**Paediatric regulatory details**

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 April 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 November 2013
Global end of trial reached?	Yes
Global end of trial date	01 December 2014
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Primary: To investigate the efficacy of 3 different doses of BIA 9-1067 (5 mg, 25 mg, and 50 mg) administered once a day, compared with 200 mg of entacapone or placebo, when administered with the existing treatment of L-DOPA plus a DDCI, in patients with PD and end-of-dose motor fluctuations.

Secondary: To investigate the safety and tolerability of the combined treatment (L-DOPA/DDCI plus BIA 9-1067, entacapone, or placebo).

Protection of trial subjects:

The trial was conducted in accordance with the International Conference on Harmonisation (ICH), Good Clinical Practices (GCP), Good Manufacturing Practice (GMP), the ethical principles of the Declaration of Helsinki and with applicable local regulations. This trial was conducted by qualified persons who respected the rights and welfare of the subjects and after the review and approval of the protocol by an EC. Adverse events were collected throughout the trial and subject was followed by 14 days after the completion of the study.

Background therapy:

L-DOPA/DDCI (Carbidopa, Benserazide). Frequency: 3 to 8 daily doses. From V2 to V4 of the DB period, the investigator can decrease the daily dose of L-DOPA and DDCI (keeping the number of daily intakes unchanged), according to subject response. If the investigator finds that the dose reduction was too large, it can be increased again up to the baseline dose level. The dosage of L-DOPA/DDCI must not be changed during the study from V4 through the end of the DB period.

Evidence for comparator:

-

Actual start date of recruitment	30 March 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Austria: 3
Country: Number of subjects enrolled	Bulgaria: 50
Country: Number of subjects enrolled	Bosnia and Herzegovina: 16
Country: Number of subjects enrolled	Czech Republic: 51
Country: Number of subjects enrolled	Germany: 35
Country: Number of subjects enrolled	Spain: 37
Country: Number of subjects enrolled	France: 15
Country: Number of subjects enrolled	Croatia: 14

Country: Number of subjects enrolled	Hungary: 10
Country: Number of subjects enrolled	Italy: 14
Country: Number of subjects enrolled	Lithuania: 15
Country: Number of subjects enrolled	Latvia: 7
Country: Number of subjects enrolled	Poland: 90
Country: Number of subjects enrolled	Portugal: 22
Country: Number of subjects enrolled	Romania: 53
Country: Number of subjects enrolled	Russian Federation: 34
Country: Number of subjects enrolled	Serbia: 36
Country: Number of subjects enrolled	Slovakia: 19
Country: Number of subjects enrolled	Ukraine: 79
Worldwide total number of subjects	600
EEA total number of subjects	435

Notes:

---

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	309
From 65 to 84 years	291
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Planned Number of Study Centres: 130 study centres in approximately 20 countries (Austria, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, France, Germany, Hungary, Italy, Latvia, Lithuania, Montenegro, Netherlands, Poland, Portugal, Romania, Russia, Serbia, Slovakia, Spain and Ukraine).

### Pre-assignment

Screening details:

Subjects who met all the inclusion criteria and none of the exclusion criteria. 679 subjects were enrolled to the trial and 79 subjects were screening failures. 1 subject was randomised but not treated.

### Pre-assignment period milestones

Number of subjects started	679 <sup>[1]</sup>
Number of subjects completed	599

### Pre-assignment subject non-completion reasons

Reason: Number of subjects	Adverse event, non-fatal: 2
Reason: Number of subjects	Adverse event, serious non-fatal: 2
Reason: Number of subjects	Consent withdrawn by subject: 29
Reason: Number of subjects	Physician decision: 3
Reason: Number of subjects	Protocol deviation: 1
Reason: Number of subjects	Ineligibility: 38
Reason: Number of subjects	Subject's non compliance: 1
Reason: Number of subjects	Sponsor's discretion: 2
Reason: Number of subjects	Insufficient medication in Germany: 1
Reason: Number of subjects	Randomised, but not treated: 1

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The number of subjects reported to have started the pre-assignment period is the number of enrolled subjects; The worldwide number is number of treated subjects.

