### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 January 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	12 January 2016
Global end of trial reached?	Yes
Global end of trial date	12 January 2016
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To estimate overall survival

Protection of trial subjects:

This clinical trial will be conducted in accordance with the protocol, the ethical principles laid down by the 18th World Medical Assembly (Helsinki, 1964) and all applicable amendments laid down by the World Medical Assemblies, the International Conference on Harmonization (ICH) consolidated Guideline E6 for Good Clinical Practice (CPMP/ICH/135/95), and all applicable laws and regulations.

## Subject disposition

### Recruitment

Recruitment details:

105 patients were included in the initial part between 03/01/2011 and 09/02/2015 in 13 french centers. 67 patients were randomised between 07/03/2011 and 24/03/2015: 34 in arm A (continue CT) and 33 in arm B (stop CT).

### Pre-assignment

Screening details:

A total of 106 patients are needed to allow the randomisation of 31 patients in each treatment arm.

### Period 1

Period 1 title	Initial phase
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

## Secondary: Quality of life

End point title	Quality of life
End point description:	
<p>For functional scales, QLQ-C30 and QLQ-OES18 scores were considered as a definitive deterioration if the score decreased by more than 10 points compared with the score at randomisation and without later improvement superior to 10 points compared with the baseline. For symptom scales, a definitive deterioration was defined as an increase of 10 points or more without subsequent decrease. For each dimension of the QoL questionnaires, the time until definitive deterioration (TUDD) was defined as the time from randomisation to the first observation of a definitive deterioration of the corresponding score or death. Patients alive without reported definitive deterioration were censored at the date of the last follow-up visit. Patients without any QoL questionnaires were censored at randomisation. TUDD was estimated using the Kaplan Meier method. The impact of treatments on the different dimensions of the QoL was estimated by hazard ratios of QoL deterioration using Cox models.</p>	
End point type	Secondary
End point timeframe:	
<p>QoL was assessed using the EORTC quality of life score questionnaire (QLQ-C30) and with the oesophagus-specific questionnaire (QLQ-OES18) at the baseline and every 6 weeks thereafter until 42 weeks after randomisation.</p>

## Statistical analyses

<b>Statistical analysis title</b>	TUDD Global health status
Statistical analysis description:	
TUDD was estimated using the KaplanMeier method. The impact of treatments on the different dimensions of the QoL was estimated by hazard ratios (HRCT-DISC/CTCONT of QoL deterioration using Cox models.	
<b>Comparison groups</b>	CT-CONT v CT-DISC

Number of subjects included in analysis	67
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.05
Method	Regression, Cox
Parameter estimate	Hazard ratio (HR)
Point estimate	1.44
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.82
upper limit	2.53

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Patients were observed until death or until 48 months after study entry.

Assessment type	Non-systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 November 2010	Addition of investigators
07 February 2011	Addition of an investigator and addition of trial site
07 July 2011	Addition of a center
08 August 2011	Addition of an investigator
17 October 2011	Protocol amendement (pharmaco-vigilance and update of the investigator list)
03 June 2013	Addition of a center Modification of study duration and number of patients Addition of investigators
31 July 2013	Addition of a center
