti-EGFR monoclonal antibody, has shown activity in preclinical models of SCCHN and promising activity in refractory SCCHN patients in a phase I clinical trial. Recently, our cooperative group also reported encouraging outcomes of anti-EGFR-paclitaxel combination in a phase II study. On the basis of this background, a phase II clinical trial (VECTITAX study) was designed with the objective of evaluating the activity and safety profile of panitumumab in combination with paclitaxel in patients with recurrent or metastatic SCCHN.

Actual start date of recruitment	09 March 2011
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	24 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 40
Worldwide total number of subjects	40
EEA total number of subjects	40

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	29
From 65 to 84 years	11
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Between March 2011 and May 2012, 40 patients were included in 12 centers in Spain (ITT population). One patient met two exclusion criteria (second active neoplasm and B-Hepatitis) and four lacked post-baseline response assessment. Therefore, the PP population comprised 35 patients.

### Pre-assignment

Screening details:

Key inclusion criteria: adult patients with histologically/cytologically confirmed recurrent or metastatic SCCHN; ECOG performance status of 0–1; measurable disease according to RECIST 1.1 criteria; adequate hematologic, renal, hepatic and metabolic functions. Prior treatment with anti-EGFR agents was not allowed within 24 weeks prior to study.

### Period 1

Period 1 title	Baseline (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

Not applicable.

### Arms

Arm title	Panitumumab + paclitaxel
-----------	--------------------------

Arm description:

Patients received paclitaxel (80 mg/m<sup>2</sup>/week) and panitumumab (6 mg/kg/2 weeks) until disease progression or unacceptable toxicity.

Arm type	Experimental
Investigational medicinal product name	Panitumumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:

Panitumumab 6 mg/kg was administered every 2 weeks, in one hour the first day and in 30 min thereafter (if no infusional reaction was observed).

Investigational medicinal product name	Paclitaxel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Paclitaxel 80 mg/m<sup>2</sup> was weekly administered one hour after panitumumab in one hour infusion.

<b>Number of subjects in period 1</b>	Panitumumab + paclitaxel
Started	40
Completed	40

## End points

### End points reporting groups

Reporting group title	Panitumumab + paclitaxel
Reporting group description: Patients received paclitaxel (80 mg/m <sup>2</sup> /week) and panitumumab (6 mg/kg/2 weeks) until disease progression or unacceptable toxicity.	
Subject analysis set title	ITT
Subject analysis set type	Intention-to-treat
Subject analysis set description: The intention-to-treat (ITT) population included all patients in the study who signed the informed consent form and received at least one dose of panitumumab.	
Subject analysis set title	PP
Subject analysis set type	Per protocol
Subject analysis set description: The per-protocol (PP) population is defined as the subset of patients of the ITT population who completed the study without any major protocol deviations.	

### Primary: Objective response rate (ORR)

End point title	Objective response rate (ORR) <sup>[1]</sup>
End point description: Incidence of confirmed complete response (CR) or partial response (PR) during the treatment period according to RECIST v1.1 criteria in the intention-to-treat population (ITT).	
End point type	Primary
End point timeframe: Tumor assessments were planned to be performed every two months. Response confirmation was to be assessed not before 4 weeks after a partial or complete response, or before 6 weeks after a stable disease.	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Data were summarized using descriptive statistics.	

End point values	ITT	PP		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	40	35		
Units: Percentage of patients				
number (confidence interval 95%)				
Yes (CR+PR)	47.50 (32.02 to 62.98)	51.43 (34.87 to 67.99)		
No	52.50 (37.02 to 67.98)	48.57 (32.01 to 65.13)		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Best response

End point title	Best response
-----------------	---------------

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

Tumor assessments were planned to be performed every two months. Response confirmation was to be assessed not before 4 weeks after a partial or complete response, or before 6 weeks after a stable disease.

End point values	ITT	PP		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	40	35		
Units: Percentage of patients				
arithmetic mean (confidence interval 95%)				
Complete response	15.00 (3.93 to 26.07)	17.14 (4.66 to 29.63)		
Partial response	32.50 (17.99 to 47.01)	34.29 (18.56 to 50.01)		
Stable disease	27.50 (13.66 to 41.34)	31.43 (16.05 to 46.81)		
Disease progression	15.00 (3.93 to 26.07)	17.14 (4.66 to 29.63)		
Non evaluable	10.00 (0.70 to 19.30)	0.00 (0.00 to 0.00)		

## Statistical analyses

No statistical analyses for this end point

## Secondary: Disease control rate

End point title	Disease control rate
-----------------	----------------------

End point description:

Incidence of confirmed complete response (CR) or partial response (PR) or stable disease (SD) during the treatment period according to RECIST v1.1 criteria.