### Period 1

Period 1 title	Double-blind period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Part I - Placebo

Arm description:

All placebo capsules will contain, on average, 1 mg riboflavin to mimic urinary discoloration seen as a harmless side effect of entacapone.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	PLC
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

During the DB period, subjects will take 1 capsule of IMP concomitantly with each daytime L DOPA/DDCI dose (3 to 8 daily doses). An additional IMP bedtime dose will be administered at least 1 hour after the last daily dose of LDOPA/DDCI.

For the daytime doses (concomitantly with each L-DOPA/DDCI dose), the IMP administration will be as follows:

- placebo.

For the bedtime dose (at least 1 hour after the last daily dose of L-DOPA/DDCI), the IMP administration will be as follows:

- placebo.

The IMP intake (placebo) must start on the day after the Visit 2.

<b>Arm title</b>	Part I - Entacapone 200mg
------------------	---------------------------

Arm description:

Active substance: Entacapone

Trade name: Comtan®

Strength: Tablets 200 mg

Manufacturer: Novartis Pharmaceuticals

Arm type	Active comparator
Investigational medicinal product name	Entacapone
Investigational medicinal product code	
Other name	Comtan®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

During the DB period, subjects will take 1 capsule of IMP concomitantly with each daytime L DOPA/DDCI dose (3 to 8 daily doses). An additional IMP bedtime dose will be administered at least 1 hour after the last daily dose of LDOPA/DDCI.

For the daytime doses (concomitantly with each L-DOPA/DDCI dose), the IMP administration will be as follows:

- 200 mg entacapone.

For the bedtime dose (at least 1 hour after the last daily dose of L-DOPA/DDCI), the IMP administration will be as follows:

- placebo.

The IMP intake (entacapone) must start on the day after the Visit 2.

<b>Arm title</b>	Part I - OPC 5mg/day
------------------	----------------------

Arm description:

Active substance: BIA 9-1067

Other name: OPC, Opicapone

Strength: 5 mg

Manufacturer: BIAL – Portela & C<sup>a</sup> SA, S. Mamede do Coronado, Portugal

Arm type	Experimental
Investigational medicinal product name	BIA 9-1067
Investigational medicinal product code	
Other name	OPC, Opicapone
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

During the DB period, subjects will take 1 capsule of IMP concomitantly with each daytime L DOPA/DDCI dose (3 to 8 daily doses). An additional IMP bedtime dose will be administered at least 1 hour after the last daily dose of LDOPA/DDCI.

For the daytime doses (concomitantly with each L-DOPA/DDCI dose), the IMP administration will be as follows:

- placebo.

For the bedtime dose (at least 1 hour after the last daily dose of L-DOPA/DDCI), the IMP administration will be as follows:

- 5 mg.

The IMP intake (BIA 9-1067) must start on the day after the Visit 2.

<b>Arm title</b>	Part I - OPC 25mg/day
Arm description:	
Active substance: BIA 9-1067	
Other name: OPC, Opicapone	
Strength: 25 mg	
Manufacturer: BIAL – Portela & C <sup>a</sup> SA, S. Mamede do Coronado, Portugal	
Arm type	Experimental
Investigational medicinal product name	BIA 9-1067
Investigational medicinal product code	
Other name	OPC, Opicapone
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

During the DB period, subjects will take 1 capsule of IMP concomitantly with each daytime L DOPA/DDCI dose (3 to 8 daily doses). An additional IMP bedtime dose will be administered at least 1 hour after the last daily dose of LDOPA/DDCI.

For the daytime doses (concomitantly with each L-DOPA/DDCI dose), the IMP administration will be as follows:

- placebo.

For the bedtime dose (at least 1 hour after the last daily dose of L-DOPA/DDCI), the IMP administration will be as follows:

- 25 mg.

