

### Blinded phase: Optic and Ocular: Number of participants with disease control for 6 months

Four of the 17 participants with disease control for at least 6 months were eligible in both eyes at the beginning of the study and all 4 had disease control in both eyes for at least six months.

**Table 1: Disease control for at least six months in all eligible eyes**

Treatment	Number randomised	Number with disease control, N (%)	Relative risk (95% CI)	Fisher's Exact Test P-value
Placebo	30	1 (3.33%)	8.50 (1.19, 60.87)	0.005
Adalimumab	60	17 (28.33%)		
<b>Total</b>	<b>90</b>	<b>18 (20.00%)</b>
