

Blinded phase: Optic and Ocular: Number of participants with disease remission for 6 months

Four participants who had disease remission in at least one eligible eye for 6 months were eligible in both eyes; 3 entered remission in both eligible eyes and one did not.

Table 1: Disease control for at least six months in all eligible eyes

Treatment	Number randomised	Number with disease control, N (%)	Relative risk (95% CI)	Fisher's Exact Test P-value
Placebo	30	0 (0%)	13.72 (0.84, 223.26)	0.004
Adalimumab	60	13 (21.67%)		
Total	90	13 (14.44%)