The IMP intake (BIA 9-1067) must start on the day after the Visit 2.

<b>Arm title</b>	Part I - OPC 50mg/day
Arm description:	
Active substance: BIA 9-1067	
Other name: OPC, Opicapone	
Strength: 50 mg	
Manufacturer: BIAL – Portela & C <sup>a</sup> SA, S. Mamede do Coronado, Portugal	
Arm type	Experimental
Investigational medicinal product name	BIA 9-1067
Investigational medicinal product code	
Other name	OPC, Opicapone
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

During the DB period, subjects will take 1 capsule of IMP concomitantly with each daytime L DOPA/DDCI dose (3 to 8 daily doses). An additional IMP bedtime dose will be administered at least 1 hour after the last daily dose of LDOPA/DDCI.

For the daytime doses (concomitantly with each L-DOPA/DDCI dose), the IMP administration will be as follows:

- placebo.

For the bedtime dose (at least 1 hour after the last daily dose of L-DOPA/DDCI), the IMP administration will be as follows:

- 50 mg.

The IMP intake (BIA 9-1067) must start on the day after the Visit 2.

Number of subjects in period 1[2]	Part I - Placebo	Part I - Entacapone 200mg	Part I - OPC 5mg/day
	Started	121	122
Completed	110	107	110
Not completed	11	15	12

Physician decision	-	-	1
Adverse event, non-fatal	4	5	4
Adverse event, serious non-fatal	1	1	1
Ineligibility	1	2	-
Lost to follow-up	-	-	1
Sponsor's discretion	-	-	1
Protocol deviation	1	-	-
Subject's non compliance	-	1	-
Lack of efficacy	-	-	1

Number of subjects in period 1[2]	Part I - OPC 25mg/day	Part I - OPC 50mg/day
	Started	119
Completed	108	107
Not completed	11	8
Consent withdrawn by subject	3	3
Physician decision	1	-
Adverse event, non-fatal	6	5
Adverse event, serious non-fatal	-	-
Ineligibility	-	-
Lost to follow-up	-	-
Sponsor's discretion	-	-
Protocol deviation	-	-
Subject's non compliance	1	-
Lack of efficacy	-	-

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Baseline period does not include 1 subject who was randomised but not treated.

## Period 2

Period 2 title	Open-label period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

## Arms

<b>Arm title</b>	Part II - OPC
Arm description:	
Active substance: BIA 9-1067	
Other name: OPC, Opicapone	
Strength: 5 / 25 / 50 mg	
Manufacturer: BIAL – Portela & C <sup>a</sup> SA, S. Mamede do Coronado, Portugal	
Arm type	Experimental
Investigational medicinal product name	BIA 9-1067
Investigational medicinal product code	
Other name	OPC, Opicapone
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

During the OL period, all subjects will take BIA 9-1067. Subjects will begin treatment at a dose of 25 mg BIA 9-1067 once daily at bedtime for the first week (7 days), regardless of their prior treatment in the DB period. If the “wearing-off” is not sufficiently controlled, and tolerability allows, the BIA 9-1067 dose can be adjusted by titrating up to 50 mg. If unacceptable dopaminergic AEs appear, usually reflected in an increased intensity or incidence of dyskinesias, the L-DOPA/DDCI dose should be adjusted first and only then; if not sufficient, the BIA 9-1067 dose can be down titrated as follows: subjects on 50 mg BIA 9-1067 should be down titrated first to 25 mg and if needed to 5 mg afterwards; subjects on 25 mg BIA 9-1067 should be down titrated to 5 mg. Adjustments of doses must be always done titrating upwards or downwards based on individual response and tolerability. From V13 to V14, the dose of L-DOPA/DDCI and BIA 9-1067 should remain stable.

