

Clinical trial results:

A Phase III open-label study to evaluate the safety, tolerability and efficacy of TMC435 plus PegIFN-2a (Pegasys®) and ribavirin (Copegus®) triple therapy in chronic hepatitis C genotype-1 infected subjects who are co-infected with Human Immunodeficiency Virus type 1 (HIV-1).

Due to a system error, the data reported in v1 is not correct and has been removed from public view.

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 August 2013
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	28 August 2013
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the safety and tolerability of TMC435 plus pegylated interferon alpha-2a (PegIFNa- 2a) and ribavirin (RBV) triple therapy in hepatitis C virus (HCV) genotype-1 infected participants, co-infected with human immunodeficiency virus- 1 (HIV-1).

To evaluate the proportion of participants with sustained virologic response (SVR) 12 weeks after the planned end of treatment (SVR12).

Protection of trial subjects:

Safety and tolerability were evaluated throughout the study by monitoring of adverse events (AEs), Performing laboratory tests, measurement of vital signs, electrocardiogram (ECG) and performing physical examinations throughout the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 September 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 8
Country: Number of subjects enrolled	Germany: 17
Country: Number of subjects enrolled	Spain: 11
Country: Number of subjects enrolled	France: 8
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	Portugal: 12
Country: Number of subjects enrolled	United States: 41
Worldwide total number of subjects	106
EEA total number of subjects	57

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	104
From 65 to 84 years	2
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 160 participants were screened, 107 were enrolled of whom 106 participants received at least 1 dose of study drug.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Arm title	TMC435 150mg 12Wks PR24/48
-----------	----------------------------

Arm description:

Participants On HAART (n=93) and Not on HAART (n=13) were given TMC435 150 mg once daily plus peginterferon alfa-2a (PegIFN alfa-2a) and ribavirin (RBV) for 12 Weeks (Wks) followed by PegIFN alfa-2a (P) and RBV (R) until Week 24/48 (PR24/48). Treatment was to be stopped at Week 24 for HCV treatment-naïve and prior HCV relapsers who met the response guided therapy criteria, and who did not have cirrhosis. All prior HCV non-responders (null and partial), Participants with cirrhosis, and HCV treatment-naïve and prior HCV relapsers who did not meet the response guided therapy criteria had a 48-week treatment period.

Arm type	Experimental
Investigational medicinal product name	JNJ-38733214-AAA - capsule , hard - 150mg
Investigational medicinal product code	TMC435
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

Participants were administered JNJ-38733214-AAA - capsule , hard 150 mg orally, once daily.

Investigational medicinal product name	Pegasys
Investigational medicinal product code	
Other name	PEGINTERFERON ALFA-2A
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered PEGINTERFERON ALFA-2A (PegIFN α -2a) 180 microgram(s)/millilitre (μ g/ml) once weekly as subcutaneous injection of 0.5 mL.

Investigational medicinal product name	Copegus
Investigational medicinal product code	
Other name	Ribavirin
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Participants were administered Ribavirin 1000 or 1200 milligrams (mg) orally, twice a day.

Number of subjects in period 1	TMC435 150mg 12Wks PR24/48
Started	106
Completed	97
Not completed	9
Sponsor's decision	1
Adverse event, serious fatal	1
Consent withdrawn by subject	1
Participant non-compliant	1
Participant initiated new HCV therapy	1
Lost to follow-up	4

Mood altered subjects affected / exposed occurrences (all)	20 / 106 (18.87%) 26		
Insomnia subjects affected / exposed occurrences (all)	27 / 106 (25.47%) 27		
Anxiety subjects affected / exposed occurrences (all)	13 / 106 (12.26%) 14		
Sleep disorder subjects affected / exposed occurrences (all)	6 / 106 (5.66%) 6		
Musculoskeletal and connective tissue disorders			

Myalgia subjects affected / exposed occurrences (all)	17 / 106 (16.04%) 17		
Back pain subjects affected / exposed occurrences (all)	8 / 106 (7.55%) 8		
Arthralgia subjects affected / exposed occurrences (all)	15 / 106 (14.15%) 16		
Pain in extremity subjects affected / exposed occurrences (all)	6 / 106 (5.66%) 6		
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all)	7 / 106 (6.60%) 8		
Upper respiratory tract infection subjects affected / exposed occurrences (all)	7 / 106 (6.60%) 8		
Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	21 / 106 (19.81%) 21		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 January 2012	The amendment was created to implement the changes to the protocol based on the feedback from the Health Authorities, mainly on primary efficacy endpoint for ongoing and future TMC435 Phase III trials could be changed from SVR24 to SVR12. SVR24 became a secondary endpoint.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