End point type	Secondary
----------------	-----------

End point timeframe:

Tumor assessments were planned to be performed every two months. Response confirmation was to be assessed not before 4 weeks after a partial or complete response, or before 6 weeks after a stable disease.

End point values	ITT	PP

Number of subjects analysed	40	35		
Units: Percentage of patients				
number (confidence interval 95%)				
Yes (CR+PR+SD)	75.00 (61.58 to 88.42)	82.86 (70.37 to 95.34)		
No	25.00 (11.58 to 38.42)	17.14 (4.66 to 29.63)		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Time to response

End point title	Time to response
-----------------	------------------

End point description:

Time to response is defined as the number of months between the date of the first treatment administration and the date of the first objective response confirmation.

End point type	Secondary
----------------	-----------

End point timeframe:

Until confirmed response (CR+PR). Calculated only for patients who presented objective response.

End point values	ITT	PP		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	19	18		
Units: months				
median (inter-quartile range (Q1-Q3))	4.0 (3.7 to 7.2)	3.9 (3.7 to 7.2)		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Duration of response

End point title	Duration of response
-----------------	----------------------

End point description:

Time from the first response until disease progression or death due to disease progression (first that occurred).

End point type	Secondary
----------------	-----------

End point timeframe:

Until disease progression or death. Calculated only for patients who responded during the treatment period.

End point values	ITT			
Subject group type	Subject analysis set

Skin fissures			
subjects affected / exposed	5 / 40 (12.50%)		
occurrences (all)	20		
Skin injury			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	7		
Onycholysis			

subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	4		
Dry skin			
subjects affected / exposed	17 / 40 (42.50%)		
occurrences (all)	23		
Pruritus			
subjects affected / exposed	15 / 40 (37.50%)		
occurrences (all)	23		
Palmar-plantar erythrodysesthesia syndrome			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	3		
Skin toxicity			
subjects affected / exposed	8 / 40 (20.00%)		
occurrences (all)	13		
Nail toxicity			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	5		
Nail disorder			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	5		
Skin ulcer			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	4		
Renal and urinary disorders			
Dysuria			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	4		
Musculoskeletal and connective tissue disorders			
Arthralgia			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	3		
Cervicalgia			
subjects affected / exposed	5 / 40 (12.50%)		
occurrences (all)	9		
Back pain			

subjects affected / exposed	2 / 40 (5.00%)		
occurrences (all)	4		
Pain in jaw			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	4		
Pain in extremity			
subjects affected / exposed	2 / 40 (5.00%)		
occurrences (all)	3		
Musculoskeletal pain			
subjects affected / exposed	2 / 40 (5.00%)		
occurrences (all)	2		
Musculoskeletal chest pain			
subjects affected / exposed	2 / 40 (5.00%)		
occurrences (all)	3		
Infections and infestations			
Oral candidiasis			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	4		
Cellulitis			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	3		
Conjunctivitis			
subjects affected / exposed	10 / 40 (25.00%)		
occurrences (all)	12		
Folliculitis			
subjects affected / exposed	2 / 40 (5.00%)		
occurrences (all)	4		
Respiratory tract infection			
subjects affected / exposed	4 / 40 (10.00%)		
occurrences (all)	6		
Localised infection			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	3		
Lung infection			
subjects affected / exposed	3 / 40 (7.50%)		
occurrences (all)	3		

Nasopharyngitis subjects affected / exposed occurrences (all)	3 / 40 (7.50%) 5		
Pneumonia subjects affected / exposed occurrences (all)	3 / 40 (7.50%) 4		
Paronychia subjects affected / exposed occurrences (all)	16 / 40 (40.00%) 29		
Superinfection subjects affected / exposed occurrences (all)	2 / 40 (5.00%) 2		
Metabolism and nutrition disorders			
Decreased appetite subjects affected / exposed occurrences (all)	19 / 40 (47.50%) 32		
Hypocalcaemia subjects affected / exposed occurrences (all)	7 / 40 (17.50%) 23		
Hypokalaemia subjects affected / exposed occurrences (all)	3 / 40 (7.50%) 5		
Hypomagnesaemia subjects affected / exposed occurrences (all)	21 / 40 (52.50%) 72		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
15 April 2010	<p>After reviewing the considerations of the Clinical Investigation Ethic Committees the suggested changes in the Protocol, the patient Information Sheet and the Informed Consent Form were performed, as well as in the pregnant partner data emission form, with the aim of improving the comprehension.</p> <p>Moreover, the parallel optional study of molecular predictive factors (appendix L in the study protocol) as well as the patient Information Sheet and the corresponding Informed Consent (Appendix M of the study protocol) were attached, being both of new development.</p>

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
