

Clinical trial results:

An Open Label, Single Arm, Extension Study to Evaluate the Long Term Safety of Denosumab for Prolonging Bone Metastasis-Free Survival in Men with Hormone-Refractory Prostate Cancer

Summary

EudraCT number	2010-021846-23
Trial protocol	GB CZ
Global end of trial date	21 February 2014

Results information

Result version number	v1 (current)
This version publication date	20 June 2016
First version publication date	23 July 2015

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 February 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	21 February 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To describe the safety and tolerability of denosumab administration as measured by adverse events, immunogenicity, and safety laboratory parameters in subjects who previously received denosumab or placebo in Amgen study 20050147.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonisation (ICH) Good Clinical Practice (GCP) regulations and guidelines, and Food and Drug Administration (FDA) regulations, and guidelines set forth in 21 CFR Parts 11, 50, 54, 56, and 312.

All subjects provided written informed consent before undergoing any study-related procedures, including screening procedures.

The study protocol, amendments, and the informed consent form (ICF) were reviewed by the Institutional Review Boards (IRBs) and Independent Ethics Committees (IECs). No subjects were recruited into the study and no investigational product (IP) was shipped until the IRB/IEC gave written approval of the protocol and ICF and Amgen received copies of these approvals.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	10 January 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	Czech Republic: 12
Worldwide total number of subjects	18
EEA total number of subjects	18

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	18
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

This was a single-arm, open-label extension (OLE) phase of a phase 3, randomized, double-blind study (Study 20050147) comparing denosumab with placebo on prolonging bone metastasis-free survival in men with hormone-refractory (androgen independent) prostate cancer.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo/Denosumab

Arm description:

Participants who received placebo in the parent study received open-label denosumab 120 mg by subcutaneous injection once every 4 weeks (Q4W) for up to 3 years.

Arm type	Experimental
Investigational medicinal product name	Denosumab
Investigational medicinal product code	AMG 162
Other name	XGEVA®
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

120 mg administered by subcutaneous injection every 4 weeks

Arm title	Denosumab/Denosumab
------------------	---------------------

Arm description:

Participants who received denosumab in the parent study received open-label denosumab 120 mg by subcutaneous injection once every 4 weeks (Q4W) for up to 3 years.

Arm type	Experimental
Investigational medicinal product name	Denosumab
Investigational medicinal product code	AMG 162
Other name	XGEVA®
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

120 mg administered by subcutaneous injection every 4 weeks

Number of subjects in period 1	Placebo/Denosumab	Denosumab/Denosumab
Started	11	7
Completed	2	2
Not completed	9	5
Physician decision	5	-
Consent withdrawn by subject	-	3
Adverse event, non-fatal	1	1
Death	2	-
Disease Progression	1	1

End points

End points reporting groups

Reporting group title	Placebo/Denosumab
Reporting group description:	
Participants who received placebo in the parent study received open-label denosumab 120 mg by subcutaneous injection once every 4 weeks (Q4W) for up to 3 years.	
Reporting group title	Denosumab/Denosumab
Reporting group description:	
Participants who received denosumab in the parent study received open-label denosumab 120 mg by subcutaneous injection once every 4 weeks (Q4W) for up to 3 years.	

Primary: Number of Participants With Treatment-emergent Adverse Events (AEs) and Deaths

End point title	Number of Participants With Treatment-emergent Adverse Events (AEs) and Deaths ^[1]
-----------------	---

End point description:

A serious adverse event is defined as an adverse event that meets at least one of the following serious criteria: • fatal, • life threatening, • requires in-patient hospitalization or prolongation of existing hospitalization, • results in persistent or significant disability/incapacity, • congenital anomaly/birth defect, and/or • other significant medical hazard. The adverse event severity grading scale used was the Common Terminology Criteria for Adverse Events (CTCAE) version 3.0, according to the following: Grade 1 = Mild AE; Grade 2 = Moderate AE; Grade 3 = Severe AE; Grade 4 = Life-threatening or disabling AE; Grade 5 = Death related to AE. The investigator assessed whether each adverse event was possibly related to the investigational product (IP).

End point type	Primary
----------------	---------

End point timeframe:

From the first dose of open-label denosumab until 4 weeks after the last; maximum time on study was 37 months. Follow-up survival information was collected for up to 3 years after the last dose of blinded investigation product in the 20050147 study.

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The statistical reporting of the safety outcomes was entirely descriptive, with no formal statistical testing performed.

End point values	Placebo/Denosumab	Denosumab/Denosumab

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 January 2012	The purpose of this amendment was to include information on a denosumab formulation of 70 mg/mL. Additional study visits were added to Schedule A to accurately reflect the 3-year open-label extension period.
22 February 2013	The purpose of this amendment was to clarify the serious adverse event reporting process and timelines and lay out in the protocol a mechanism by which to report pregnancies that occur in female partners of male subjects.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
