

Clinical trial results:

A single arm, open-label, multicenter study evaluating the long-term, safety and tolerability of 0.5 mg fingolimod (FTY) administered orally once daily in patients with relapsing form of multiple sclerosis

Summary

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 October 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	19 October 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate long-term safety and tolerability of fingolimod 0.5 mg/day in patients with Multiple Sclerosis for the duration of the study.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	13 September 2010
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Adolescents (12-17 years)	1
Adults (18-64 years)	4121
From 65 to 84 years	3
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This was an open-label, multi-center, single treatment arm design allowing patients participating in the fingolimod MS clinical development program to enroll in order to collect additional long-term safety, tolerability, efficacy, and health outcomes data.

Pre-assignment

Screening details:

This study had two parts: Part 1, collecting long-term safety, tolerability, efficacy and health outcomes data until all Part 1 end of study (EOS) visits and last follow-up visit; Part 2, collecting limited safety and tolerability data, in a subset of patients who participated in Part 1, and other eligible patients from ongoing fingolimod trials.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Arm title	Fingolimod 0.5 mg/day
-----------	-----------------------

Arm description:

Open-label fingolimod 0.5 mg, taken orally once daily

Arm type	Experimental
Investigational medicinal product name	Fingolimod
Investigational medicinal product code	
Other name	FTY720
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

0.5 mg taken orally once daily

Number of subjects in period 1	Fingolimod 0.5 mg/day
Started	4125
Safety Set	4083
Fingolimod Full Analysis Set	4046
Completed	3481
Not completed	644
Abnormal laboratory value(s)	51
Adverse event, serious fatal	16
Consent withdrawn by subject	144
Adverse event, non-fatal	170
Unsatisfactory therapeutic effect	112
Condition no longer requires study drug	12

administrative problems	74
Lost to follow-up	50
Abnormal test procedure result(s)	3
Protocol deviation	12

Secondary: Part I: Aggregate annualized Relapse Rates (ARR) from first dose of Fingolimod

End point title	Part I: Aggregate annualized Relapse Rates (ARR) from first dose of Fingolimod
-----------------	--

End point description:

Annualized relapse rate (ARR) is defined as the number of all relapses (including both confirmed and unconfirmed relapses) experienced during a specific period of time adjusted to a one-year period. ARR is calculated as follows: (total number of all relapses) / (total number of days in the study for all patients for that specific period of time) x 365.25. Month 0 is the first dose of fingolimod study drug among all studies in which patient participated. Only descriptive analysis performed.

End point title	Part I: Number of Participants with relapses (confirmed and unconfirmed) from first dose of Fingolimod
-----------------	--

End point description:

A relapse is defined as the appearance of a new neurological abnormality or worsening of previously stable or improving pre-existing neurological abnormality, separated by at least 30 days from onset of a preceding clinical demyelinating event. The abnormality must be present for at least 24 hours and occur in the absence of fever ($<37.5^{\circ}\text{C}$) or infection. In Study Part One, a relapse must be confirmed by an Expanded Disability Status Scale (EDSS) certified Physician within 7 days of the onset of symptoms. A relapse is confirmed when it is accompanied by an increase of at least half a step (0.5) on the EDSS or an increase of 1 point on two different Functional Systems (FS) of the EDSS or 2 points on one of the FS (excluding Bowel/Bladder or Cerebral FS). Month 0 is the first dose of fingolimod study drug among all studies in which patient participated. Only descriptive analysis performed.

Secondary: Part I: Number of Participants with confirmed 6-month disability progression after first dose of Fingolimod

End point title	Part I: Number of Participants with confirmed 6-month disability progression after first dose of Fingolimod
-----------------	---

End point description:

Disability progression was defined based on an increase in the EDSS score by 1.5 point for patients with a first dose of fingolimod (FDF) baseline EDSS score of 0, 1 point for patients with FDF baseline EDSS of ≥ 1 and ≤ 5.5 , and by 0.5 points for patients with an FDF baseline EDSS > 5.5 , confirmed after 6 months and all intermediate EDSS assessments. A 6-month confirmed disability progression was defined as a 6-month sustained increase from the reference (potential onset of progression) value in the EDSS scores. i.e., every EDSS score (scheduled or unscheduled) within a 6-month duration after the first progression should meet the progression criteria as specified above. The confirmation could only happen at a scheduled visit and in the absence of a relapse. Only descriptive analysis performed.

