

Clinical trial results:

Safety and Efficacy of 120 mg and 240 mg BI 201335 once daily in combination with pegylated interferon alpha 2a and ribavirin for treatment of chronic Hepatitis C (HCV) genotype 1 infection in HIV/HCV-co-infected patients. A multinational, randomised, parallel group, open-label trial

Due to a system error, the data reported in v1 is not correct and has been removed from public view.

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No	No

1901/2006 apply to this trial?

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 July 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	23 September 2013
Global end of trial reached?	Yes
Global end of trial date	19 June 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of this trial is to evaluate the safety and efficacy of an open-label treatment with BI 201335 240 mg once daily given for 12 or 24 weeks (wk) or BI 201335 120 mg once daily for 24 wk, each in combination with pegylated interferon-alpha2a and ribavirin given for 24 or 48 wk in hepatitis C virus (HCV)/human immunodeficiency virus (HIV) coinfecting patients, who are HCV-treatment naive or HCV-treatment relapsers and HIV treatment-naive- or, who are being treated with Highly active antiretroviral therapy (HAART) containing an acceptable combination of the following antiretrovirals: raltegravir, darunavir/ritonavir, efavirenz, atazanavir/ ritonavir (limited to 20 patients), maraviroc, tenofovir, abacavir, emtricitabine, and lamivudine. Results of this trial will be compared with historical efficacy and safety data of randomized trials of 48 wk of treatment with pegylated interferon-alpha2a and ribavirin for HCV genotype 1 (GT-1) infection in HIV/HCV co-infected patients.

Protection of trial subjects:

Only subjects that met all the study inclusion and none of the exclusion criteria were to be entered in the study. All subjects were free to withdraw from the clinical trial at any time for any reason given. Close monitoring of all subjects was adhered to throughout the trial conduct. Rescue medication was allowed for all patients as required.

Background therapy:

All treatment groups included a background therapy of pegylated interferon alpha 2a and ribavirin (pegIFN and RBV)

Evidence for comparator: -

Actual start date of recruitment	04 October 2011
Long term follow-up planned	Yes
Long term follow-up rationale	Scientific research
Long term follow-up duration	30 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 119
Country: Number of subjects enrolled	United Kingdom: 72
Country: Number of subjects enrolled	France: 21
Country: Number of subjects enrolled	Germany: 51
Country: Number of subjects enrolled	Italy: 26
Country: Number of subjects enrolled	Brazil: 28

Country: Number of subjects enrolled	United States: 119
Country: Number of subjects enrolled	Switzerland: 17
Worldwide total number of subjects	453
EEA total number of subjects	289

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	441
From 65 to 84 years	12
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

All subjects were screened for eligibility to participate in the trial. Subjects attended specialist sites which would then ensure that they (the subject) met all strictly implemented inclusion/exclusion criteria. Subjects were not to be randomised to trial treatment if any one of the specific entry criteria were violated.

Period 1

Period 1 title	Treatment period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Faldaprevir 120 mg-24 Wk
------------------	--------------------------

Arm description:

Faldaprevir (BI 201335) 120 mg once a day (QD) combined with pegIFN/RBV for 24 weeks, at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Arm type	Experimental
Investigational medicinal product name	Faldaprevir
Investigational medicinal product code	BI 201335
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

one soft gelatine capsule of BI 201335 (Faldaprevir) once a day 120 mg

Investigational medicinal product name	pegIFN
Investigational medicinal product code	
Other name	Pegasys®
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Dose: 180 µg once weekly,
Mode of Admin.: Subcutaneous (SC) injection.

Investigational medicinal product name	RBV
Investigational medicinal product code	
Other name	Copegus®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Dose: 1000 mg (<75 kg body weight) or 1200 mg (≥75 kg body weight) total daily dose, divided in 2 doses for twice daily administration.
Mode of Admin.: Oral.

Arm title	Faldaprevir 240 mg-12Wk
------------------	-------------------------

Arm description:

Faldaprevir 240 mg QD plus pegIFN/RBV for 12 weeks followed by re-randomisation at Week 12 to stop Faldaprevir and continue pegIFN/RBV alone until Week 24; at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Arm type	Experimental
Investigational medicinal product name	Faldaprevir
Investigational medicinal product code	BI 201335
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

patient to receive two capsules of BI 201335 once a day (total daily dose 240 mg).

Investigational medicinal product name	pegIFN
Investigational medicinal product code	
Other name	Pegasys®
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Dose: 180 µg once weekly;

Mode of Admin.: Subcutaneous (SC) injection.

Investigational medicinal product name	RBV
Investigational medicinal product code	
Other name	Copegus®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Dose: 1000 mg (<75 kg body weight) or 1200 mg (≥75 kg body weight) total daily dose, divided in 2 doses for twice daily administration.

Mode of Admin.: Oral.

Arm title	Faldaprevir 240 mg-24Wk
------------------	-------------------------

Arm description:

Faldaprevir 240 mg QD plus pegIFN/RBV for 12 weeks followed by re-randomisation at Week 12 to continue Faldaprevir to Week 24, at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Arm type	Experimental
Investigational medicinal product name	Faldaprevir
Investigational medicinal product code	BI 201335
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

patient to receive two capsules of BI 201335 once a day for 24 weeks (total daily dose 240 mg).

