Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 May 2023
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	31 May 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Determine whether the association of Carfilzomib, Cyclophosphamide and Dexamethasone (CCd) as induction treatment is safe and provides benefits in patients with newly diagnosed MM.

Protection of trial subjects:

The protocol for this study has been designed in accordance with the general ethical principles outlined in the Declaration of Helsinki. The review of this protocol by the IRB/EC and the performance of all aspects of the study, including the methods used for obtaining informed consent, must also be in accordance with principles enunciated in the declaration, as well as ICH Guidelines, Title 21 of the Code of Federal Regulations (CFR), Part 50 Protection of Human Subjects and Part 56 Institutional Review Boards.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 March 2012
Long term follow-up planned	Yes
Long term follow-up rationale	Efficacy
Long term follow-up duration	2 Years
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 58
Worldwide total number of subjects	58
EEA total number of subjects	58

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1

From 65 to 84 years	56
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

This protocol is a phase II multicenter, international, non comparative, open label study designed to assess the safety and the efficacy of the association Carfilzomib with Cyclophosphamide and Dexamethasone (CCd) as induction treatment in newly diagnosed MM patients.

Pre-assignment

Screening details:

The pre-treatment period includes screening visits, performed at study entry. After providing written informed consent to participate in the study, patients will be evaluated for study eligibility. The screening period includes the availability of inclusion criteria.

Period 1

Period 1 title	ITT (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	CCd arm
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Carfilzomib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Carfilzomib = 20 mg/m² IV once daily on days 1, 2, of cycle 1 only followed by 36 mg/ m² days 8, 9, 15, 16 in cycle 1, then for all subsequent doses 36 mg/ m² IV once daily on days 1, 2, 8, 9, 15, 16, followed by 13-day rest period (day 17 through 28). Each cycle will be repeated every 28 days for a total of 9 courses.

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Coated tablet
Routes of administration	Oral use

Dosage and administration details:

Cyclophosphamide given orally at the dose of 300 mg/m² on days 1, 8, 15.

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral drops, solution
Routes of administration	Oral use

Dosage and administration details:

Low dose Dexamethasone will be given orally at the dose of 40 mg on days 1, 8, 15, 22 or 20 mg on days 1-2, 8-9,15-16, 22-23

Number of subjects in period 1	CCd arm
Started	58
Completed	0
Not completed	58
Adverse event, serious fatal	4
Physician decision	1
Consent withdrawn by subject	7
Adverse event, non-fatal	22
Trial closed by sponsor	1
Lost to follow-up	2
Lack of efficacy	21

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 November 2011	Substantial Amendment n.1: It was necessary to update the informed consent, following the update of the Investigator's Brochure of the drug Carfilzomib. Furthermore, the consent in the paragraph "Appendix on the protection of confidentiality" has been corrected and the paragraph relating to insurance has been updated.
12 February 2018	Substantial Amendment n.2: The Amendment was necessary to update the contacts of the Sponsor and the Principal Investigator of the study, as well as update the criteria for evaluating the disease response. With this amendment, the new documents relating to the drug Carfilzomib are transmitted, as it will be imported, labelled, packaged, released and distributed directly by Amgen Europe B.V., in Breda, and no longer by Fisher. Following this transition, the labels for Carfilzomib were updated. The side effects of Carfilzomib and the appendix on the protection of confidentiality have been updated on the Information Sheet and Informed Consent Form.
11 February 2019	Substantial Amendment n.3: The Amendment was necessary to update the following aspects: <ul style="list-style-type: none">• Update on the side effects of the drug Carfilzomib on the Informed Consent• Privacy update according to new EU Regulation 2016/679
16 September 2019	Substantial Amendment n.4: The Amendment was necessary to update the side effects of the drug Carfilzomib on the Informed Consent
10 February 2020	Substantial Amendment n.5: The Amendment was necessary to update the side effects of the drug Carfilzomib on the Informed Consent
30 April 2021	Substantial Amendment n.6: The request for a substantial amendment concerns the change of the promoter of the study from HOVON Foundation to STICHTING EUROPEAN MYELOMA NETWORK (EMN) and the updating of the side effects of the drug Carfilzomib, based on what is reported in the Investigator's Brochure v.20.0 and v .20.1. The labels of the drug carfilzomib have been updated in order to meet the requirements of the cytotoxicity regulation. This review was made to align with the EMA/CHMP request to review the information on the marketed product. The risk classification for the drug carfilzomib did not change with the introduction of the cytotoxicity statement. There has been no new toxicity data or regulations since the drug Kyprolis gained approval. Furthermore, the requirements for handling and destroying the drug have not changed, so such changes will not have a significant impact on the safety or physical or mental integrity of clinical trial participants, or on the conduct or management of the trial.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