<b>Number of subjects in period</b> <b>2<sup>[3]</sup></b>	Part II - OPC
Started	495
Completed	432
Not completed	63
Adverse event, serious fatal	7
Consent withdrawn by subject	23
Physician decision	1
Adverse event, non-fatal	7
Subject stopped IMP intake bef scheduled EOS visit	3
Adverse event, serious non-fatal	9
Lost to follow-up	1
Sponsor's discretion	2
Subject moved to other place	4
Lack of efficacy	1
Subject's non compliance	5

Notes:

[3] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 542 subjects completed double blind part and 47 of them did not start open label part.

Subject analysis set type	Per protocol

Subject analysis set description:

All subjects of the OL-FAS (treated with OPC 5mg/day in DB) without any major protocol deviation.

Subjects will be included

into the OL-PP if they fulfil all of the following criteria:

- Treated with OL-IMP
- Sufficient compliance (as assessed during the Data Review Meeting).
- No change in L-DOPA and/or OPC between Visit 13 and Visit 14
- Not identified as a major protocol violator for other reasons during the Data Review Meeting.

Subject analysis set title	Part II - DB OPC 25 / OL OPC x Per protocol set
Subject analysis set type	Per protocol

Subject analysis set description:

All subjects of the OL-FAS (treated with OPC 25mg/day in DB) without any major protocol deviation.

Subjects will be included

into the OL-PP if they fulfil all of the following criteria:

- Treated with OL-IMP
- Sufficient compliance (as assessed during the Data Review Meeting).
- No change in L-DOPA and/or OPC between Visit 13 and Visit 14
- Not identified as a major protocol violator for other reasons during the Data Review Meeting.

Subject analysis set title	Part II - DB OPC 50 / OL OPC x Per protocol set
Subject analysis set type	Per protocol

Subject analysis set description:

All subjects of the OL-FAS (treated with OPC 50mg/day in DB) without any major protocol deviation.

Subjects will be included

into the OL-PP if they fulfil all of the following criteria:

- Treated with OL-IMP
- Sufficient compliance (as assessed during the Data Review Meeting).
- No change in L-DOPA and/or OPC between Visit 13 and Visit 14
- Not identified as a major protocol violator for other reasons during the Data Review Meeting.

---

### **Primary: Change from baseline in absolute OFF-time at the end of DB**

End point title	Change from baseline in absolute OFF-time at the end of DB
-----------------	------------------------------------------------------------

End point description:

The primary efficacy variable will be the change from baseline in absolute OFF-time at the end of the DB period, This results refers when administered with the existing treatment of L-DOPA plus a DDCI, in patients with PD and end-of-dose motor fluctuations.

End point type	Primary
----------------	---------

End point timeframe:

From Baseline to End of DB period

**Secondary: Total UPDRS SCORE (I, II (ON), and III)**

End point title	Total UPDRS SCORE (I, II (ON), and III)
-----------------	-----------------------------------------

End point description:

Total UPDRS (Part I, II (ON) and III)

- UPDRS I evaluation of mentation, behavior, and mood
- UPDRS II self-evaluation of the activities of daily life (ADLs) including speech, swallowing, handwriting, dressing, hygiene, falling, salivating, turning in bed, walking, and cutting food
- UPDRS III clinician-scored monitored motor evaluation The UPDRS I, II and III scores and subscores are calculated as the sum of all individual items. If one or two items in a scale are missing, they will be imputed with the mean of the non-missing items of that scale.

Subscale has 0-4 ratings, where 0 = normal, 1 = slight, 2 = mild, 3 = moderate, and 4 = severe  
The final cumulative score will range from 0 (no disability) to 199 (total disability).

End point type	Secondary

### Secondary: Parkinson's Disease Sleep Scale (PDSS)

End point title | Parkinson's Disease Sleep Scale (PDSS)

End point description:

The Parkinson's disease Sleep Scale (PDSS) is a specific scale for the assessment of sleep disturbances in subjects with PD. The PDSS score is calculated as the sum of all single items. If one or two items are missing, they will be imputed with the mean of the non-missing items. If three or more items are missing, no imputation will be done and the score will be set to missing.