Statistical analyses

No statistical analyses for this end point

Secondary: Part I: Number of Participants with categorized change from first dose of Fingolimod in Expanded Disability Status Scale (EDSS) overall score

End point title	Part I: Number of Participants with categorized change from first dose of Fingolimod in Expanded Disability Status Scale (EDSS) overall score
-----------------	---

End point description:

The EDSS is a scale for assessing neurological impairment in MS (Kurtzke 1983) including (1) a series of scores in each of eight functional systems, and (2) the EDSS steps (ranging from 0 (normal) to 10 (death due to MS)). The functional systems are Visual, Brain Stem, Pyramidal, Cerebellar, Sensory, Bowel and Bladder, Cerebral and Other functions. Based on the assessment of each FS, the participant's overall score is categorized as Improvement, Stable or Deterioration. If baseline EDSS score is ≤ 5 , improvement is indicated by an EDSS score change of ≤ -1 , stable is indicated by an EDSS score change of > -1 and ≤ 0.5 , deterioration is indicated by an EDSS score change of > 0.5 ; if baseline EDSS score is > 5 , improvement is indicated by an EDSS score change of ≤ -0.5 , stable is indicated by an EDSS score change of > -0.5 and ≤ 0 , deterioration is indicated by an EDSS score change of > 0 . Only descriptive analysis performed.

Secondary: Part I: Change from first dose of Fingolimod in Expanded Disability Status Scale (EDSS)

End point title	Part I: Change from first dose of Fingolimod in Expanded Disability Status Scale (EDSS)
-----------------	---

End point description:

The EDSS is a scale for assessing neurological impairment in MS (Kurtzke 1983) including (1) a series of scores in each of eight functional systems, and (2) the EDSS steps (ranging from 0 (normal) to 10 (death due to MS)). The functional systems are Visual, Brain Stem, Pyramidal, Cerebellar, Sensory, Bowel and Bladder, Cerebral and Other functions. Based on the assessment of each FS, the participant's overall score is determined between 0 to 10. A negative change from baseline indicates improvement. Only descriptive analysis performed.

End point type	Secondary

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected from first dose of study treatment in Study Part I until end of study treatment in Study Part II plus 6 weeks post treatment, up to a maximum duration of 8 years.

Assessment type	Systematic

Reporting groups

Reporting group title	Any Fingolimod Dose
-----------------------	---------------------

Reporting group description:

Any Fingolimod Dose

Serious adverse events	Any Fingolimod Dose		
Total subjects affected by serious adverse events			
subjects affected / exposed	515 / 4083 (12.61%)		
number of deaths (all causes)	16		
number of deaths resulting from adverse events	5		
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Adenocarcinoma of colon			
subjects affected / exposed	3 / 4083 (0.07%)		
occurrences causally related to treatment / all	2 / 3		
deaths causally related to treatment / all	0 / 0		
B-cell lymphoma			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Basal cell carcinoma			
subjects affected / exposed	30 / 4083 (0.73%)		
occurrences causally related to treatment / all	22 / 31		
deaths causally related to treatment / all	0 / 0		
Benign hydatidiform mole			

subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Benign neoplasm of thyroid gland			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Benign ovarian tumour			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Bladder cancer			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Bone giant cell tumour			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Bowen's disease			
subjects affected / exposed	3 / 4083 (0.07%)		
occurrences causally related to treatment / all	2 / 3		
deaths causally related to treatment / all	0 / 0		
Brain neoplasm benign			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Breast cancer			
subjects affected / exposed	11 / 4083 (0.27%)		
occurrences causally related to treatment / all	8 / 11		
deaths causally related to treatment / all	0 / 0		
Cervix carcinoma			

subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Colon cancer				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Colon cancer metastatic				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Desmoid tumour				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Extranodal marginal zone B-cell lymphoma (MALT type)				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Fibroadenoma of breast				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Gastrointestinal neoplasm				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Intraductal proliferative breast lesion				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Invasive lobular breast carcinoma				

subjects affected / exposed	2 / 4083 (0.05%)			
occurrences causally related to treatment / all	0 / 2			
deaths causally related to treatment / all	0 / 0			
Laryngeal squamous cell carcinoma				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Leiomyoma				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Lung adenocarcinoma				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Malignant melanoma				
subjects affected / exposed	3 / 4083 (0.07%)			
occurrences causally related to treatment / all	1 / 3			
deaths causally related to treatment / all	0 / 0			
Melanocytic naevus				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Meningioma				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Metastases to lymph nodes				
subjects affected / exposed	1 / 4083 (0.02%)			
occurrences causally related to treatment / all	1 / 1			
deaths causally related to treatment / all	0 / 0			
Metastases to spine				

subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Neoplasm			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Non-Hodgkin's lymphoma			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		
Ovarian adenoma			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Ovarian cancer metastatic			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Pancreatic carcinoma			
subjects affected / exposed	1 / 4083 (0.02%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Papilloma			
subjects affected / exposed	1 / 4083 (0.02%)