Investigational medicinal product name	pegIFN
Investigational medicinal product code	
Other name	Pegasys®
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Dose: 180 µg once weekly,

Mode of Admin.: Subcutaneous (SC) injection.

Investigational medicinal product name	RBV
Investigational medicinal product code	
Other name	Copegus®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Dose: 1000 mg (<75 kg body weight) or 1200 mg (≥75 kg body weight) total daily dose, divided in 2 doses for twice daily administration.

Mode of Admin.: Oral.

Arm title	Faldaprevir 240 mg -Prior to Re-randomization at Week 12 (NR)
------------------	---

Arm description:

Patients initially assigned to Faldaprevir 240 mg who discontinued prior to re-randomization at WK 12.

Arm type	Experimental
Investigational medicinal product name	Faldaprevir
Investigational medicinal product code	BI 201335
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

dose: 240 mg.

mode of admin.: Oral use.

Investigational medicinal product name	RBV
Investigational medicinal product code	
Other name	Copegus®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Dose: 1000 mg (<75 kg body weight) or 1200 mg (≥75 kg body weight) total daily dose, divided in 2 doses for twice daily administration.

Mode of Admin.: Oral.

Investigational medicinal product name	pegIFN
Investigational medicinal product code	
Other name	Pegasys®
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Dose: 180 µg once weekly,

Mode of Admin.: Subcutaneous (SC) injection.

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Baseline characteristics are based on patients who were randomised after successfully completing the screening period and received at least one of the trial medication.

Statistical analyses

No statistical analyses for this end point

Secondary: The number of participants with Aspartate Aminotransferase (AST) Normalisation at end of treatment

End point title	The number of participants with Aspartate Aminotransferase (AST) Normalisation at end of treatment ^[32]
-----------------	--

End point description:

Aspartate Aminotransferase (AST) normalisation at End of Treatment (EoT) based on SVR12=yes or SVR12 =no.

BL = baseline.

End point type	Secondary
----------------	-----------

End point timeframe:

48 weeks

Notes:

[32] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only those arms for which the statistics are presented in the clinical trial report thus, those that would yield meaningful results were reported.

Reporting groups

Reporting group title	Faldaprevir 120 mg -24 Wk
-----------------------	---------------------------

Reporting group description:

Faldaprevir 120 mg QD combined with pegIFN/RBV for 24 weeks, at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Reporting group title	Faldaprevir 240 mg-12Wk
-----------------------	-------------------------

Reporting group description:

Faldaprevir 240 mg QD plus pegIFN/RBV for 12 weeks followed by re-randomisation at Week 12 to stop Faldaprevir and continue pegIFN/RBV alone until Week 24; at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Reporting group title	Faldaprevir 240 mg-24Wk
-----------------------	-------------------------

Reporting group description:

Faldaprevir 240 mg QD plus pegIFN/RBV for 12 weeks followed by re-randomisation at Week 12 to continue Faldaprevir to Week 24, at Week 24, randomisation of patients who achieved early treatment success (ETS) to an additional 24 weeks of pegIFN/RBV or to stop treatment; patients who did not achieve ETS received pegIFN/RBV until Week 48.

Reporting group title	Faldaprevir 240 mg - T
-----------------------	------------------------

Reporting group description:

Faldaprevir 240mg-12w + Faldaprevir 240mg-24w + patients initially randomized or assigned to Faldaprevir 240 mg who discontinued prior to re-randomization at Week 12.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 October 2011	main amendments: 1. Description and rationale of the new trial design (inclusion of the FDV 120 mg group). 2. Explanation of loading dose. 3. Added information about the results of drug interaction trials with ARVs.
11 October 2011	Main amendments: 1. Clarification of ATZ/RTV intensive PK sampling: medication administration; parameters to be determined; sampling timepoints; assay for ARV concentration determination; and sample handling.
01 May 2012	Main amendments: 1. Clarification and guidance on when and how to conduct the progression of liver disease assessment. 2. Change of the primary efficacy endpoint from SVR24 to SVR12 based on regulatory presentations and retrospective analysis of phase II data indicating a 98% positive predictive value (PPV) of SVR12 predicting SVR24. 3. Clarification of inclusion criteria: definition of stable HAART. 4. Clarification of exclusion criteria: allowed enrolment of patients with Child-Turcotte-Pugh classification (CTP) score above threshold due to comedication effect, but not liver decompensation, consistent with update of RBV label; which patients with chronic obstructive pulmonary disease (COPD) should be excluded; limited exception for the white blood cell (WBC) and absolute neutrophil count (ANC) thresholds. 5. Clarification of the stopping rule implementation. 6. Clarification of the criteria for virologic failure. 7. Clarification in wording for AEs and SAEs to comply with BI SOP. 8. Clarification of use of the eCRF skin form page to capture rashes and photosensitivity reactions (protocol-defined AEs of special interest). 9. Clarification of procedures to be done when a patient prematurely discontinued. 10. Clarification of analyses for the SVR12 timepoint; primary and secondary analyses; and safety analyses for HIV disease characteristics.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
