

## Clinical trial results:

### Randomized phase III study of a treatment driven by early PET response compared to a treatment not monitored by early PET in patients with Ann Arbor Stage III-IV or high risk IIB Hodgkin lymphoma

#### Summary

EudraCT number	2010-022844-19
Trial protocol	FR BE
Global end of trial date	30 September 2019

#### Results information

Result version number	v1 (current)
This version publication date	07 February 2023
First version publication date	07 February 2023

#### Trial information

##### Trial identification

Sponsor protocol code	AHL2011
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01358747
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Centre Hospitalier Universitaire de Dijon
Sponsor organisation address	1 boulevard Jeanne d'Arc, DIJON CEDEX, France, 21079
Public contact	Project Management, LYSARC, contact@lysarc.org
Scientific contact	Project Management, Pr Olivier Casasnovas, olivier.casasnovas@chu-dijon.fr

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 April 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 September 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Demonstrate the non inferiority in term of progression free survival (PFS) of a therapeutic strategy driven by PET with a ABVD conventional dose chemotherapy for patients reaching a negative PET after 2 cycles of BEACOPPesc, compared to a treatment not monitored by early PET delivering 6 cycles of BEACOPPesc.

Protection of trial subjects:

DSMC periodically reviewed the safety and efficacy data from the trial prepared by the independent statistician. All data presented at the meeting were confidential. Following each meeting the DSMC prepared a report and may recommended changes in the trial conduct.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 May 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 765
Country: Number of subjects enrolled	France: 58
Worldwide total number of subjects	823
EEA total number of subjects	823

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	16
Adults (18-64 years)	807
From 65 to 84 years	0

85 years and over	0
-------------------	---

## Subject disposition

### Recruitment

Recruitment details:

88 study centers in France and Belgium.

Date first subject first visit: 19 May 2011

Date last subject completed: 29 April 2019

### Pre-assignment

Screening details:

Male or female adult (aged 16 to 60 years old) subjects with histologically proven HL not previously treated, with Eastern Cooperative Oncology Group (ECOG) performance status (PS) 0, 1, or 2, and life expectancy  $\geq$  90 days were eligible for participation in the study

### Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Standard Arm

Arm description:

Patients were treated by a BEACOPPesc regimen every 3 weeks for 4 cycles. A PET was performed after 2 cycles of chemotherapy (PET2) with no decisional value, and after 4 cycles with decisional value.

In case of PET4 negative result, patient received 2 additional cycles of BEACOPPesc delivered every 3 weeks

In case of PET4 positive result, patient received a salvage therapy

Arm type	Active comparator
Investigational medicinal product name	Bleomycin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intravenous use

Dosage and administration details:

10 mg/m<sup>2</sup> at Day 8

Investigational medicinal product name	Etoposide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intravenous use

Dosage and administration details:

200 mg/m<sup>2</sup> at days 1, 2 and 3

Investigational medicinal product name	Doxorubicin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intravenous use

Dosage and administration details:

35 mg/ m<sup>2</sup> on day 1

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in vial
Routes of administration	Intravenous use
Dosage and administration details: 1250 mg/m2 on day 1	
Investigational medicinal product name	Vincristine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in vial
Routes of administration	Intravenous use
Dosage and administration details: 1.4 mg/m2 on day 1	
Investigational medicinal product name	Procarbazine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use
Dosage and administration details: Dosage: 100 mg/m2 Administration: Daily from Day 1 of each cycle to day 7	
Investigational medicinal product name	Prednisone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use
Dosage and administration details: Dosage: 40mg/m2 Administration: Daily from Day 1 of each cycle to day 8 and day 9 to day 14	
Investigational medicinal product name	Lenograstim
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Cutaneous use
Dosage and administration details: 5 microgr/kg/day start on day 9	
<b>Arm title</b>	Experimental arm
Arm description: Patients were treated by a BEACOPPesc regimen every 3 weeks for 2 cycles followed by a PET scan (PET2).  After PET2 central review: - In case of positive PET2, the treatment was completed by 2 additional cycles of BEACOPPesc (induction treatment = 4 x BEACOPPesc) - In case of negative PET2, the treatment was completed by 2 cycles of ABVD delivered every 4 weeks (induction treatment = 2 x BEACOPPesc + 2 x ABVD). After PET4 central review: - In case of positive PET4, a salvage therapy was decided by the investigator - In case of negative PET4 : - if PET2 was negative, treatment was completed by 2 cycles of ABVD (induction treatment = 2 x BEACOPPesc + 4 x ABVD). - if PET2 was positive, treatment was completed by 2 cycles of BEACOPPesc (induction treatment = 4 x BEACOPPesc)

## Baseline characteristics

### Reporting groups

Reporting group title	Overall
Reporting group description: -	

Reporting group values	Overall	Total	
Number of subjects	823	823	
Age categorical			
Units: Subjects			
In utero		0	
Preterm newborn infants (gestational age < 37 wks)		0	
Newborns (0-27 days)		0	
Infants and toddlers (28 days-23 months)		0	
Children (2-11 years)		0	
Adolescents (12-17 years)		0	
Adults (18-64 years)		0	
From 65-84 years		0	
85 years and over		0	
Subjects		0	
Age continuous			
Units: years			
arithmetic mean	32.9		
full range (min-max)	16 to 60	-	
Gender categorical			
Units: Subjects			
Female	307	307	
Male	516	516	

### Subject analysis sets

Subject analysis set title	ITT
Subject analysis set type	Intention-to-treat

Subject analysis set description:

The ITT set contains all patients who were formally randomized regardless whether they have received treatment or not (following an intent-to-treat principle).