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 July 2010	The changes made throughout the protocol are specific to Poland and the UK and update the study endpoint to reflect until fingolimod is registered and through approximately one-year post approval or maximally through 31-Dec-2012.
02 March 2011	The changes made throughout the protocol are specific to Norway and update the study endpoint to reflect the timepoint approximately 12 months following the completion of the previous fingolimod trial or maximally through 01-Aug-2012.
18 May 2011	The changes made throughout the protocol update the study end for the Phase II/III patients to fingolimod registration, commercially availability and reimbursement OR through 30-June-2016, whichever is later.
06 October 2011	This Amendment aims to further define the extended follow-up for patients who previously completed the phase II or III fingolimod clinical development studies in an interventional trial setting through 30-Jun-2016. It extends the enrollment to patients who have completed CFTY720D2309/E1 as well as the re-enrollment of CFTY720D2399 patients who have previously completed this study based on the original CFTY720D2399 study endpoint of local approval and reimbursement. Furthermore, this amendment will define additional assessments to evaluate the long-term efficacy of fingolimod in phase II and III trial patients. Lastly, this amendment aims to bring the study schedule of assessments as well as the safety monitoring guidelines in alignment with the fingolimod prescribing information of major countries where the medication has been registered.
06 February 2012	The major changes include the following: <ul style="list-style-type: none">• Exclusion criteria related to the cardiovascular conditions are updated.• Appendix 4 Guidance for monitoring of patients taking their first dose of the study drug is updated.• Only for Germany: Patients requiring first dose monitoring will receive continuous 6-hour ECG monitoring after the first dose or upon re-initiation of fingolimod treatment after an interruption of greater than 14 consecutive days.
24 July 2012	The major changes include the following: <ul style="list-style-type: none">• Exclusion criteria related to the cardiovascular conditions are updated.• Exclusion of patients taking medications that lower heart rate has been added.• Germany country-specific recommendations removed; additional procedures and assessments required by local prescribing information should be followed accordingly.• Appendix 4 Guidance for monitoring of patients taking their first dose of the study drug is updated to reflect final guidance.
18 August 2013	The major changes include the following: <ul style="list-style-type: none">• Clarified VZV antibody guidance has been added.• The protocol title has been modified.
29 August 2014	The major changes include the following: <ul style="list-style-type: none">• MRI frequency changed from annually to one at EOS• Clinical laboratory collection changed from a biennial to annual collection, with urine pregnancy tests for females being substituted at the visits during which other clinical laboratory testing has been removed.• Addition of CD4/CD8/CD19 testing as part of the chemistry panel at EOS visit• Reduction in frequency of PRO collection, for those patients who had PRO collection in their prior study

09 September 2015	<p>The major changes include the following: Updates to the Background, Physical/neurological exam, Skin assessments, and Guidance on safety monitoring based on investigator brochure (Edition 18) updates. Updates to Study design, Rationale of study design, Population, Study completion and post-study treatment, and the Schedule of assessments related to Study Completion visit scheduling and/or reintroduction of hematology sampling at the 6-monthly visits.</p>
14 March 2016	<p>The major changes include the following: Updates to Study objectives, Study design, Rationale of study design, Rationale of dose/regimen, duration of treatment, Population, Study completion and post-study treatment, Discontinuation of study treatment, Laboratory evaluations, Data analysis, Guidance on Safety Monitoring, and the Schedule of assessments. Addition of Section 6.6.7, Other Biomarkers, Liver event and Laboratory trigger Definitions and Follow-up Requirements, and the Schedule of assessments for Part II.</p>
01 April 2016	<p>The purpose of this amendment is to add information inadvertently deleted from Amendment 10 during the publishing process. This study is ongoing with approximately 4,150 enrolled patients. The amendment changes will provide further clarification on the conduct of the protocol.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