Subscale has 0-10 ratings, where 0 = severe and 10 = normal

The PDSS total score is a sum score of all 15 questions and ranges from 0 to 150, with lower scores meaning more disability.

## Statistical analyses

No statistical analyses for this end point

## Secondary: Non-motor Symptoms Scale (NMSS)

End point title	Non-motor Symptoms Scale (NMSS)
-----------------	---------------------------------

End point description:

The Non-motor Symptoms Scale (NMSS) consists of 30 questions, covering 9 dimensions, whereby each item is scored for severity and frequency: Severity None 0 Mild (symptoms present but causes little distress) 1 Moderate (some distress or disturbance to subject) 2 Severe (major source of distress or disturbance to subject) 3

Frequency Rarely (<1/wk) 1 Often (1/wk) 2 Frequent (several times per week) 3 Very Frequent (daily or all the time) 4

The product of frequency and severity is calculated for each item and each dimension score is defined as the sum of the frequency\*severity of the respective items. If frequency or severity of a single item is missing, the domain score will not be calculated. The NMSS total score is defined as the sum of all domain scores.

The NMSS total score is calculated by adding all domain scores (0–360), and lower scores mean less disability.

P-value	= 0.067
Method	MMRM

**Statistical analysis title** Part II: OPC 50mg/day vs Entacapone PPS

Statistical analysis description:

Results are based on MMRM with Region as factor and baseline OFF-time as covariate.

Comparison groups	Part II - DB OPC 50 / OL OPC x Per protocol set v Part II - DB ENT / OL OPC x Per protocol set
Number of subjects included in analysis	183
Analysis specification	Pre-specified
Analysis type	equivalence
P-value	= 0.1313
Method	MMRM

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

From the first intake of IMP until 2 weeks (14 days) after last intake of IMP in the corresponding part.

Adverse event reporting additional description:

The investigator monitor AEs and SAEs, at each visit, from V1 on throughout the study, using an unstructured interview. The investigator will inquire generally about the subject's well-being since the last visit. Details of any reported AEs were recorded at all scheduled and unscheduled visits as well as those reported during any telephone contact.

Assessment type	Systematic
-----------------	------------

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
10 May 2011	<p>Global Amendment #1</p> <p>The reason for this study global protocol amendment #1 is to implement administrative changes and to correct typing errors.</p> <p>The following modifications to the protocol were introduced by this amendment:</p> <p>The central 12-lead ECG reading and central diary evaluation will be implemented.</p> <p>The duration of ECG readings is changed to 10 seconds instead of 15 seconds.</p> <p>Randomisation number will be integrated in the eCRF.</p> <p>Start day of the IMP intake is indicated.</p> <p>Investigator's and subject's assessment of change will not be performed at Visit 2.</p> <p>Specific gravity of the urine will not be assessed by the dipstick.</p> <p>Unithink NV, subcontracted supplier for the e-CRF, diary and IRS was changed to Perceptive eClinical Limited.</p> <p>Parkinson's Disease Sleep Scale is corrected.</p>
30 August 2011	<p>Global Amendment #2</p> <p>This amendment to study protocol BIA-91067-301 has been prepared mainly to address comments from the US Food and Drug Administration (FDA). The study design has been changed for all sites as follows:</p> <ul style="list-style-type: none"><li>• Additional vital signs and 12-lead electrocardiogram (ECG) measurements were added, and</li><li>• Bicarbonate was added to the biochemistry laboratory test panel, and</li><li>• The Modified Minnesota Impulsive Disorders Interview (mMIDI) and Columbia Suicide Severity Rating Scale (C-SSRS) were added to the assessment scales, and</li><li>• Skin examinations by a dermatologist were added for screening for melanoma, and</li><li>• Clarification on the adjustment of the BIA 9-1067 and levodopa (L-DOPA)/dopa decarboxylase inhibitor (DDCI) doses during the open-label period was added.</li></ul> <p>The FDA, after their review of the initial Investigational New Drug Application for BIA 9-1067, recommended collection of additional safety data.</p>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