Patients are analyzed according to the treatment arm they were randomized to receive.

The ITT set is used for the efficacy analysis.

Reporting group values	ITT		
Number of subjects	823		
Age categorical			
Units: Subjects			
In utero			
Preterm newborn infants (gestational age < 37 wks)			
Newborns (0-27 days)			

Infants and toddlers (28 days-23 months) Children (2-11 years) Adolescents (12-17 years) Adults (18-64 years) From 65-84 years 85 years and over Subjects			
Age continuous Units: years arithmetic mean full range (min-max)	32.9 16 to 60

## End points

### End points reporting groups

Reporting group title	Standard Arm
-----------------------	--------------

Reporting group description:

Patients were treated by a BEACOPPesc regimen every 3 weeks for 4 cycles. A PET was performed after 2 cycles of chemotherapy (PET2) with no decisional value, and after 4 cycles with decisional value.

In case of PET4 negative result, patient received 2 additional cycles of BEACOPPesc delivered every 3 weeks

In case of PET4 positive result, patient received a salvage therapy

Reporting group title	Experiimental arm
-----------------------	-------------------

Reporting group description:

Patients were treated by a BEACOPPesc regimen every 3 weeks for 2 cycles followed by a PET scan (PET2).

After PET2 central review:

- In case of positive PET2, the treatment was completed by 2 additional cycles of BEACOPPesc (induction treatment = 4 x BEACOPPesc)

- In case of negative PET2, the treatment was completed by 2 cycles of ABVD delivered every 4 weeks (induction treatment = 2 x BEACOPPesc + 2 x ABVD).

After PET4 central review:

- In case of positive PET4, a salvage therapy was decided by the investigator

- In case of negative PET4 :
  - if PET2 was negative, treatment was completed by 2 cycles of ABVD (induction treatment = 2 x BEACOPPesc + 4 x ABVD).

- if PET2 was positive, treatment was completed by 2 cycles of BEACOPPesc (induction treatment = 4 x BEACOPPesc)

Subject analysis set title	ITT
----------------------------	-----

Subject analysis set type	Intention-to-treat
---------------------------	--------------------

Subject analysis set description:

The ITT set contains all patients who were formally randomized regardless whether they have received treatment or not (following an intent-to-treat principle).

Patients are analyzed according to the treatment arm they were randomized to receive.

The ITT set is used for the efficacy analysis.

### Primary: PFS

End point title	PFS
-----------------	-----

End point description:

The primary endpoint was progression-free survival. PFS was measured from the date of randomization to the date of first documented progression of the lymphoma in non-responding patients, relapse for CR patients or death from any cause without progression, whichever occurs first

End point type	Primary
----------------	---------

End point timeframe:

5-year progression-free survival

End point values	Standard Arm	Experiimental arm		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	413	410		
Units: percent				
arithmetic mean (confidence interval 95%)	87.5 (83.9 to 90.4)	86.7 (83.0 to 89.7)		

<b>Attachments (see zip file)</b>	PFS.png
-----------------------------------	---------

## Statistical analyses

<b>Statistical analysis title</b>	Comparison according to treatment arm
-----------------------------------	---------------------------------------

Statistical analysis description:

Based on a Cox model, the Hazard Ratio (HR) of patients in experimental treatment are compared to patients in standard arm.

Comparison groups	Standard Arm v Experimental arm
Number of subjects included in analysis	823
Analysis specification	Pre-specified
Analysis type	non-inferiority <sup>[1]</sup>
P-value	= 0.64
Method	Logrank
Parameter estimate	Hazard ratio (HR)
Point estimate	1.071
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.738
upper limit	1.554

Notes:

[1] - The Com-Nougue non-inferiority test for PFS gave a similar conclusion in the ITT population by rejecting the null hypothesis (p=0.0037).

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Any episode of any grade of toxicities, related to a Serious Adverse Event must be reported as "Serious Adverse Event"

· Non-serious adverse events not to be reported.

· The following events are not to be reported as SAE if require hospitalization le

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
Dictionary version	15

### Reporting groups

Reporting group title	BEACOPP only
-----------------------	--------------

Reporting group description:

patients who received BEACOPP only and who performed cycle 1

Reporting group title	BEACOPP + ABVD
-----------------------	----------------

Reporting group description: -

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 October 2011	Version 2.0 (20 October 2011) Removal of LH dosage in men under the age of 45 and participating in the fertility study.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported

---
