

Table 2.1.1: Overall Response Rate (ORR)  
ITT Analysis Set

	Total (N=125)
Independent Review Committee (IRC)	
Assessments Best Overall Response	
Rate (%)	
Complete Response	13 ( 10.4%)
Partial Response	58 ( 46.4%)
Minor Response	1 ( 0.8%)
Stable Disease	41 ( 32.8%)
Progressive Disease	10 ( 8.0%)
Not Evaluable	2 ( 1.6%)
ORR (%) [a]	72 ( 57.6%)
95% CI (%) [b]	48.4 - 66.4
P-value [c]	<.0001

The ITT analysis set includes subjects who received at least one dose of idelalisib.

[a] Subjects who had a complete or partial response (or MR for subjects with WM) in best overall response category.

[b] 95% exact binomial confidence interval for overall response rate.

[c] One-sided p-value for testing against the null hypothesis of ORR ≤ 20%.
