General information about the trial

Main objective of the trial:

The main objectives of this study were to assess the efficacy and safety of olesoxime 10 milligrams per kilogram (mg/kg) once daily liquid suspension formulation in spinal muscular atrophy (SMA) Type 2 or Type 3 non-ambulant subjects, aged 3 - 25 years.

Protection of trial subjects:

Each subject, or the subject's representative, signed an informed consent form before participating in the study.
